3 August 2017

Excellency,

Pursuant to resolution 71/235 and resolution 71/256 and at the request of the Secretary-General, I have the honor to forward herewith an advanced unedited version of the report from the High Level Independent Panel to Assess and Enhance the Effectiveness of UN-Habitat.

The measures contained in the report will be discussed in the High Level Meeting of the General Assembly on the effective implementation of the New Urban Agenda and the positioning of UN-Habitat in this regard, scheduled for 5-6 September. Further details regarding the High Level Meeting can be found at http://www.un.org/pga/71/event-latest/high-level-meeting-on-new-urban-agenda-and-un-habitat/.

Please accept, Excellencies, the assurances of my highest consideration.

Peter Thomson
Seventy-first session
Agenda item 20

Report of the High Level Independent Panel to Assess and Enhance Effectiveness of UN-Habitat

Note by the Secretary-General

The Secretary-General has the honour to transmit to the General Assembly, pursuant to resolution A/RES/71/256, paras 172-173, the report of the High Level Independent Panel to Assess and Enhance the Effectiveness of UN-Habitat.

A/RES/71/256, paras 172-173, requests the Secretary-General to submit to the General Assembly during its seventy-first session an evidence-based and independent assessment of UN-Habitat with recommendations to enhance its effectiveness, efficiency, accountability in its normative and operational mandates; its governance structure; its partnerships; and its financial capability.
Summary

This report, in recognition of the 2030 Agenda and the New Urban Agenda (NUA) and the transformative changes they imply for global development, peace and security, focuses on the critical need for action on pressing sustainable urban issues and the assessment of UN-Habitat as a fit for purpose organisation to deliver on these bold objectives.

The Panel that is responsible for this report was mandated by the General Assembly’s resolution A/RES/71/256, paras 172-173, to undertake an independent, objective, evidence-based review and assessment of UN-Habitat with recommendations to enhance its effectiveness, efficiency, accountability in its normative and operational mandates; its governance structure; its partnerships; and its financial capability. The Panel was encouraged by the Secretary-General to make bold and ambitious recommendations, considering the challenges and opportunities posed by urbanisation, their impact on global development, peace and security and the importance of leaving no one behind.

The Panel acknowledges here the challenges that both UN-Habitat and the wider UN system face, which have compromised the ability to respond nimbly and effectively to rapid global change. It draws attention in particular to the failure within the UN system to adequately acknowledge the pace, scale and implications of urbanisation, the dependence of the 2030 Agenda on the direction of urban development, or the fundamental role played in urban development by local governments and other local actors.

The Panel agrees that UN-Habitat has limitations in accountability, transparency and efficiency, that its resources have been inadequate, insecure and unpredictable, and that the need to chase funds has caused it to stray from its normative mandate. In the Panel’s assessment, the first priority is to save, stabilise and then rapidly strengthen UN-Habitat to equip it for a renewed role based on the 2030 Agenda and the NUA. To support UN-Habitat’s efforts, the Panel also recommends the establishment of UN Urban, an independent coordinating mechanism to convene all UN agencies and partners on urban sustainability.

In response to the challenges, the Panel recommends for UN-Habitat a renewed commitment to the normative mission, with an emphasis on the 2030 Agenda–inspired commitment to leaving no one behind, and with innovative approaches to financing the organisation to support its normative role. It stresses the need for a transformed governance structure that includes universal membership, a small, strong Policy Board and the formal involvement of local authorities/subnational governments and other urban stakeholders to provide input and recommendations. It also recommends stronger more inclusive partnerships generally with representative organisations of local governments and excluded urban groups.

IV. New horizons: Implementing the SDGs and the NUA
   A. The scope of the commitment
   B. The challenges
   C. UN-Habitat’s role: what is clear, what is contested, what needs to be clarified?

V. Updating UN-Habitat’s mandate and capabilities to reflect the new agendas
   A. Implications for UN-Habitat’s mandate
   B. Governance implications
   C. Partnerships implications
   D. Finance implications

VI. Conclusions

VII. Recommendations
I. **Global Context**

A. **Setting the scene**

1. The development world has been slow to respond to urban concerns and to fully appreciate the deeply interdependent relationship between urban areas and their surrounding territories. Because cities and towns have been the major catalysts of economic growth and development, because services and resources are concentrated there, and because of the long-held perception that rural development would prevent migration to urban areas, attention has been focused on the seriousness of rural deprivation. But with the on-going transition to a primarily urban world, the most pressing development challenges globally are increasingly located and amplified in urban areas.

2. The urban transformation is not just a challenge; it is also a once-in-a-lifetime opportunity. The high population density of urban areas can make towns and cities more ecologically sustainable, more socially inclusive and culturally diverse than rural settlements. The proximity of local governments to their populations make urban areas ideal sites of citizen participation and democratic governance, as many local governments and communities around the world are already demonstrating through innovative initiatives that promote the co-creation of cities. There is also an encouraging proliferation of sustainability-oriented ‘experiments’ in urban settlements and territories across the world.

3. To realise the potential, however, the challenges cannot be ignored. Urban populations continue to grow in much of the world, poverty and humanitarian crises and conflict are becoming increasingly urban phenomena, and the urban risks from climate change are intensifying. Concerted efforts, global, national and local, in both developed and developing countries, are urgently needed to address current challenges, alleviate increasing inequalities, and anticipate future threats. The 2030 Agenda for Sustainable Development (encompassing the Sustainable Development Goals, the Paris Agreement on Climate Change, the Sendai Framework for Disaster Risk Reduction and the Addis Ababa Conference on Financing for Development) will not be met without serious attention to urban realities. The New Urban Agenda provides a roadmap for this on-going transition, and UN-Habitat, with the entire UN development system, has a potentially critical role in supporting countries to effectively implement this Agenda.

4. Projections suggest that in thirty years, two thirds of the world’s population will live in urban areas. Urban growth rates have started to level out in much of the world, but continue very high in much of Africa and Asia, where 90 percent of the projected increase will occur, and where resources are most constrained and development challenges most intense. Rural-to-urban migration plays a large role, much of it to small and medium-sized towns and cities and the expanding peripheries of cities, often with unclear or overlapping administrative jurisdictions. The reality of highly mobile concentrations of people in areas not classically considered urban cannot be overlooked. A hard rural-urban dichotomy, in fact, has diminishing relevance, and territorial approaches do greater justice to the complex continuum of rural to urban, although they also present new challenges to planning and land tenure regimes.

5. The urban transition is essential to economic growth. Yet this basic reality is still unrecognised by many major actors, from national governments to international institutions, resulting in policies that limit migration in an attempt to slow urbanisation and restrict the access of local urban governments to development financing. Despite the restrictions, urban migration continues, and in the absence of inclusive and supportive policies and investment, this means limited opportunity
for hard pressed new residents, growing backlogs in provision of services, increasing informality and the disappearance for many residents of the vaunted “urban advantage”. In many countries, for example, while rural child mortality rates are improving, in urban areas they are stagnating or becoming worse.iii Poverty, hunger, disease, vulnerability to disaster, violence, are all becoming increasingly prevalent in many urban areas.iii The urban transition will be more or less complete in fifty years.iv If it is not steered constructively now, the urban dividend could in many more places become a disaster marked by inequality, exclusion, inadequate basic service provision, humanitarian crises and growing civil strife.

