

At a glance: Key Results 2022

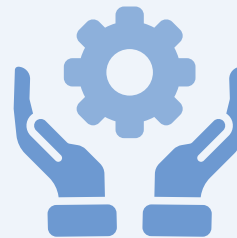

More than  
**\$40 million**  
(25% of total expenditure)  
allocated by PBF funds'  
recipients to **national  
and local CSO  
implementing  
partners.**

Nearly **360,000**  
people participated  
in **peacebuilding  
activities at local  
and national levels,**  
including dialogues,  
consultations, and  
advocacy meetings.

More than  
**5,000** instances  
of conflict or  
violence were  
**resolved  
peacefully.**

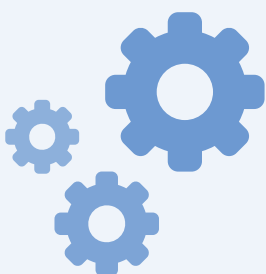

More than  
**66,000 people**  
received **services,**  
including counseling  
and psychosocial support  
services, legal aid and  
formal justice services,  
reintegration, and state  
administrative services.

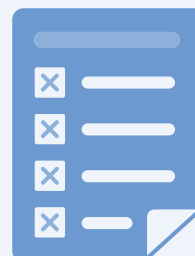

More than  
**123,000**  
people  
received  
**livelihood  
support.**

More than  
**65,000**  
people were  
**trained in** conflict  
prevention,  
management and  
resolution, and  
governance.

More than  
**1,500**  
**mechanisms/  
committees**  
operationalized

Nearly  
**1,000** policies,  
**frameworks**  
and **action plans**  
supported.

## PBF impact examples

The PBF conducts a range of exercises to assess the impact and results of the initiatives it supports. These include independent portfolio evaluations that typically look at the results of PBF support over five-year periods; comparative thematic reviews to capture lessons learned across countries over several years; and pilot initiatives to advance peacebuilding evaluation practice such as 'PeaceFIELD'<sup>1</sup>.

Thinking regionally and acting locally to address climate- and natural resource-related conflict. The PBF's 2023 Thematic Review on Climate, Peace and Security found the Fund has played an important role in facilitating action of countries and the UN to think and collaborate regionally. PBF investments in climate security in the Liptako-Gourma region were able to address root causes and shift the narrative from overly militarized approaches, offering a more regionalized lens to peacebuilding and focusing on peacebuilding approaches that address the needs of vulnerable populations. PBF's support to women's participation in Yemen contributed to both better water management and local dispute resolution even during an ongoing bigger crisis. The Thematic Review concluded that 'bottom-up' peacebuilding around local natural resource issues may be among the most promising areas for peacebuilding, offering entry points to work on other trenchant social issues, such as women's or youth exclusion.

Improving gender-responsive peacebuilding through partnerships with women's organizations. The PBF 2021 Thematic Review on Gender-Responsive Peacebuilding found these partnerships to be vital. They are often a key focus of PBF support, and evidence shows how, for example in Guatemala, PBF support has been instrumental in ensuring that the voices of indigenous women are heard. In Burundi, the portfolio evaluation of the period 2014-2020 captured how PBF-supported women's mediation initiatives formed lasting networks which amplified the impact beyond the project duration.

Building trust and reducing violence through local dialogue initiatives. Portfolio evaluations have identified positive results for example in Madagascar, where PBF-funded community dialogue projects have directly contributed to a significant improvement in peaceful conflict management capacities of local actors and a higher level of trust between youth and law enforcement; and Côte d'Ivoire, where PBF-funded interventions contributed to a decrease in the intensity of conflict in areas with active dialogue frameworks between populations, local administration and security forces.
