

INTEGRATED

PLAN FOR WATER DEVELOPMENT
AND MANAGEMENT

TABLE OF CONTENTS

1 Introduction.....	11
2 Institutional framework for drawing up the integrated plan for water development and management and its consultation domains.....	14
3 Goals of the integrated plan for Chad's water development and management and of the millennium declaration.....	15

CHAPTER 1

PRESENT SITUATION OF CHAD'S WATER DEVELOPMENT AND MANAGEMENT

1 Context and demography.....	21
2 The need to develop hydraulic infrastructure in Chad and the fight against poverty.....	26
2.1 Economic diversification.....	26
2.2 The fight against poverty.....	26
2.3 The place of water in the economy of Chad.....	27
2.3.1 Water and people's well-being.....	27
2.3.2 Water and economic development.....	27
3 Analysis of the basic hydraulic infrastructure situation in 2000.....	28
3.1 The situation regarding village water supply schemes.....	28
3.1.1 Drinking water supply facilities in villages.....	29
3.1.2 Equipment management and maintenance methods.....	31
3.1.3 Village water supply stakeholders.....	32
3.2 The situation of urban and semi-urban water supplies.....	36
3.2.1 Equipment and estimates of drinking water supplies.....	36
3.2.2 Management of urban facilities.....	36
3.2.3 The cost of water.....	39
3.2.4 The major stakeholders in urban water supplies.....	39
3.3 The situation with regard to sanitation.....	40
3.3.1 Urban sanitation facilities.....	41
3.3.2 Stakeholders in the field of sanitation.....	41
3.4 The situation with regard to pastoral water supplies.....	42
3.4.1 Pastoral systems.....	42
3.4.2 Livestock and pastoral resources.....	45
3.4.3 Pastoral water supply facilities.....	45
3.4.4 Management of pastoral water points.....	46
3.4.5 Conflicts connected with access to water points.....	47
3.4.6 Pastoral water supply stakeholders.....	48
3.5 The situation with regard to agricultural water supplies.....	48
3.5.1 The physical context of agricultural water supplies.....	48
3.5.2 Agricultural water supply facilities and assessment.....	49

3.5.3	Summary of agricultural water consumption	52
3.5.4	Stakeholders in the field of agricultural water supplies	53
3.6	The situation with regard to fishing.....	53
3.7	The situation with regard to hydroelectricity.....	53
3.8	The situation with regard to river and lake transport	54
3.9	The situation with regard to tourism.....	54
4	Water resources and demand satisfaction.....	54
4.1	Surface water	55
4.1.1	Rainfall.....	55
4.1.2	River systems	55
4.1.3	Summary of surface water uses	59
4.2	Groundwater resources.....	59
4.2.1	The aquifers of Chad.....	62
4.2.2	Groundwater uses: total figures	65
4.3	Water resources and use in 2000: total figures	66
5	The environment and health of aquatic ecosystems.....	67
5.1	Plant cover, desertification and water points	67
5.2	Aquatic ecosystems.....	67
5.3	Environmental risks and their prevention	68
5.3.1	Risks of natural origin.....	68
5.3.2	Risks of human origin.....	68
6	Major shared international watercourses.....	71
6.1	The River Niger.....	71
6.2	The Lake Chad basin	71
6.3	The Nubian sandstone aquifer.....	72
7	Legal and institutional framework.....	73
7.1	Existing legislation.....	73
7.2	Existing regulations	74
7.3	General institutional context of the water sector	75
7.4	The consultative mechanism.....	77
8	Main conclusions, lessons and constraints to be overcome.....	77

CHAPTER 2 FORECASTING BASIC NEEDS AND FUTURE PROSPECTS

1	Development policy in Chad.....	89
2	Evaluation of requirements in the different subsectors.....	90
2.1	Village water supply requirements.....	90
2.1.1	Evaluation of drinking water point requirements in 2000.....	90
2.1.2	Evaluation of village drinking water point requirements for 2020.....	93
2.2	Urban and semi-urban water supply requirements.....	94
2.2.1	Equipment requirements for the non-concessionary sector.....	95
2.2.2	Concessionary sector equipment requirements.....	96
2.3	Sanitation requirements.....	97
2.3.1	Sanitation requirements in rural areas.....	97
2.3.2	Sanitation requirements in urban and semi-urban environments.....	98
2.3.3	Sanitation requirements in industrial areas.....	99
2.4	Pastoral water supply requirements.....	100
2.4.1	Assessment of pastoral water supply requirements.....	100
2.4.2	Assessment of pastoral water point requirements.....	100
2.5	Agricultural water supply requirements.....	106
2.5.1	Changes in food needs.....	106
2.5.2	Agricultural water and equipment requirements.....	107
3	Balance between water requirements and resources and environmental impacts of implementing the SDEA.....	108
3.1	Constraints arising from mobilisation of water resources.....	108
3.1.1	Surface water.....	108
3.1.2	Groundwater.....	109
3.2	Summary of water resources by large climatic zone.....	113
3.3	Conclusions on the water resource and environmental impact assessment.....	115