6. Formal figures show the urban share of global poverty rising, while the share and absolute number of those in rural poverty declines.v There is no reliable assessment of the numbers in urban poverty, however – those who face serious deprivation tend to remain uncounted. Informal settlements are often excluded from censuses and surveys; poverty lines do not take account of the higher cost of urban living; and assessments of poverty usually rely on averages, which can be deceptive in urban areas where disparities are high and where concentrations of wealth mask the true depth of poverty.vi

7. A third of the urban population is estimated to live in slums and informal settlements, often without access to proper housing, infrastructure or services. In Africa, it is closer to 60 or 70 percent. The proportion is declining in some countries, but absolute numbers continue to rise.vii Unable to afford the formal land or rental market, many urban residents have no option but to live in these unauthorised settlements, often lacking legal property rights, the benefits of citizenship, access to credit, insurance, the rule of law and even the vote. They may also face the threat of eviction often without warning, recourse or alternatives for relocation. Many more cope with chronic insecurity.viii Informal solutions are basic to the survival of the urban poor. But these solutions, intrinsic to urban development in most of the world, can end up perpetuating and deepening poverty and inequality. Ever growing numbers are locked into these informal solutions, which act as a brake on a sustainable urban future.ix

8. The challenges in poor urban settlements are intensified in many areas by the mounting hazards associated with extreme weather.xv Cities, with their concentrations of population and assets, face high levels of risk, especially in coastal or riverside locations. Urban economies of scale and proximity can give cities a strong adaptive capacity, but the benefits seldom extend to all parts of a city. Informal settlements are often in the most hazardous locations – flood plains, hillsides at risk of landslides, sites close to industrial wastes – and unserved by the protective infrastructure that allows people to withstand extreme conditions – roads, drains, early warning systems and emergency services. Residents in poverty also have more limited capacity to prepare for, withstand and recover from a range of weather extremes.xvi These same extremes, along with conflict, are pushing more people into towns and cities. By 2016, 80 million people globally were displaced by conflicts and disasters.xvii Numbers keep climbing, and more than half end up now in towns and cities, adding to the burdens faced by overtaxed local authorities. Full blown conflict, often over access to land and scarce urban resources, has also become an increasingly common feature of urban areas, contributing to the emergence of the new category of the “fragile city.”xviii

9. Decentralisation has moved many basic government responsibilities to the local level. Yet these mandated and growing responsibilities are seldom accompanied by the resources that are necessary to meet them.xix Even in the absence of resources and of more generally redistributive policies, however, local governments have the most critical role to play in addressing the growing challenges – through, among other things, equitable land management systems, regulations that do not discriminate against the informal solutions of the poor, a commitment to inclusive service
provision, and a willingness to engage with the self-help strategies of organised groups of the urban poor.\textsuperscript{xv}

10. Although there is a critical need for national governments and the development assistance world to provide more support to local governments, also crucial is bridging the divide between these local actors and the larger global decision-making structures. The resources for financing development increasingly go beyond multi-lateral and bilateral aid to include domestic resources and international private sector funding outside the UN’s influence or purview.\textsuperscript{xvi} The UN can play a role, however, in advocating for predictable, adequate, sustainable financing for development and the effective use of resources. Through advocacy and partnerships, the UN also can help mitigate the unintended consequences of major infrastructure projects which can, for instance, include upheaval and impoverishment for many households that can persist through generations, because safeguards were not observed.

B. The call for action: The 2030 agenda and the New Urban Agenda

11. Recognising the critical need for action on pressing urban issues, government representatives at the Habitat III conference in Quito in 2016 adopted the New Urban Agenda (NUA), emphasising the links between urbanisation and development and the crucial need for inclusive and sustainable urban growth. The ambitious 2030 Agenda, adopted a year before the NUA, provides a critical overarching roadmap for this effort. Its 17 Sustainable Development Goals (SDGs), designed for stimulating action in areas critical for humanity and the planet, include Goal 11 – making cities and human settlements inclusive, safe, resilient and sustainable. Without attention to this urban Goal, and to the urban implications of the other 16 Goals, none of the SDGs is likely to succeed. Together the NUA and SDGs point the way for cities to be part of sustainable global development. Equally important in this endeavour are the Paris Climate Change Agreement, the Sendai Framework for Disaster Risk Reduction and the Addis Ababa Action Agenda.

12. To ensure the capacity of the UN system to meet the challenges of the 2030 Agenda, along with the NUA, the UN Secretary General has initiated a system-wide review of the functions and capacities of the United Nations Development System (UNDS), which must of necessity give close attention to the urban implications of the new agendas, and the capacity and commitment of the larger system to address them. UN-Habitat, as one of the important actors in this effort, has a key role in the coming years, but one that needs to be clarified and strengthened.

13. To support the 2030 Agenda, the UN Development System must integrate a transversal urban perspective in all the goals. In addition to advocating for the potential of cities to achieve development ambitions, UN-Habitat needs to contribute to the global normative framework, policies and standards for urban development, guided by intergovernmental processes that bring in key urban stakeholders, including local governments, the private sector and urban poor groups, as well as to support the mainstreaming of urban development and urbanisation throughout all UN system efforts.

14. It will also be essential to address the fact that the current funding for UN-Habitat is inadequate to meet the agency’s needs and that the financing of urban development globally needs to be transformed. Most of the current investment into urban areas comes from the private sector and corporate interests.\textsuperscript{xvii} The UN Development System has to move beyond a focus on intergovernmental transfers to one that ensures that all international and national investment – public and private – is subject to democratic oversight, protects the commons and respects human rights, and is aligned with the 2030 Agenda for Sustainable Development and the Sustainable Development Goals.
II. The background for this assessment

15. In response to the General Assembly’s resolution A/RES/71/256, paras 172-173, the Panel responsible for this report was established to undertake an independent, objective, evidence-based review and assessment of UN-Habitat and to make recommendations to enhance the effectiveness, efficiency, accountability and oversight of the agency in four specific areas of mandate, governance, partnerships and financial capacity. This assessment coincides with the Secretary-General’s own system-wide review, and the Panel hopes that this report will complement and feed into this wider review.

16. The Secretary-General, in a meeting with the Panel, encouraged bold and ambitious recommendations, considering the challenges and opportunities posed by urbanisation, their impact on global development, peace and security and the importance of leaving no one behind.

17. During the review period, from April to the end of July 2017, the Panel, as charged, assessed the following:
   - The normative and operational mandates of UN-Habitat
   - Its governance structure, its capacity for more effective, accountable and transparent decision-making, and potential alternatives
   - Its work within the UN System, as well as with national, subnational and local governments and relevant stakeholders, to tap the full potential of its partnerships
   - The financial capability and constraints of UN-Habitat

18. The Panel has considered both the evolution of UN-Habitat, and the broader context of the UN System. It has conducted broad consultations with Member States and different actors and stakeholders in order to provide recommendations to enhance the agency’s effectiveness, efficiency, accountability and oversight to support achievement of the NUA and Agenda 2030, including the SDGs. This independent assessment report was prepared in accordance with General Assembly Resolution A/RES/71/235 of the 71st session on the Implementation of the Outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat). The report is to be submitted to the General Assembly during its 71st session in September 2017.

19. The report also drew on a literature review, field trips, interviews and Panel discussions and analysis. Consultations and workshops held during the process included representatives of UN-Habitat’s Governing Council (GC); Committee of Permanent Representatives (CPR); Executive Director and senior management of UN-Habitat; key partners in multilateral organisations; associations of local authorities and regional governments; urban economists; youth and women’s groups; and other relevant stakeholders. The Panel also consulted representatives of multiple UN agencies and specialised bodies such as the World Bank institutions (see Annex II). A questionnaire was also sent out to Member States, urban experts, UN agencies, civil society organisations, academic institutions and other actors/stakeholders. There was little response from UN agencies, but significant participation of Member States, urban experts and civil society groups (see Annex III). Given the short time available for its work, the Panel also relied on evidence from previous evaluations and assessments, (Annex VIII). Discussions reflected in addition the perspectives of the extended networks and associations of Panel members. With close consideration to different opinions and perspectives, the report reflects the consensus views of the Panel.
20. In Section III, this report outlines the Panel’s assessment of the current situation of UN-Habitat; in Section IV, the new imperatives introduced by the SDGs and NUA; and finally, in Section V, the implications for UN Habitat, and the Panel’s recommendations for the organisation.

