

ENABLING ACCESS TO CLEAN WATER

United Nations Trust Fund
for Human Security

Project "Applying the Human Security Concept to Stabilize
Communities in Canton 10"

This infographic represents
only one project component.

ABOUT THE PROJECT

Project aimed to apply the human security concept for the purpose of stabilization of communities in Canton 10, with particular focus on returnees and internally displaced who still face particular challenges and hardships in the process of reintegration, primarily in

the context of economic and social security. The project was based on partnerships with local municipal and cantonal authorities, aimed at ensuring local participation and support as well as long-term sustainability of the project results.

Major problem in some areas of Canton 10 was lack of access to clean water: **chlorination of water was not done for nearly 20 years, making the water insanitary and watersupply irregular.**

The project implemented a number of activities to ensure clean water for population

IN 4 MUNICIPALITIES OF CANTON 10:

1. DRVAR
2. BOSANSKO GRAHOVO
3. KUPRES
4. LIVNO

Access to clean water was also ensured for public institutions:

5 SCHOOLS

2 KINDERGARTENS

3 HEALTH CENTERS

From the total number of households connected to the water supply network, **100%** of those in Drvar and Kupres and **40%** of those in Bosansko Grahovo now have **continuous supply of sanitary, chlorinated water.**

700 meters of new water-supply pipeline was built in the village of Trčić in Livno municipality, to provide water access for about **60** agricultural households.

WHAT WAS DONE ABOUT IT?

INSTALLATION OF
CHLORINATION STATIONS

REPLACEMENT OF
OLD PUMPS

REHABILITATION OF CRITICAL
WATER GRID SECTIONS

WHAT WAS ACHIEVED?

Access to clean water was ensured for

10,654 PERSONS
of which

5,328
WOMEN

5,326
MEN

in 3,030 HOUSEHOLDS
including

1,608
CHILDREN (0-14)

2,580
ELDERLY (+65)

The goal is to ensure sanitary conditions and access to clean water for all the people on the planet by **2030**

Implemented project activities also represent a substantial contribution toward achievement of global goals that make the Program of sustainable development by 2030, adopted by Member States of the United Nations.

Everyone will have access to clean water by 2030

Project "Applying the Human Security Concept to Stabilize Communities in Canton 10" was supported by the UN Trust Fund for Human Security (UN TFHS), and implemented by UNDP, UNHCR, UNICEF i IOM, in partnership with the Government and the municipalities of Canton 10, Red Cross, municipal centers for social welfare, and local civil society organizations. Project duration: September 2013 – December 2016. Budget: about 2.5 million USD.

OMOGUĆAVANJE PRISTUPA ČISTOJ VODI

United Nations Trust Fund
for Human Security

Projekt "Primjena koncepta ljudske sigurnosti u cilju stabilizacije zajednica u Kantonu 10"

Ova infografika predstavlja samo jednu komponentu projekta.

O PROJEKTU

Projekt je imao za cilj primjenu koncepta ljudske sigurnosti u cilju stabilizacije zajednica u Kantonu 10, s posebnim osvrtnom na povratnike i interno raseljene osobe koje se i danas suočavaju sa različitim izazovima i poteškoćama u procesu reintegracije, primarno

u kontekstu ekonomske i socijalne sigurnosti. Projekt se zasnivao na partnerstvu sa lokalnim općinskim i kantonalnim vlastima, s ciljem obezbjeđenja lokalnog učešća i podrške ali i dugoročne održivosti rezultata projekta.

Veliki problem u dijelovima Kantona 10 predstavljao je nedostatak pristupa čistoj vodi: **hlorisanje nije obavljano već 20 godina, te je voda bila sanitarno neispravna, a vodosnabdijevanje nestabilno.**

U okviru projekta provedene su aktivnosti na osiguranju pitke vode za stanovništvo

U 4 OPĆINE KANTONA 10:

- 1• DRVAR
- 2• BOSANSKO GRAHOVO
- 3• KUPRES
- 4• LIVNO

ŠTA JE PODUZETO?

UGRADNJA
HLORNIH STANICA

ZAMJENA
STARIH PUMPI

SANACIJA KRITIČNIH TAČAKA
VODOVODNE MREŽE

ŠTA JE POSTIGNUTO?

Pristup pitkoj vodi dobile su:

U Drvaru i Kupresu **100%**, a u Bosanskom Grahovu **40%** domaćinstava priključenih na vodovodnu mrežu dobilo je **stalno snabdijevanje sanitarno ispravnom, hlorisanom vodom.**

700 metara novog cjevovoda izgrađeno je u selu Trčić u općini Livno, čime je omogućen pristup vodi za oko **60** poljoprivrednih domaćinstava.

Pitka voda osigurana je i za javne ustanove:

5 ŠKOLA

2 VRTIĆA

3 DOMA
ZDRAVLJA

10.654 OSOBE
od čega

5.328
ŽENA

5.326
MUŠKARACA

u 3.030 DOMAĆINSTAVA
među kojima je

1.608
DJECE (0-14)

2.580
STARIJIH (+65)

Cilj je do **2030.** godine osigurati sanitarne uslove i pristup pitkoj vodi za sve ljude na planeti

Provedene projektne aktivnosti također predstavljaju značajan doprinos ostvarenju globalnih ciljeva koji čine Program održivog razvoja do 2030. godine, a koji su usvojile države članice Ujedinjenih nacija.

Svi će imati ispravnu vodu za piće do 2030. godine

Projekt "Primjena koncepta ljudske sigurnosti u cilju stabilizacije zajednica u Kantonu 10" je podržan od strane UN Fonda za ljudsku sigurnost (UN TFHS). Implementirali su ga UNDP, UNHCR, UNICEF i IOM, u partnerstvu sa Vladom i općinama Kantona 10, Crvenim križom, općinskim centrima za socijalni rad, te lokalnim organizacijama civilnog društva. Trajanje projekta: septembar 2013 – decembar 2016. Budžet: oko 2,5 miliona USD.
