

## BOOK REVIEWERS NEEDED

---

The *Natural Resources Forum* is a quarterly journal issued by the United Nations and published by Wiley-Blackwell Publishing. It focuses on sustainable development of natural resources, and seeks to identify policy options for decision makers, especially in developing countries. Each issue features between 4 and 7 book reviews by practitioners, academics and experts within and outside the UN.

We have recently received six (6) interesting new books that are available for review. We also encourage you to forward this announcement to colleagues in other divisions, departments, organizations, universities, etc. who are involved in the sustainable development of natural resources.