III. Overview on UN-Habitat

A. History and role within the UN system

21. UN-Habitat is a non-resident agency of the United Nations, established in 1978, with headquarters in Nairobi. It has four regional offices (Africa in Nairobi; the Arab States in Cairo; Asia and the Pacific in Fukuoka; Latin America and the Caribbean in Rio de Janeiro), five liaison and information offices (New York, Geneva, Brussels, Madrid, Moscow and Beijing) and 55 country offices. It is present in 63 countries through its Technical Cooperation Programme and UN-Habitat Foundation Special Purpose activities. UN-Habitat plays both a normative and operational role globally. The distinction between these roles will be more fully discussed below.

The organisation focuses its work on four priority areas:
- Urban legislation, land and governance
- Urban planning and design
- Urban economy and municipal finance
- Urban basic services

22. It is also active in risk reduction, rehabilitation and resilience building; housing and slum upgrading; and research and capacity development. Cross-cutting issues are also indicated in its plan: gender equality, youth development, climate change, and human rights. UN-Habitat’s evolving mandate has emanated from the three Habitat Conferences since 1976:

23. **Habitat I – Vancouver**: In 1976, the magnitude and consequences of rapid urbanisation were recognised in the Vancouver Declaration on Human Settlements, and following recommendations made there, the Commission on Human Settlements and the United Nations Centre for Human Settlements (UNCHS Habitat) were first established, and together became UN-Habitat in 1978. Action plans were recommended in the areas of settlements policies and strategies, settlements planning, shelter, infrastructure and services, land and public participation.

24. **Habitat II – Istanbul**: In 1996, the Istanbul Declaration on Human Settlements and the Habitat Agenda elaborated on conference objectives, defining a mandate for UN-Habitat – adequate shelter for all, sustainable equitable human settlements development, the eradication of poverty, economic and social development, environmental protection, with respect for human rights and fundamental freedoms. UN Habitat’s was subsequently strengthened into a programme in 2002 – the UN Human Settlements Programme.

25. **Habitat III – Quito**: In 2016, sustainable urbanisation was placed firmly on the agenda when the NUA was adopted as the outcome document of Habitat III. This has been seen as a historic opportunity to leverage the key role of cities and human settlements as drivers of sustainable development in an increasingly urbanised world. One recommendation was to strengthen the role of UN-Habitat as one of the focal points for the implementation of the NUA.

26. Although UN-Habitat is acknowledged for many competencies, the Panel recognises that there is a concern among Member States and partners that, in its current state and with its existing
capacities, UN-Habitat is unable to respond adequately to the immense challenges presented by the dramatic transformation of human settlements around the world, including rapid urbanisation and increased global interconnectedness. It is vital that both UN-Habitat and the wider UN system are fit for purpose if the far-reaching objectives set by the SDGs and the NUA are to be achieved. This report aims to determine how UN-Habitat can best be supported and revitalised to take on an effective role in contributing to the achievement of these ambitious agendas.

B. UN-Habitat’s work and the tensions between its normative vs operational roles

27. UN-Habitat, as noted, plays both a normative and an operational role. While there are areas of overlap, normative work applies to the sphere of norms, policies, standards, and frameworks, while operational work refers to the tangible, technical projects on the ground, undertaken ideally with reference to those normative guidelines. UN-Habitat’s strategic priority areas involve of necessity both normative and operational competence, and in order to meet its objectives, it needs to work simultaneously at both policy and technical levels. Its ‘three legged’ approach involves legal (rules and regulations), economic (financial planning) and urban design aspects. UN-Habitat’s Enhanced Normative and Operational Framework\textsuperscript{xxiii} focuses on providing a bridge between its normative and operational work, integrating policy and programming, and ensuring that work on the ground feeds into a larger shared vision. In fact, though, the organisation’s operational work often has little relevance to its normative mission.

28. UN-Habitat’s normative activities generally take the form of training programmes, policy guidance, promotion of good urban management governance and the compilation of research and data on global trends in urban and human settlements.\textsuperscript{xxiv} In theory, this normative work takes precedence over operational projects. But UN-Habitat’s technical cooperation activities are much sought after by donors and governments, and maintaining a complementary balance between these activities and the normative work has been problematic. The Secretary-General’s report on UN reform\textsuperscript{xxv} refers to this as a system-wide UN challenge, in part due to the funding approaches of member governments and other partners. Several discussions of the issue and its implications for the new development agenda are currently taking place.\textsuperscript{xxvi}

29. Broadly, UN-Habitat’s normative work is supported by non-earmarked core funding while operational work, typically including field projects, is supported by technical cooperation funds and special purpose funds, by far the greater part of the budget.\textsuperscript{xxvii} While both normative and operational outputs are expected, target proportions are not established.\textsuperscript{xxviii} Both UN-Habitat staff and other stakeholders, however, indicate that far more operational than normative work is actually taking place,\textsuperscript{xxix} a fact supported by the disproportion in budget allocations. Decreasing core funding has left UN-Habitat little choice but to solicit operational work beyond the UN, affecting its capacity to focus on strategic priorities and normative work.\textsuperscript{xxx} Many highly valued projects are donor-driven technical cooperation projects that do not promote scalability and therefore also weaken the normative mandates of UN-Habitat. Despite their investment in these projects, many Member States are concerned by the dearth of normative work, and do not like to see the organisation acting like a consulting agency\textsuperscript{xxxi}, driven by interests that may not be aligned with the strategic guidance of UN-Habitat’s Governing Council. Panel members registered a clear sense from stakeholders that UN-Habitat needs to strengthen its normative role and ensure that operational work informs the normative agenda.

30. There is also a concern that results and lessons learnt at the operational level are not feeding as intended into the normative work, and that UN-Habitat has a challenge scaling-up pilot projects into normative outputs.\textsuperscript{xxxi} Finally there is the danger that operational work unlinked to normative objectives may undermine normative aims. Large operational development projects, for instance,
may corner funding that might otherwise support more local groups, limiting their input into
decisions that affect their lives – thus hampering the normative orientation towards local
engagement.

C. Governance structure and management

31. UN-Habitat is governed by three main bodies: a Governing Council (GC) of 58 Member States
that decide on overall policy and strategy, the Committee of Permanent Representatives (CPR),
composed of 94 Member States accredited to UN-Habitat, and a Secretariat, which deals with day
to day management, and includes a team from the Executive Director’s Office. The Panel finds
this structure will need to be enhanced to ensure proper oversight by Member States, with clear
division of responsibilities and accountability, and the capacity for timely and responsive
decision-making and action.

32. There are several reasons for its shortcomings. The GC provides overall direction, but it meets
only every two years and has limited capacity to respond to concerns as they arise. The CPR
meets four times a year and it monitors and reviews GC resolutions, but has no decision making
power. Its oversight role was recently strengthened with the formal establishment in 2015 of the
Working Group on programme and budget, in accordance with GC resolution 25/7 on UN-
Habitat governance reform. This 15 member group provides oversight, reviews budgets, work
programme and audits, and reports to both the CPR and the GC. Even with this extended
oversight, however, there are concerns that the CPR’s lack of authority, and the participation of
members not also on the GC, leads to bottlenecks and inefficiency, and that in effect the GC and
CPR together offer limited feedback on strategic and substantive issues.

