

Greetings for a Future of Peace on our beautiful Mother Earth!

The organization remains committed to contribute to the outcome of international processes including but not limited to The Paris Agreement, The Climate Change Conference, The high-level plenary meeting of the General Assembly known as the World Conference on Indigenous Peoples, The Water Conference, the SDG Summit, the Summit of the Future, the 2025 Peacebuilding Commission, and the New Agenda for Peace founded in a spirit of Multilateralism.

Member States can begin to find common cause in the work that began in 1989 as a strong moral obligation to STOP and change the path of destruction that we have taken and that continues to lead us to highlight the importance of *real* Multilateralism in our work. This United Nations Multilateralism, urges that we bravely innovate and remove all barriers to open the door of the General Assembly to the long over due inclusion of an Indigenous Ambassador with an equal voice and vote as any other nation to represent the Indigenous Peoples of Mother Earth as the natural guardians of the Law of Origin since time immemorial. This Indigenous Ambassador can be rotated by region as required and will contribute invaluable wisdom to the existential crisis we face and initiate practices that will carry us into a future for our children's children.

The organization hereby Prays that the Heads of State and Government, in a spirit of innovation and cooperation with the Indigenous Peoples of Mother Earth give consideration to the appointment of an Indigenous Ambassador to represent the over 390 million Indigenous Peoples of Mother Earth first requested by International Native Tradition Interchange at the Permanent Forum on Indigenous Issues in the year 2008 and in the First Interactive Dialogue with Indigenous Peoples on Enhanced Participation. Humanity and nature would greatly benefit from our ancestral wisdom and traditional knowledge which must be respected and protected. Our issues should not continue to be negotiated by experts serving in "personal" capacity within the Permanent Forum on Indigenous Issues and other venues on behalf of our Original Nations.

There is a need for comprehensive engagement of the legitimate representation of Indigenous People's traditional authorities at the highest possible level within the General Assembly of the United Nations and in context with the World Conference on Indigenous Peoples on the issue of Participation. The Indigenous Ambassador would also serve to promote and uphold the International Decade of Action Delivery for Sustainable Development and this appointment would fulfill the historical debt with our Indigenous Nations and "Leave no one behind". Furthermore, this action would be a most historical world event for humanity and would grant us a new page to write- a future with a new Sun at this critical time when humanity faces Extinction. The importance of High-Level Indigenous Participation is urgent, as no Peace can exist without knowledge of the natural laws that bind human life to that of nature and which in South America

we refer to as “El Buen Vivir” - “Good Living” which has been practiced since time immemorial by Indigenous Peoples.

Furthermore, we cannot continue to remain entertained by 30 years worth of documents and reports from experts while *we see* a cloud of EXTINCTION sweep over our sky at a faster rate each day! Nor can we continue to allow only the \$science with its God games to be in control of our civilization and prescribe solutions with even worse side effects for our planet - The Science holds large responsibility for the disasters we face and has failed, time and again and it is time for the guardians of Mother Earth to be seated at the table to offer medicine that will heal this sick world. The question is, do we open the door of the General Assembly for the Original Nations- or continue into EXTINCTION?

The organization hereby expresses much gratitude to the Chair of the Commission (Croatia) for the opportunity and remains committed in the long time efforts for Peace on Mother Earth contributing with the international community to find solutions to the most challenging *Time* ever faced by our civilization. Peace can only come in harmony with the natural world. *In the Spirit.*
