Date of submission: 21 December 2012

# National Report to the Tenth Session of the United Nations Forum on Forests

#### INTRODUCTORY NOTE

This streamlined reporting format is prepared in response to the request made in the Resolution on Forests for People, adopted at the ninth session of the Forum in February 2011<sup>1</sup>. Accordingly, the Forum requested the UNFF Secretariat (UNFFS) to develop a streamlined reporting format, in consultation with other members of the Collaborative Partnership on Forests (CPF), to ensure simple voluntary national reporting for UNFF 10 focused on the implementation of the non-legally binding instrument on all types of forests, (hereinafter referred to as the forest instrument)<sup>2</sup> and a balanced reporting of all its four Global Objectives on Forests (GOFs).

The streamlined reporting format is the result of consultations with the members of the CPF Task Force on Streamlining Forest-Related Reporting. In addition, UNFFS and FAO consulted extensively with government representatives and international experts on this reporting format and its content. These consultations were conducted through five regional capacity-building workshops<sup>3</sup> with the participation of UNFF and FRA national focal points. A total of 136 national and international experts from 78 countries and up to five international organizations participated in the workshops. The workshops also benefitted from the four on-going FAO pilot projects in Ghana, Liberia, Nicaragua and the Philippines on the implementation of the forest instrument.

The reporting format is intended to complement ongoing reporting by other processes and focuses on identifying critical gaps in international and national reporting, and on issues that are not sufficiently covered by other reporting processes such as forest financing and forest contributions to the achievement of the Millennium Development Goals (MDGs). This will help to better measure the progress achieved across the full scope of the forest instrument and its GOFs.

The streamlined reporting format is prepared in a way that reduces the burden of multiple reporting exercises by countries. In this regard, the reporting format takes into account quantitative and qualitative information already submitted by countries to the FAO *Forest Resource Assessment* (FRA) 2005 and 2010<sup>4</sup>.

#### GUIDANCE FOR THE PREPARATION OF NATIONAL REPORTS

This streamlined reporting format is made up of three parts:

- I. The forest instrument
- II. The four Global Objectives on Forests
- III. The contribution of forests to the achievement of the Millennium Development Goals

The forest instrument covers a broad spectrum of issues beyond forests. Its implementation requires close cooperation between different authorities. Consequently, the preparation of national reports may require a cooperative exercise among institutions and ministries such as ministries of environment, economic development, finance, agriculture, health and statistics, and in particular with national focal points for FRA, the NFP Facility, the ITTO C&I process and the Rio Processes, where applicable.

For reporting, please note the following:

- The fields with FRA indicators are highlighted in grey. This data will be derived by UNFFS from the FRA database;
- If information for a specific question does not exist, please enter NA (not available) or NR (not relevant) but do not
  leave the fields blank all the responses to the questions contained in this reporting format are important for the
  Forum to analyze the progress, to identify the gaps and needs in implementing the forest instrument, including
  data gaps, and in finding ways and means to address them;
- Some of the questions include descriptive parts. We encourage countries to fill in these parts and provide context and background information in addition to the requested figures and the "yes" and "no" answers. At the same time, the responses should be limited [maximum 250] to keep the analytical efforts within reasonable bounds;
- The national report should be submitted in English, French or Spanish. To facilitate exchange of experience, countries are also encouraged to submit, where relevant, a translation of their summary report in English.
- The national reports should be submitted to UNFFS by 30 September 2012. Submission of the reports ahead of
  this deadline is encouraged, as this will facilitate the preparation of analyses and syntheses to be made available
  to the UNFF10:
- Member States are kindly requested to submit the original signed copy of the national report with an official letter from their respective institution/ministry, via mail or email to the address below. Electronic copies should be available in word processing software, and the scanned copy of the official letter, as well as any graphic elements, should be provided in separate files.

# PART I: The Non-Legally Binding Instrument on All Types of Forests (forest instrument)<sup>5</sup>

# Thematic Clusters of the Forest Instrument

The forest instrument has been grouped into five cross-cutting and eight thematic clusters for easy reference<sup>6</sup>:

- 1A: Strengthening political commitment for sustainable forest management
- 1B: Financing sustainable forest management
- 1C: Capacity building and technology transfer
- 1D: Stakeholder participation
- 1E: Enhanced international cooperation
- 2A: Forest law enforcement and governance
- 2B: International Trade in forest products
- 2C: Protection of forests
- 2D: Science and research
- 2E: Public awareness and education
- 2F: Private sector and industry
- 2G: Indigenous and local communities
- 2H: Monitoring, assessment and reporting

Data provided on thematic clusters of the forest instrument will also be used for assessing progress toward its Global Objectives on Forests (Qs 33-49).