33. The Secretariat, as executive organ of UN-Habitat, translates the GC’s decisions into strategies,
programmes and initiatives, which it manages and monitors, and provides strategic
recommendations. While the General Assembly approves regular budget allocations and the GC
approves general purpose budget allocations, special purpose budget and technical cooperation
contributions are approved by the Executive Director. This has been problematic given the
changing nature of UN-Habitat’s funding, with its increasing reliance on technical funds. It
means that most of the budget does not come under the oversight of the governing bodies that
include Member States, leading to questions about accountability and strained trust between
Member States and the Secretariat. This is compounded by the fact that project reporting for
operational projects is limited to client countries, so that information submitted to the GC does
not include full details on performance.

34. There have been several discussions in recent years on the need for an internal reform of UN-
Habitat, but no agreement has been reached among Member States. Taking into account the
governance challenges identified during the Governance Review of the CPR and UN-Habitat
Secretariat (HSP/GC/22/2/Add.3, HSP/GC/23/INF/7). The Panel agrees that the current
governance model suffers from systemic problems that affect its accountability,
transparency, efficiency and effectiveness.

D. Partnerships

35. UN-Habitat’s strategic partnerships include political actors, civil society, professional
organisations and the private sector, both as advocates of sustainable urbanisation and as
implementers and monitors of national urban policies and programmes (see ANNEX VII for a
full list). There are good reviews from many Member States and stakeholders on UN-Habitat’s
success in mobilising partners. Reviews are less positive on efforts to incorporate partners’ voices into policy design and operational activities.

36. UN-Habitat also has representational presence in several countries, through regional offices, liaison and information offices and country offices. It works with different partners, UN and non-UN, government and non-government. Habitat Agenda Partners (HAP) includes a range of organisations outside central government, and the UN-Habitat has established a number of thematic networks composed of a cross section of these HAPs. Other key collective partners include the Global Urban Observatory, the General Assembly of Partners, the partners that attend the biennial World Urban Forum and the World Urban Campaign.xxxiii

37. Several UN agencies work on urban issues and urban development, and each of these has its own established partnerships (Annex VI) that could potentially be directly or indirectly integrated into work on urban issues. Similarly, UN-Habitat works in many areas where other UN agencies, as well as external actors, have specific competences. For example, on public health issues related to urban areas (WHO); urban land and food security related issues that arise with urban expansion (FAO, WB, SDI, CSO); pollution, circular economy and sustainable consumption and production, sustainable built environment, climate adaptation and mitigation, specific projects on coastal cities (UN Environment); children in urban settings (UNICEF); urbanisation of refugee camps, rural to informal migration and temporary to permanent refugee settlements in cities (UNHCR); urban migration (IOM); Safe Cities (UNODC, UNWomen); HIV/AIDS in cities (UNAIDS); decentralisation and local governance and affordable housing policies (UNDP); municipal finance capacity-building and decentralisation of national and international funds to cities (UNCDF), among others. However, there are no current institutional mechanisms to coordinate the work with other agencies to avoid duplication, increase efficiency, or enhance policy integration.

E. Financial capacity

38. As noted in the SG’s report on the reform of the development system, core funding allocated to the UN system has “declined over the past ten years and continues to decrease” (para 112), and this is affecting the entire family of UN institutions.xxxiv This is most painfully evident in the case of UN-Habitat, and it has implications for the nature of the organisation’s work and for its credibility. UN-Habitat has three sources of funding: UN regular budget allocations, UN-Habitat and Human Settlements Foundation contributions, and technical cooperation contributions. Regular budget funding and foundation general purpose funding have been steadily decreasing (about 7 percent of budget in 2016, or 11.5 percent if overhead is included), and UN-Habitat has had to increase its reliance on its technical cooperation portfolio and its foundation special purpose funding, which together amounted to over 88 per cent of overall funding in 2016.xxxv

39. This trend towards a reliance on operational funding has, as noted, some major impacts. It affects the capacity of UN-Habitat to focus on strategic priorities and its normative work, and has raised concerns from some Member States, as noted, that UN-Habitat is becoming more like a consulting agency, harming its global and regional role in norms and standards setting and policy development. Fund mobilisation tends to be donor-driven, taking a practical path that does not encourage predictable and sustainable funding, and that leads to programmes that may not be in line with mandates.xxxvi The trend also affects accountability. Because the GC and CPR lack control and full oversight over the technical cooperation budget, there is, as noted, a lack of trust and growing tensions around the control and monitoring of UN-Habitat’s funding and activities. Cuts in financing have been linked directly to this issue by some donors. It is, as some Panel members have pointed out, a self-perpetuating chicken-and-egg process. As the organisation
strays further from its mandate, it loses the trust of its funding sources. This in turn pushes it to rely more on the very work that discredits it. Donors have signaled that they will link their level of engagement with UN-Habitat with forthcoming governance reforms.

F. Assessed strengths and weaknesses

40. UN-Habitat has been recognised over the years for its work on local governance, decentralisation, sustainable urbanisation and human settlements through its enhancement of urban-rural linkages, its expertise in urban policies and frameworks, its mobilisation of partners, its work with local governments and local stakeholders, and its pro-poor movement and work with marginalised groups. In its resolutions 69/226 and 70/210, however, the General Assembly has recognised that the responsibilities of UN-Habitat have changed considerably in scope and complexity. The Panel observes that UN-Habitat is having little impact on the UN development system, and is seen by many of the stakeholders interviewed by Panel members as too weak an organisation to fully meet its mandate and act on its potential.

41. The Panel acknowledges the challenges that UN-Habitat and the wider UN system face, and that these challenges have compromised the ability to respond nimbly and effectively to rapid global change. It agrees that UN-Habitat has limitations in accountability, transparency and efficiency, and that its resources have been inadequate, insecure and unpredictable, with implications for the capacity to meet its evolving mandate. Its mix of operational and normative functions, often not linked, is also a challenge, and the need to chase funds has undermined its mandated responsibility to take a normative lead.

42. The present moment, in which the SDGs are being monitored and the Paris Agreement and New Urban Agenda have come into force, creates an unprecedented window of opportunity to integrate an urban perspective across the UN system and to strengthen the leadership and legitimacy of UN-Habitat so it can fulfil its mandate and address the transversal nature of the New Urban Agenda and the far reaching and universal ideals of the SDGs. Recognising that UN-Habitat has a focal role in addressing sustainable urbanisation, but faces challenges that compromise its capacity to respond effectively, the Panel recommends that the first priority must be to save, stabilise and then rapidly strengthen UN-Habitat to equip it for a renewed role based on the 2030 Agenda and the NUA.

IV. New horizons: Implementing the SDGs and the NUA

A. The scope of the commitment

43. The Sustainable Development Goals of Agenda 2030, endorsed by national governments in September 2015 at the United Nations Summit, represent an ambitious, transformative global framework for sustainable development, social, economic and environmental, with a primary commitment to “leaving no-one behind”. The Secretary General’s recent report stresses the bold, paradigm-shifting nature of this Agenda, and the need for the UN system to ready itself in equally bold ways to support it.

44. Yet the Secretary General’s report makes virtually no reference to urban areas, and to the very specific work that will be involved on this front. This failure to reference the urban context as a significant aspect of the larger task reflects a more general failure within the UN system and the development assistance enterprise to recognise the extent and the implications of the urban challenge. It is also evident within the text of Agenda 2030, which focuses explicit attention to
urban concerns in only one of its 17 Goals (SDG 11, which calls for making cities and human settlements inclusive, safe, resilient and sustainable).

45. Yet urban areas, with their growing majority of the global population, their concentration of both economic risk and potential, their vulnerability to climate-related disasters, and their relationships with surrounding areas, are not only relevant to realising this Agenda, they are central to its success, and the stage on which the SDGs will or will not be achieved. Most of the Goals necessarily have urban implications, and without significant attention to urban realities in all their manifestations and complexity, the ambitious objectives of the SDGs cannot be realised.

