

## **New format for CSD case studies**

The Division for Sustainable Development has redesigned its case study database so that it now includes [searchable listings](#) of case studies submitted for the thematic cluster of CSD cycles.

In addition, Governments, intergovernmental organizations and Major Groups may now submit their case studies directly through the online database by registering at [e-DESA portal](#).

The purpose of the database is to provide a web-based tool to disseminate information on implementation and best practices, in response to a request from the Commission on Sustainable Development (CSD) at its 13th session.
