

GFFFN—views from China

26 Apr 2016

I would like to highlight the nature of GFFFN as a forest financing facilitation network, it's not a financing agency per se. As per UNFF11 resolution, priorities of GFFFN include: Firstly, assisting Member States in designing and applying forest projects from existing and emerging financial sources. Secondly, assisting Member States to develop national forest financing strategies. Thirdly, enhancing Member States' capacity in raising and using finance. Last but not least, collecting and sharing forest finance information, including through a forest financing database to be established.