46. Agenda 2030 recognises the extent to which achieving these objectives can be undermined by the hardening of exclusion around the world. The SDGs include many far-reaching political goals and targets regarding inclusion, empowerment, and equality, and they stress the elimination of extreme poverty and hunger, the reduction of all poverty as part of ‘leaving no-one behind.’ Much of the exclusion in question is closely tied to the global resistance to urbanisation.xxxvii

47. The SDGs are clear on what needs to be achieved, but not on how or by whom. Meeting the Agenda 2030 objectives will be to a large extent the aggregation of local achievements, requiring the efforts of effective, accountable, well financed local governments, along with private enterprises, civil society and communities, yet these are generally overlooked. This lack of attention is reflected in the language of the SDGs, which emphasises primarily the tasks of countries rather than municipalities. These global goals and targets need to be translated into frameworks that support local actors, and there is a critical need for better understanding, and support and funding for local action.

48. The many SDGs that can be substantially realised by good local governance and urban policies form the basis for the New Urban Agenda (NUA), adopted as the outcome document of Habitat III a year after Agenda 2030 was adopted. Although it builds on the SDGs, the NUA also reaffirms the General Assembly resolutions dating as far back as 1970 (51/177, 56/206, 67/216, 68/239, 69/226, 31/109). The NUA, in practical terms, aims to operationalise the SDG urban goal and the urban implications of all the SDGs. While the NUA acknowledges the importance of local actors, it is a national government agenda, and national governments need to comply, addressing the implications for local action in order for local actors to be empowered.

49. In short, the transformative and inclusive goals of the SDGs and the NUA are clear. Less evident in both Agendas is the means by which they can be realised, especially in urban areas at the local level. There are some distinct challenges in this regard.

B. The challenges

50. An initial conceptual challenge is the definition of urban, which varies from country to country. The Panel calls explicitly for a conceptual shift to a more territorial approach, focusing on metropolitan regions, including the cities, towns, peripheral areas and villages that they contain. Small towns beyond metropolitan regions, where much rapid growth is occurring, must also be included as a critical part of the urban reality, along with rural-urban links, so the broader human settlements focus remains. This more territorial frame avoids the over-simplification of the rural-urban dichotomy and the risk of positioning cities and rural areas in opposition to one another, in competition for scarce development resources. It emphasises links, and acknowledges that the issues affecting local people go way beyond local areas, and solutions require the coordinated attention of different governance levels and multiple actors. xxxviii
51. Within the UN system, as noted, there is not a full acknowledgement of the pace, scale and implications of urbanisation, which remains a niche issue in the development discourse. This is true also for many Member States, which still lack national policies that accept the reality and the potential of urbanisation, and development strategies that take into account the complex continuum of urban realities. Many countries have weak, under-financed urban ministries, if they have them at all, and most of their ministers focus still on rural concerns. Attention to rural is justified, but these countries are poorly prepared to cope with current and future challenge of urbanisation. Achieving the objectives of the SDGs and NUA requires that they align their legislative and institutional realities with their commitments.

52. Beyond the need to accept the central importance of urban realities, is the failure to focus on the essential contribution of local and sub-national government in addressing development challenges. This gap between global commitments and local agendas will have to be bridged for successful implementation by all partners. This will require renewed attention to decentralisation and multi-level governance, and in many places the strengthening of institutional capacity, which can be especially weak in under-resourced local governments.

53. Also neglected has been the role of civil society. The language of inclusion in the new agendas is a start. But it is also important to distinguish between participation as a project deliverable, and the genuine partnership that inclusion implies. Many urban poor groups have been effectively working with local government partners to tackle their basic needs for secure housing, adequate provision and decent livelihoods. Their attention to the challenges of informality, and especially the treatment of eviction, are critical, as is their empowerment of women. Many are well represented nationally and even globally by networks and federations that link their organisations within cities and beyond, powerful political voices for their members, facilitating their inclusion and their contribution. To ignore the resourcefulness, expertise and deep experience they can bring to the table is unrealistic, given the scale of the challenge.

54. Considerable resources will be needed, both for building the capacity of institutional actors to manage their responsibilities, but also for meeting the large and growing shortfalls globally with regard to the most basic needs of urban residents. The necessary resources are far greater than can be met by development assistance bilaterally and the UN system, and in addition to a rethinking of the aid architecture, flows of both private and public investment will have to be tapped and coordinated.

55. Another area not adequately reflected in these agendas is the growing manifestation of humanitarian crises and emergency situations in urban areas. These have profound effects for the development agenda, given the destruction of infrastructure that can be involved and the large numbers of refugees and displaced people who are increasingly heading to urban areas, contributing to the growing burden for local governments and to the risk of xenophobic responses from other urban dwellers. As noted in the Secretary-General’s report, this calls for a rethinking of the traditional separation of development from humanitarian work.

56. The extensive capacity to support Member States in achieving the SDG goals, and the expertise to tackle the institutional and financial architecture underpinning this support, is spread over multiple UN agencies and organisations. The NUA is a transversal agenda that requires urban attention to be integrated into every UN agency’s work, with systems and approaches in place to measure and track progress. The Secretary-General report points out, however, the major risk of inefficient overlaps (para 48). The task of ensuring the mainstreaming of NUA implementation throughout the UN system is a large one, and arguably not one that aligns well with the advocacy and normative work that UN-Habitat needs to undertake.
57. Meanwhile, it is a challenge to focus on specific recommendations for UN-Habitat if the UN system itself is not prepared to address urbanisation as a phenomenon that is going to affect all of its agendas. This is a recipe for the continued marginalisation of the organisation and its mandate. Despite the Secretary General’s call for bold recommendations by the Panel, this limitation must be acknowledged. Given that the reform of the larger UN system is still a situation in flux, the Panel acknowledges how critical it is that UN-Habitat have an agile capacity for flexibility and for identifying and seizing opportunities as they arise.

C. UN-Habitat’s role: what is clear, what is contested, what needs to be clarified?

58. UN-Habitat is nominally the representative within the UN system for sustainable urbanisation. There are divergent views, however, on the role it should take with regard to the NUA and the urban implications of the SDGs. It is a small body on the margins of the UN system, and its budget and capacity do not come close to meeting the scope of its mandate. Nor, in the minds of most of the stakeholders the Panel spoke with and surveyed, does it have the strength or credibility to take a lead role in this regard.

59. Some Member States do believe that UN-Habitat should have a prominent role and lead the implementation of the NUA. But most of the countries that responded to the Panel’s survey are strongly of the opinion that the implementation of the NUA cannot be the mandate of a single organisation, and that it will require effective collaboration between different UN entities and relevant stakeholders, drawing on the expertise of each.

60. The Panel found value in the NUA statement regarding “the importance of UN-Habitat’s role within the UN System as a focal point on sustainable urbanisation and human settlements, including in the implementation, follow-up and review of the NUA, in collaboration with other UN system entities” (para 171). The NUA urges UN-Habitat to continue developing normative knowledge and providing capacity development and tools to national, subnational, and local governments in designing, planning, and managing sustainable urban development (para 129). Along with other UN programmes and agencies, it is encouraged to generate evidence-based and practical guidance for the implementation of the new agendas (para 128). UN-Habitat is also mandated by the NUA to coordinate the quadrennial report on its implementation, in close collaboration with other relevant entities of the UN system (para 168).

61. The Panel, taking various views and directives into account, recognises that the UN system has yet to define a strategy or mechanism on how different UN entities will address the implementation of the NUA, and the urban implications of the 2030 Agenda, and SDG11 specifically. It also has broader concerns about the more general strategy within the development system for addressing urbanisation. Until a clearer mechanism is defined, the Panel feels that UN-Habitat is the appropriate UN entity to play an advocacy role around the importance of urban issues and the significance of the local agenda, within and outside the organisation, and to expand and refine its normative work in these regards. In this capacity, it would assist and support Member States, UN agencies and other stakeholders to integrate the NUA and urban aspects of the SDGs into their development operations as appropriate, providing guidance and tools for strengthening urban work at the country level.