### 1A: Strengthening political commitment to sustainable forest management

- Existence of Forest policy statement with national scope; data will be derived by UNFFS from FRA database<sup>7</sup> (T14 – Policy and legal framework)
- Existence of national forest programme (nfp); data will be derived by UNFFS from FRA database (T14 – Policy and legal framework)

3. Do you have inter-institutional mechanisms/processes for cross-	Yes	No
sectoral cooperation to achieve sustainable forest management?	Yes	
If yes, which sectors are actively involved:		
Agriculture		Yes
Climate Change		Yes
Energy		Yes
Tourism		Yes
Water		Yes
Other: Nature Conservation/Biodiversity, Industry		Yes
Please describe the inter-institutional mechanisms/processes for cross-sectoral	cooperation (maximum 2	250 words).

# 2C: Protection of forests

- 18. Forest area (1000 hectares) conservation of biodiversity; data will be derived by UNFFS from FRA database (T 3 Forest designation and management).
- 19. Forest area (1000 hectares) within protective areas; data will be derived by UNFFS from FRA database (T 3 Forest designation and management).

Describe any significant actions related to protection of forests since 2007 (maximum 250 words).

Applying the ecosystem approach to the management of all types of forest through forest management planning (principle of differentiated approach in relation to natural conditions is applied).

Implementation of Natura 2000 network8 on forest land).

Forest protection: Implementing the system of forest monitoring and implementing preventive measures against natural hazards and human induced threats, including forest fires, in forests.

#### 2D: Science and research 2007 20. How much funding (US\$ 1000) was designated for forest-related 2011 research? 920 1.621 21. Please specify the sources of financing: 2007 2011 Public sector Yes Yes Private industry Bilateral cooperation Yes Yes Multilateral cooperation Yes Yes

Others; please describe (maximum 250 words).

Important note: Only funding from the Slovak Ministry of Agriculture and Rural Development to the National Forest Centre (research) is included in figures above. The financial resources from other governmental and non-governmental authorities, as well as co-funding from the European Union (mainly project based), is not included. There is no information available on private funding sources used for forest-related research.

<sup>&</sup>lt;sup>8</sup> Network of protected areas established according to the relevant European Union law (conservation of species and habitats important from the European Union perspective).

Part II: The Global Objectives on Forests		
Global Objective 1: Reverse the loss of forest cover worldwide through sustainable	forest managemen	t including
protection, restoration, afforestation and reforestation, and increase efforts to prev	-	-
33. Extent of the country's forests and other wooded lands (1000 ha.); data will	2005	2010
be derived by UNFFS from FRA database (T.1 - Extent of forest and other		

wooded land)		
34. Extent of the country's forests under public/private ownership (1000 ha); data will be derived by UNFFS from FRA database (T.2 - Forest ownership and management rights).	2005	2010
Extent of the country's forests under private ownership (1000 ha)		
Extent of privately-owned forests according to the following categories (1000 ha)		
Individual		
Business entities and institutions		
Local, indigenous and tribal communities		
Describe any significant actions related to Global Objective on Forests 1 (maximum 250 v	vords).	
There are two aspects of the global objective 1:		
(1) "reversing the loss of forest cover": Not relevant at a national level. In the Slovak Repu forest stands) has been continuously increasing since 1950s. Concerning international dir involved in ODA projects aimed at improving sustainable forest management practices in	mension, the Slovak e	
(2) preventing forest degradation": see above, part I., and below: MDG 7.		
Global Objective 2: Enhance forest-based economic, social and environmental ben	ofits including by in	nnroving the
livelihoods of forest dependent people	citis, including by in	ilproving the
35. Extent of forest designated and managed for production (1000 ha); data will	2005	2010
be derived by UNFFS from FRA database (T.3 - Forest designation and	2000	20.0
management).		
Extent of forest designated and managed for protection (1000 ha)		
Extent of forest designated and managed for conservation (1000 ha)		
Extent of forest designated and managed for social services (1000 ha)		
0/ 7-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1-1	0005	0010
<ol> <li>Total volume of industrial roundwood removal (1000 m³); data will be derived by UNFFS from FRA database (T.11 - Forest Wood removals and value of</li> </ol>	2005	2010
removals).		
Total value of industrial roundwood removal (US\$1000)		
Total volume of fuelwood removal (1000 m³)		
Total value of fuelwood removal (US\$1000)		
Total value of non-wood forest products (NWFP) (US\$1000)		

37. Has your country established a mechanism(s) for payment of ecosystem	Yes	No
services?	Yes	
If yes, what is the estimated value of the payment of ecosystem services (US\$ 1,000)?	2005	2011
	NA	NA
Please describe how the mechanism(s) function (maximum 250 words).  Biodiversity conservation: Forest – environmental payments through the National Rural D	evelopment Programm	ne.
<ul><li>38. What is the number of visitors to national parks and other protected areas in your country?</li><li>39. What is the area of urban parks in your country (1000 ha)?</li></ul>	2005 NA NA	2011 NA NA
40. What is the estimated number of visitors to urban parks in your country?	NA	NA
Describe any significant actions related to Global Objective on Forests 2 (maximum 250 See related information above.		
Global Objective 3: Increase significantly the area of protected forests worldwide a managed forests, as well as the proportion of forest products from sustainably ma		stainably
41. Extent of forest designated and managed for sustainable forest management	2005	2010
(1000 ha); data will be derived by UNFFS from FRA database (T.3 - Forest designation and management).	2333	23.0