CHAPTER 3 WATER POLICY AND IMPLEMENTATION STRATEGIES

1	Water policy.....	123
1.1	Objectives.....	123
1.2	Principles of the water policy.....	123
1.3	Specific objectives.....	125
1.4	Subsectoral strategies.....	125
1.4.1	Strategic components of drinking water.....	125
1.4.2	Strategic components of pastoral water supply.....	126
1.4.3	Strategic components of agricultural water supply.....	127
1.4.4	Strategic components in the water resources field.....	128
1.4.5	Strategic components in sanitation.....	128

2	Macroeconomic analysis and analysis of the water sector development strategy in light of the identified needs	129
2.1	Economic forecasts.....	130
2.1.1	Analysis of the long-term performance of the Chadian economy.....	130
2.1.2	The oil economy.....	131
2.2	Strategy for mobilising funds.....	134
2.2.1	Ability of the population to pay the cost of water	134
2.2.2	Mobilising international aid.....	137
2.3	Water sector funding strategy.....	138
2.3.1	Urban water supply.....	138
2.3.2	Urban sanitation	140
2.3.3	Village water supply.....	142
2.3.4	Village sanitation.....	144
2.3.5	Pastoral water supply.....	145
2.3.6	Agricultural water supply.....	145
2.3.7	Water resources	146
2.4	Summary of investments to be found in the field of water	147
3	Possible equipment and management scenarios and scenario selected	148
3.1	Scenarios of possible future changes in drinking water supply.....	148
3.2	Sanitation scenario.....	150
3.3	Pastoral water supply scenario.....	150
3.4	Agricultural water supply scenario.....	150
4	Organisational framework, decentralisation and the new water governance system	151
4.1	Local level: locally-generated development and local stakeholder structuring with organised support.....	151
4.2	Intermediary and central levels: participation from public stakeholders and services	151
5	Conclusion	153

CHAPTER 4 ACTION PLAN

1	Introduction.....	159
2	Village water supply action plan.....	161
3	Semi-urban and urban water supply action plan.....	168
4	Pastoral water supply action plan.....	174
5	Agricultural water supply action plan.....	181
6	Water resources action plan.....	185
7	Sanitation action plan	192

CHAPTER 5
FUNDING - MONITORING - ASSESSING - UPDATING

1	Introduction.....	199
2	Fund mobilisation.....	200
2.1	Internal fund mobilisation.....	200
2.1.1	The users' contribution.....	200
2.1.2	The State's public investments (excluding external aid).....	201
2.2	External fund mobilisation.....	201
3	Monitoring of SDEA implementation.....	201
3.1	Indicator-based monitoring of SDEA implementation.....	201
3.2	Indicator-based monitoring of SDEA impacts.....	202
3.3	Monitoring of methodological consistency.....	203
3.4	Monitoring the mobilisation of funds.....	204
3.5	Monitoring the impact of human activities on water resources.....	204
4	Assessing the performance of SDEA implementation.....	205
5	Updating the SDEA.....	205
	Appendix 1 : List of participants.....	207
	Appendix 2 : Macro-economic context of the PRSP.....	217
	Bibliography.....	223

LIST OF TABLES

Table 1:	Population distribution according to administrative breakdown.....	24
Table 2:	Population distribution by geoclimatic zone	25
Table 3:	Estimated percentage of rural population with access to drinking water in 2000.....	33
Table 4:	Population growth in concessionary and non-concessionary areas.....	36
Table 5:	Distribution of modern wells per geoclimatic zone.....	46
Table 6:	Characteristics of agricultural water supply facilities (2000)	51
Table 7:	Summary of agricultural water abstraction in 2000.....	52
Table 8:	Surface water in Chad: abstraction for each type of use (2000)	60
Table 9:	Renewable resources (main aquifers).....	62
Table 10:	Exploitable reserves (main aquifers).....	62
Table 11:	Main characteristics of hydrogeological units.....	63
Table 12:	Estimated theoretical abstraction from the various aquifers.....	66
Table 13:	Total water resources and uses in 2000	66
Table 14:	Summary and analysis of strategy documents in the various water subsectors.....	82
Table 15:	Drinking water point requirements (HP equivalent) in village centres in 2000.....	90
Table 16:	Summary of drinking water points for 2020.....	93
Table 17:	Specific water consumption hypotheses	94
Table 18:	Estimated urban and semi-urban water requirements.....	95
Table 19:	Urban and semi-urban water supply objectives to be met by 2020.....	97
Table 20:	Assessment of pastoral water supply requirement per geoclimatic zone.....	100
Table 21:	Estimated number of pastoral water points to be installed	105
Table 22:	Estimated production in 2001.....	106
Table 23:	Estimated change in consumption per inhabitant between 2000 and 2020.....	106
Table 24:	Estimate of requirements for various food products between 2000 and 2020	106
Table 25:	Predicted rise in the consumption of dates, milk and meat in the Saharan zone (in tonnes)	107
Table 26:	Changes in agricultural water requirements between 2000 and 2020	108
Table 27:	Summary of water resources and estimated abstraction by use.....	114
Table 28:	Public Investment Programme as a % of the donor and State totals.....	132
Table 29:	Public Investment Programme in millions of FCFA.....	132
Table 30:	Cost of a basic supply unit	135
Table 31:	Ongoing and proposed urban water supply programmes.....	139
Table 32:	Ongoing and proposed urban sanitation projects.....	141
Table 33:	Ongoing and proposed village water supply programmes.....	143
Table 34:	Ongoing and proposed rural sanitation programmes.....	144
Table 35:	Ongoing and proposed pastoral water supply programmes.....	145
Table 36:	Ongoing and proposed agricultural water supply programmes.....	146
Table 37:	Ongoing and proposed water resources programmes.....	147
Table 38:	Summary of investments to be found in FCFA billion in the field of water (per year).....	147