62. In particular, the Panel sees UN-Habitat taking a leadership role in two specific areas. The first involves work on urban planning, legislation, norms and standards, and on national urban policy, including attention to decentralisation, governance and capacity building. The second is the area
of urban equity, addressing vulnerabilities and exclusion, and ensuring that informal settlements and their implications are fully recognised and addressed.

63. These two areas are closely related. Urban equity and the issue of informality have to be dealt with through policies, and appropriate planning and standards. At the same time, policy, planning and standard setting must be informed by prevailing realities, including the extent of informality and exclusion, and the changes that are anticipated in urban areas. Addressing informal settlements, and accepting an expanded definition of urban, both have major implications for planning norms, land tenure regimes and access to basic amenities. Regardless of the commitment to inclusion, people can continue to be left behind by policies and planning that do not work for them.

64. Given that the Panel seeks a larger role for urban locales in the fulfillment of the SDGs and NUA (as well as other agreements), it recognises the need for support beyond the functions it envisions for UN-Habitat. It urges the formation of a new UN coordinating mechanism to perform the work of coordinating all the partners involved, and encouraging their involvement in the necessary transition to a development focus that recognises the work to be accomplished in urban locations. The establishment of such a mechanism would create the space for UN-Habitat to focus on and refine its normative mission, emphasising the central SDG and NUA mandate to “leave no-one behind”. The Panel proposes that UN Urban be established as a coordinating mechanism similar to UN-Water or UN-Energy, as part of the system-wide UN reform, with a small secretariat based in DESA in New York.

65. UN Urban, as a committee of agencies for all UN actors, funds and programmes, would ensure that the UN system in its entirety is addressing urban issues and implementing the NUA. It would provide a platform for the UN to operationalise the SDGs within the urban setting, addressing the cross-cutting nature of urban development, and bringing coherence to activities and commitments, with the various entities drawing on their particular strengths and avoiding duplication. UN Urban would enhance the urban operational work of the UN system and, the Panel believes, would in turn enhance UN-Habitat’s work. A similar model to UN Urban is that of UN Energy and UN Water, which include all UN agencies with related operational activities as equal members. The Panel appreciates this model also for its inclusion of stakeholders in addition to UN agencies as partners. These stakeholder partners in the case of UN Urban could include representatives of international organisations, professional unions, associations or other civil-society groups that are actively involved in urban development and that have the capacity and willingness to contribute tangibly to the work of UN Urban. UN-Habitat, playing its normative role, and UN Urban would together bring agencies to the table, making it possible for inter-sectoral and transversal conversations to take place. UN Urban, although an entity independent of UN-Habitat, would coordinate with UN-Habitat’s governance structure.

V. Updating UN-Habitat’s mandate and capabilities to reflect the new agendas

66. Responding to the NUA and the 2030 Agenda means that UN-Habitat must redirect its focus toward one of the most critical global challenges in human history, the transition from a primarily rural to an urban existence for humankind. Because of this stunning shift in mission, UN-Habitat needs to be engaged at the highest, universal levels of the UN. The transition involves all countries, developed and developing, in every region of the world.
67. Urbanisation moreover has the potential, as noted, to address many of the SDG’s primary goals. With strong governance, sustainable cities can simultaneously address development, poverty, social isolation, economic opportunity, mobility, services, housing, health, and of course climate change. Urban proximities of scale and economic agglomeration, provide a huge potential for policies and programs that can generate multiple benefits, and that should engage the interest and involvement of the full range of Member States. This involves not only a redefined mandate, but a new governance structure that can support new levels of engagement, and financing strategies that can provide UN-Habitat with the scope to respond to its expanded mandate.

A. Implications for UN-Habitat’s mandate

68. It has emerged clearly in the work of the Panel that the current imbalance between normative and operational activities in UN-Habitat’s work is not viable, and that normative work should take precedence. All are agreed that operational work can be strategic in terms of realising a normative mission. But much of the operational work currently dominating UN-Habitat’s activities is not driven by a larger vision, but by the need to respond to supply-driven opportunities as a source of revenue. It is not just a matter of correcting the ratio of operational and normative work, but of ensuring that the two are linked and that the normative mission drives all activities, regardless of the ratio. The challenge is to guarantee that UN-Habitat is not pushed to take on projects that do not align with its larger mandate. The Panel recommends that all operational work have a clear linkage to normative priorities and a tighter connection to the overall strategic policy and governance oversight.

69. Correcting and aligning this balance depends on strong leadership, and on addressing UN-Habitat’s critical resource constraints, both discussed below. It also depends on a clarification of the organisation’s priorities. The Panel recommends two priority areas in this regard – attention to equity, vulnerability and exclusion in urban development; and a focus on the urban planning, legislation, norms and standards that will best support equitable development priorities, along with environmental sustainability and economic robustness.

70. Yet greater clarity is still required on the normative mission. Despite repeated assertions on the primacy of the normative mission, not only in UN-Habitat but throughout much of the UN system, the concept remains elusive and imprecise. To some degree this reflects an inherent ambiguity in the concept of normative which covers both “the right way to do things” and “the right reason for doing them”. At its extremes, this normative work might include both training on planning methodologies, but also debates on the values that inform that planning. The Panel has focused primarily on the former, but urges UN-Habitat to keep both understandings in mind in defining and operationalising its normative mission.

71. The Panel recommends that, with the SDGs and NUA as guiding frameworks, the core of UN-Habitat’s normative role be precisely to keep in focus the directive to “leave no one behind”, a directive amply supported by the human rights frameworks endorsed by the UN system. It implies advocacy and oversight with Member States to ensure their urban work reflects this guiding imperative, as well as guidance on the best means for achieving this end.

72. This means, for instance, ensuring that governments and their partners can both acknowledge and understand the negative repercussions of informality, as well as taking the planning and legislative steps necessary to deal with it. The informal solutions of the poor, whether in housing, amenities or livelihoods provide immediate ways to cope with their exclusion, yet also reproduce that exclusion. Designating activities or places as informal provides governments with the power
to displace, harass, criminalise and generally complicate the lives of the poor, when regulatory and planning frameworks could also be used to acknowledge and support informal solutions. There are numerous practical examples. **The Panel recommends that UN-Habitat provide guidance on both the practical approaches to dealing equitably with informality, and the values informing them.**

73. This means tackling formal frameworks so that informality is unnecessary, addressing land tenure laws, land ownership patterns and development planning approaches that force the production of informality. It means monitoring evictions and developing strong legislative solutions to ensure that unavoidable displacement is addressed with sustainable relocation, included in project budgets.

74. Through its government partners, UN-Habitat also needs to mediate conflicts between powerful development interests and powerless informality, and to ensure that marginalised communities and the civil society groups representing them are given due consideration in the development of urban policies and decisions around planning, with a seat at the table where possible. The private sector, whether local or global, should be asked to develop their own responsibility norms in this context.

75. This value-oriented normative work is closely tied to the operational work that UN-Habitat and other partners take on. In many localities, new solutions on the ground are urgently needed to produce normative outcomes that can be adopted and taken to scale by other partners. A database of programmes and projects, analysed with a view to the ways these perspectives can inform one another and contribute to the understanding and implementation of the larger normative mission would contribute to an evolving, iterative understanding. **The Panel recommends clear documentation on the complementarity of normative and operational work, with clarity on the way the normative/operational distinction is being interpreted in every project.**

76. Meeting the objectives of the new agendas requires significant work in many practical areas of urban development (basic service delivery, climate change mitigation and adaptation, emergency response, safe cities to name just some). More energy needs to be directed to encouraging the rest of the UN system to bolster these efforts, with UN-Habitat developing solutions in some case, but always helping to maintain the focus on inclusion as essential to the balanced and sustainable implementation of urban development. The integrative imperative of the SDGs and the NUA implies a shift in the way agencies work, and UN-Habitat has a role in making this happen.