Extent of forest with management plans (1000 ha)		
42. Does your country have forests under internationally recognized certification	Yes	No
schemes?	Yes	1
If yes, please specify:	Certification	Area
In you, produce speeding.	Scheme	7 11 00
	PEFC, FSC	1.380.285
	1 11 0,1 30	hectares (70%
		of total forest
		land)
Describe any significant actions related to Global Objective on Forests 3 (maximum 250 v	vorde)	ianuj
All forest land in the Slovak Republic is managed under forest management plans. A fore		is a tool for
implementing sustainable forest management, as defined by the pan-European policy pro		
a particular forest stand.	icess, on the ground,	i.e. at a level of
a particular forest stariu.		
Global Objective 4: Reverse the decline in official development assistance for susta		-
mobilize significantly increased, new and additional financial resources from all so	urces for the implen	nentation of
sustainable forest management;	T	
43. Does your country have a government budget specific for forests?	Yes	No
	Yes	
44. What is the total amount of funding in forest management, administration,	2007	2011
research and human resource development (US\$ 1,000)?	NA	NA
45. If the funding for forests is spread among other sectors, please specify the main	n contributors:	
A subsulb us		
Agriculture	Ye	es
Energy		
Water		
Climate change		
Nature conservation		
Others; please specify:		
46 Has the country been able to mobilize significantly increased financial	Vas	No

resources for the implementation of SFM since 2007? If yes, please specify				
			N	lo
sources:				
Domestic public funding	2007	7 (US\$)	2011	(US\$)
Domestic private sector funding	2007	7 (US\$)	2011	(US\$)
		()		(/
External private sector funding	200	7 /LIC¢\	2011	/I IC¢\
External private sector funding	2007	7 (US\$)	2011	(022)
If there has been no increase, please describe the main challenges in mobilizing funds (m		•		
The public financial resources, potentially available for forests, were limited due to budget	ary restric	tions and ge	neral cuts	as
a reaction to global economic and financial crisis.

PART III: Achievement of the Millennium Develo	anmont Coals	
PART III. Achievement of the Millerinium Develo	prinerii Goais	
Forests can make significant contributions to poverty reduction, improved health, ed	lucation and gender ed	quity Sustainable forest
management aims to enhance the contribution of forests to the achievement of the	•	
including the Millennium Development Goals (MDGs). However, the evidence of thi		
value of sustainably managed forests are difficult to gather.	s continuation and gree	iter recognition or the
value of sustainably managed forests are difficult to gather.		
Currently the only forest-related official MDG indictor that provides information on the	e proportion of land ar	rea covered by forest is
Indicator 7.1 under Goal 7: Ensure environmental sustainability. This indicator, how		
and services including socio-economic benefits of forests to society, nor the contrib		=
MDGs. Establishing the direct and indirect links between forests and MDGs is pivot		
taken to reverse the loss of forest cover and to prevent forest degradation while ma		
sustainable development.	Minizing the benefits o	riorests for deflicting
Sustainable development.		
The aim of this part of the reporting format is to explore the existing data, evidence	oasis and cases demo	nstrating the
contribution of forests and sustainable forest management to MDGs, at the same til	ne identifying gaps in t	the monitoring systems
and lack of adequate indicators.		
Million Son Douglass and Cooks (MD)	\.\

If so, do you have specific indicators and data which could be/are being used to	Yes	
assess this contribution?		
Please list the indicators. The national criteria and indicators for sustainable forest	management which are	fully based on the nan-
European criteria and indicators, namely those related to environmental pillar of SI	9	
, ,	( J = = = = = = = = = = = = = = = = = =	3-7
	,	
Please describe how forests contribute to achieving this goal (maximum 250 words)	5).	
National measures contributing to achieving this goal:		

-	adoption and application of the national criteria and indicators of sustainable forest management (conservation of
	biological diversity in forest ecosystems as one of the criteria),

- forest genetic resources conservation implemented, in particular, through the Act on Forest Reproductive Material,
- monitoring of invasive forest tree species within the national forest inventory (results available in 2007),
- existence of a national legal framework on forest regeneration limiting a transfer of non-autochthonous forest reproductive material (the Act on Forest Reproductive Material),
- active participation of the Slovak Republic in the European Forest Genetic Resources Programme EUFORGEN (international dimension),
- on-going process of forest certification,
- applying the ecosystem approach to the management of all types of forest through forest management planning (principle of differentiated approach in relation to natural conditions is applied),
- monitoring forest ecosystems through, so called, ecological surveys within the process of forest management plans elaboration,
- implementation of information systems in forestry (data and information concerning, *inter alia*, forest biodiversity are gathered, processed and stored),
- implementation of Natura 2000 network on forest land.

Goal 8: Develop a global partnership for development

Does SFM contribute to achieving this goal in your country?	Yes	NO
If so, do you have specific indicators and data which could be/are being used to		No
