

Goals and targets

We can start on the basis of the 6 goals of the Tokyo paper.

The two Goals related to Coherence and governance frameworks are key to deal with the fragmented regime.

We need concrete "deliverables" under each goal in order to attract other processes, set a clear reference for the supportive CPF work, add value to this very process vis-à-vis the others and make the SP "strategic".

Exact terminology for such deliverables needs to be taken care of.