77. Critical here is improved data to support the task. UN-Habitat’s mission of addressing inclusion within urban areas points to some very specific gaps. The large proportion of urban dwellers living in informality are frequently undocumented in formal data systems, especially the growing number of refugees coming into urban areas rather than formal emergency camps. Even where data is collected there is the issue of disaggregation. Data are most often presented in terms of rural and urban averages, and this fails to reflect the complexity of the urban landscape and the large disparities within urban areas. The Secretary-General’s report stresses disaggregation as key to leaving no one behind, and the need to ramp up the UN system’s ability to properly manage data to encourage new insights. Efforts to document the full range of urban realities, whether by strengthening formal systems, or supporting existing informal strategies, such as the rich “enumerations” by urban poor federations, are essential to the task. National SDG reporting must entail an overlaying of multiple forms of local data, including and beyond citizen-led data in informal settlements, city-government reported standardised data, satellite and big data. **The Panel recommends that UN-Habitat, in its data support role, pay special attention to the gaps in data collection and analysis that obscure the realities of excluded groups.**
B. Governance implications

78. The Panel finds that UN-Habitat’s governance and management structure has not met the organisation’s need for effective, responsive, timely decision-making, nor has it permitted the level of oversight by Member States that would ensure its reputation for accountability and transparency. These concerns have led to a decline in political commitment by Member States and have contributed to resource constraints in an environment where regular funding has in any case become scarcer and less predictable. A further concern, clarified by the direction of the SDGs and the NUA, is the insulated nature of the current UN-Habitat governance structure, which signal fails to reflect the complexity of the development landscape with its multiple actors.

79. A new governance structure is called for that resolves trust issues and generates a new and broader level of engagement. The Panel suggests some fundamental changes. The first is universal membership of all 193 Member States (rather than the current 58 members in the Governing Council). The second is the addition of a Policy Board, smaller and more focused than the current CPR (which would however remain), which would integrate formal input from stakeholders, local governments, and UN Urban.

80. The case for universal membership is very clear in the view of the panel. The far reaching transversal agenda of sustainable urbanisation, understood as the territorial development described above, requires system wide approaches and the development of global positions informed by the experience and realities of all Member States. Those that have gone through the urban transition and those that are experiencing rapid urbanisation can together develop policy that can help promote inclusive and sustainable development, avoiding the rural-urban divide that persists in international discussions. Urbanisation, its social and environmental implications, and the resources it requires are hugely significant although not yet fully understood. This understanding needs to be developed together by all Member States and not just a few. The balance between and within regions is another key reason for universal membership in UN-Habitat’s governance structure. It is to be hoped that universal membership will also enable broader ownership and more open, participatory and transparent proceedings, providing all governments with an equal voice on the decisions needed to support urbanisation and create a more inclusive and sustainable world.

81. The case for the inclusion of a broader range of non-UN members is equally strong. Mayors, civil society representatives, private-sector actors and many other local stakeholders are primary agents in implementing urban development, and will be essential to realising the transformative objectives of the new Agendas. Many of these local actors now attend UN-Habitat events, and were key players in the construction of the NUA, but there is no formal mechanism in the organisation’s governance structure or its accountability framework for the involvement of these partners. Acknowledging and institutionalising their valuable contributions through a formal role would address the mandate for inclusion directly within the governance of the organisation, demonstrating the depth of its commitment.

82. In arriving at its recommendation, the Panel gave serious consideration to a variety of possible governance models. The Panel’s optimal solution would have included, in addition to universal membership, a formal mechanism for the full participation of local government and representatives of other urban stakeholders as members of a tripartite governance body. There is a precedent for such a structure in ILO’s tripartite governance structure, which includes a governing body with membership of 50 per cent Member States and 25 per cent each of
representsatives of employers and workers. We take note, however, of present legal limitations to a similar tripartite structure for UN-Habitat. Understanding that at present there is no chance to pursue this optimal solution, a fact the Panel regrets, we present instead a variation on that model that we are advised is legally possible. **The Panel recommends a new governance structure that includes, in addition to universal membership, committees of local authorities and subnational governments and of urban stakeholders, with the capacity to evaluate and review resolutions, and to offer their coordinated guidance to the Policy Board.**

83. To accommodate this requirement, the Panel recommends the following hybrid governance structure (Figure 1) for UN-Habitat, which mirrors the structure of UN Environment with its universal membership, but also provides a formal mechanism for a Committee of Local Governments and a Committee of Stakeholders.

**Figure 1. Proposed structure for UN-Habitat governance**

84. This new governance structure would be governed by the Urban Assembly, the ultimate decision-making body which provides overall strategic framework and direction for UN-Habitat’s work. It differs from the current Governing Council primarily in its universal membership, the case for which has been outlined. The Urban Assembly would meet every two years, alternating years with the World Urban Forum (WUF) so that WUF outcomes can be integrated into the UN-Habitat strategic plan. Its meeting could also be coordinated with the UN Environment Assembly, allowing a one day joint meeting to discuss shared agenda issues and potential joint work programmes. To further enhance and promote the urban agenda, it could consider meetings that rotate between Nairobi and New York during the General Assembly meetings to take advantage of the potential of overlapping sessions. **The Panel recommends that UN-Habitat arrange its schedule and the location of its meetings to maximise the potential for overlap with both the UN Environment Assembly and the General Assembly.**

85. The Assembly would approve work programme and budgets, define normative and operational expectations; nominate the Policy Board; approve resolutions and recommendations by the Policy Board, with inputs from the Committee(s) of Local Governments and Stakeholders and the CPR. It would also set the vision for fulfilling SDGs and other commitments in the context of the urban and habitat agendas, and champion the role and contribution of transformative urbanisation, sharing and exchanging strategies and solutions.
86. The Urban Assembly would be assisted by the proposed **Policy Board**, consisting of 20 members, four from each of the regions, selected by the Urban Assembly for three year terms, and meeting bi-annually. The Policy Board represents the major change to the governance structure, an innovative addition that provides oversight on projects, policy and strategic advice to the Urban Assembly, but also ensures that its direction is informed by local government and stakeholders as well as by Member States. The Policy Board is, in effect, the cross roads where all input is integrated. Its tasks are listed in Table 1, along with those of the CPR. Among other things, the Policy Board would be critical to the effort to achieve greater transparency for the organisation. Projects, whether normative or operational, would come before the Board for review on a twice-a-year cycle, with information maintained in an accessible database available to all to see, and any concerns could be taken up with the Board. This could resolve many of the trust issues.

87. **The Committee of Local Governments** would include ten local/subnational government representatives, **two each from each region**; **the Committee of Stakeholders** would include ten civil society representatives, five urban experts and five private sector representatives, also evenly spread over the five regions. Members of both committees would be nominated by their representative bodies, and elected by the Assembly for two year non-renewable terms. All partners would be eligible to submit applications.

88. These committees would deliberate on the issues coming before the Policy Board and have formal input into all Policy Board decisions, with seats at the table and an ongoing feedback mechanism, ensuring that the Policy Board was well informed on a range of perspectives. Before discussions with the Policy Board, the two committees would meet together to coordinate their deliberations. This would be a ground-breaking partnership, enabling local authorities and subnational governments along with urban stakeholders to provide input and strategic guidance on central governance issues.

