

Kim Lundgren

Kim Lundgren has significant experience in addressing climate change issues at the local level. She received a B.S. in Environmental Science from the University of Massachusetts, Amherst and an M.A. in Urban and Environmental Policy and Planning from Tufts University. After working several years as a U.S. EPA consultant on hazardous waste, Ms. Lundgren began working with the City of Medford, MA. As the Director of the Energy and Environment Office for the City, she was responsible for all energy efficiency and environmental initiatives in the City, including the implementation of the City's Climate Action Plan, which entails reducing emissions of greenhouse gases and criteria air pollutants through various measures related to buildings, transportation, lighting, clean energy installation, and education. Additionally, this office develops and supervises programs related to wetlands conservation, open space preservation, and Stormwater management.

In May 2005, Ms. Lundgren was hired to open the first Regional Capacity Center for ICLEI- Local Governments for Sustainability. In this role, she is responsible for supporting all CCP participants within the Northeast on the Milestone Process and furthering the network of greenhouse gas emission reductions within this region. Additionally, she manages various grant programs that are focused on Northeast communities and sustainability.