LIST OF FIGURES

Figure 1:	Administrative breakdown by prefecture.....	23
Figure 2:	Administrative breakdown by department.....	23
Figure 3:	Rural population density in the year 2000.....	30
Figure 4:	Locations of the main towns of the departments and sub-prefectures.....	38
Figure 5:	Pastoral systems.....	43
Figure 6:	Agricultural water supply schemes.....	50
Figure 7:	Orohydrography.....	56
Figure 8:	Main watercourses in Chad.....	56
Figure 9:	Long-term rainfall variability.....	57
Figure 10:	Annual flow rates of the Chari at Lake Chad.....	57
Figure 11:	The main hydrogeological units in Chad.....	61
Figure 12:	Main environmental components.....	70
Figure 13:	Village drinking water point requirements (HP equivalents) in the year 2000.....	92
Figure 14:	Estimation of pastoral water point requirements in Saharan zone.....	101
Figure 15:	Estimation of pastoral water point requirements in Sahelian zone.....	102
Figure 16:	Estimation of pastoral water point requirements in Sudanian zone.....	103
Figure 17:	Interpolation of static level depth.....	110
Figure 18:	Specific discharge interpolation.....	110
Figure 19:	Conductivity interpolation.....	111
Figure 20:	pH interpolation.....	111
Figure 21:	Groundwater accessibility by borehole.....	112
Figure 22:	Groundwater exploitability.....	112
Figure 23:	Resources/Requirements summary.....	117
Figure 24:	Overview of water resources in Chad.....	118
Figure 25:	Consultative mechanism.....	154

One billion FCFA = 1.52 million Euros

LIST OF ABBREVIATIONS

ADB:	African Development Bank
AFD:	Agence Française de Développement
BADEA:	Arab Bank for Economic Development in Africa
BELACD:	Bureau d'Étude et de Liaison d'Action Caritative et de Développement
BET:	Borkou-Ennedi-Tibesti
CNGE:	National Water Management Committee
CTIE:	Intersectoral Technical Committee for Water
DGRHA:	Directorate of Rural Engineering and Agricultural Hydraulics
DH:	Directorate of Hydraulic Affairs
DLA:	Decentralised Local Authorities
DREM:	Direction des Ressources en Eau et de la Météorologie
DWP:	Drinking water point
DWS:	Drinking water supply
EDF:	European Development Fund
EU:	European Union
FAC:	Fonds d'Aide et de Coopération
GDP:	Gross domestic product
GNP:	Gross national product
HCNE:	High National Council for the Environment
HP:	Hand pump
IFAD:	International Fund for Agricultural Development
LCBC:	Lake Chad Basin Commission
LRVZF:	Farcha Veterinary and Zootechnical Research laboratory
ME:	Ministry of Stock-Rearing
MEE:	Ministry of the Environment and Water
MDG:	Millennium development goals
MISD:	Ministry of the Interior, Security and Decentralisation
MWP:	Modern water point
NBA:	Niger Basin Authority
NGO:	Non-governmental organisation
ONDR:	National Rural Development Office
PRSP:	Poverty Reduction Strategy Paper
PWP:	Pastoral water point
SDEA:	Integrated plan for Chad's water development and management
SECADEV:	Secours Catholique Développement
SIA:	Small irrigation area
SODELAC:	Société de Développement du Lac
STEE:	Société Tchadienne d'Eau et d'Électricité
STI:	Swiss Tropical Institute
TLU:	Tropical livestock unit
UNDESA:	United Nations Department of Economic and Social Affairs
UNDP:	United Nations Development Programme
UNICEF:	United Nations Children's Fund
UNO:	United Nations Organization
URP:	Urban reference plan
WHO:	World Health Organization
WPMC:	Water Point Management Committee