89. In addition to the input of the Committees, the Policy Board would be informed by **UNUrban** which, as a coordinating mechanism on urban, is crucial to UN-Habitat’s strategic direction. Its input on the urban work of UN agencies and Bretton Woods institutions and the lessons learned would supplement the perspectives of the local government and stakeholder group in informing Policy Board deliberations. The most practical way of ensuring the regular input of both these important bodies must be discussed.

90. Recognising the importance of Member States, **the Committee of Permanent Representatives (CPR)** would retain its open membership and much of its current function, continuing to meet four times a year, and function as an oversight mechanism, in a complementary and supportive relationship with the Policy Board. It works directly with the Secretariat and Executive Director, with the aim of developing and bringing ideas, issues and information to the PB.

91. The Executive Director would report to the Policy Board on work programmes and budgets, including technical cooperation and earmarked projects. A well-defined set of criteria, including the potential for scalability, should provide the basis for the approval of technical cooperation and earmarked projects, which should always support the normative mandate. The roles and functions of the Secretariat are to remain the same. The Panel recognises the multiple reporting lines associated with the Executive Director’s responsibilities, including to ECOSOC, the Secretary-General’s office and the Fifth Committee on budget. Reporting to the Policy Board, however, represents the internal relationship of the Secretariat to the organisation’s governance structure.

92. This revamped and transformed governance structure is intended to be effective, inclusive, transparent and accountable, to address the transversal nature of the urban agenda, increase engagement with UN operational entities to more effectively mainstream urban issues in the UN operational work, and allow for the participation of local government authorities and urban stakeholders. Every attempt would be made to ensure that their involvement is substantive and meaningful, despite the fact that under the UN charter, they cannot be voting members.

93. The location of these governance bodies is also critical. The Panel agrees that in order to strengthen its governance and management, UN-Habitat needs to capitalise on the comparative advantages of its headquarters in Nairobi, which places the organisation in one of the fastest urbanising regions and makes its location extremely relevant to its work.

94. The linkages and relationship with the Secretariat in New York where some budgeting decisions are made and UN headquarters are located should also be strengthened for improved governance and management. **For better coordination, and stronger, closer relationships to UN entities in New York, the Panel recommends a stronger staff presence in New York, especially of senior level staff.**

95. The Panel believes UN-Habitat should also review the location of its regional offices and consider moving them to cities where Regional Economic Commissions reside. The Secretary-General’s reform report elevates these Commissions to think tanks at the regional level to provide "world class analysis and knowledge on region-wide priorities, innovation, financing for development and transboundary issues". Relocating and aligning UN-Habitat regional offices would ensure that UN-Habitat has access to enhanced research and analysis of regional issues to support their normative and operational work; and in turn build solid evidence from its own urban normative work. This would mean moving from Rio de Janeiro to Santiago (Latin America and the Caribbean); from Fukuoka to Bangkok (Asia and the Pacific); from Cairo to Beirut (Arab States) and from Nairobi to Addis Ababa (Africa).

96. New York is not the only place that requires a stronger staff presence. **Building on existing capacity within UN-Habitat, other agencies and the best available talent worldwide, the Panel recommends that UN-Habitat be more generally re-staffed in Nairobi, New York and**
regional offices, with gender-parity to meet its mission and mandate to support Member States, sub-national governments and UN Country teams.

C. Partnerships implications

97. The success of UN-Habitat’s role depends on acknowledging governments at different levels, but also the many non-state actors critical to urban development, including civil society and the private sector. This acknowledgement is expressed in practical terms through its partnerships. Assessment of UN-Habitat’s partnerships points to the organisation’s success in mobilising partners, but raises questions about the quality of the involvement that ensues and at the programmatic activities that emanate from the partnerships. Also to be considered is an emphasis on the partners that can best strengthen the SDG and NUA focus on inclusion.

98. The inclusivity at the heart of UN-Habitat’s reframed mission has significant implications for its partnerships. Partnerships predicated on a mission of genuine inclusion, not just the delivery of participation as a project deliverable, imply a seat at the table for stakeholders who might not historically have occupied that position. This new framing of partnership is reflected in the Panel’s recommended governance structure, which, for the first time, offers local and sub-national governments and other stakeholders a more prominent role, moving from mere engagement to active collaboration. A critical element will be the means by which these representatives are selected, which should ideally be based on the self-organisation of their representative bodies.

99. The Secretary-General’s report emphasises that the UN development system will need to respond to national demands for “inclusive alliances and participatory processes that take account of the needs of the most vulnerable and excluded” (para 43). Within UN Habitat’s governance system as well as its more general approach to partnership, this implies a need to give priority to partners that share this commitment to the vulnerable and excluded, and that have experience and proven successes to bring to the table.

100. As the levels of government most engaged with addressing exclusion on the ground, local and regional governments must be high on the list of UN-Habitat’s partnerships. Currently UN-Habitat engages sub-national governments primarily through Member States in the General Assembly. The Panel sees the need for more direct relationships to facilitate the shift to the local agenda that has to be intrinsic to the NUA. This is accomplished in part by the Committees of Local Governments and Stakeholders, but a wider set of relationships may also be useful through, for instance, organisations representing local governments or excluded urban groups. The Panel recommends exploring relationships with representative organisations of local government and of civil society, as well as strengthening partnerships with UN country teams and Regional Economic Commissions.

101. UN-Habitat’s engagement with the private sector is an important aspect of its normative work. Because the private sector plays such a large role in urban development, often with far-reaching negative consequences especially excluded groups, the Panel recommends that UN-Habitat explore ways to encourage private sector actors to look at the unintended negative impacts of their investments and to find ways to mitigate them.

102. As well as developing its own partnerships, UN-Habitat has a role in encouraging, facilitating, and strengthening other important partnerships, such as those between national and sub-national levels of government, and especially local governments, which despite the rhetoric on decentralisation, still largely lack the independence and the financial resources to adequately
assume the full range of their responsibilities. The all-important relationship between local governments and civil society, and especially with organisations representing excluded groups, is also critical. This relationship is central to tackling urban exclusion and informality. Even for progressive local governments, committed to civil society participation, there are important differences between putting participatory mechanisms into place for local residents, and building relationships with existing organisations of excluded groups, including women and the urban poor. Many of these organisations have long standing relationships with local residents, a good understanding of the realities on the ground, and a track record for co-production with local governments in addressing many of the material and political deficits of excluded urban citizens.\textsuperscript{xii}

103. Beyond the partnerships that directly address exclusion, there are the partnerships that can help underwrite and support this work. The financial strengthening that is essential for UN-Habitat, as for the rest of the UN development system, calls for partnerships that make it possible to tap new sources of funding, as more fully explored in the next section.

104. Also essential here is UN-Habitat’s engagement in the work of UNUrban with its role in convening and coordinating the entities within the UN system and beyond to tackle the important work of inclusive and sustainable urbanisation.

105. The World Urban Forum (WUF) is a useful platform for convening partners and facilitating partnership, and the Panel recommends that it become a permanent event, so that it would not require approval and fundraising every two years. The Panel recommends institutionalising the World Urban Forum to help maintain the NUA firmly on the global agenda. Furthermore, it proposes that outcomes from WUF be integrated in the strategic plan and work programme and budget of UN-Habitat. This should be done through a report on outcomes to the Policy Board for integration into resolutions for the Urban Assembly.

**D. Finance implications**

106. The unpredictable and insufficient funds available for UN-Habitat’s core functions, along with its governance problems, have underpinned its other weaknesses. More secure funding for the organisation is urgently needed not only to strengthen its performance more generally, but also to allow it to carry out its role effectively with regard to the NUA and to support countries in their efforts to deliver its agenda. It is essential that both regular Member State contributions be increased to support this urban work, but also that innovative new modalities be explored.

107. The most immediate concern is the additional funding required to support UN-Habitat’s redefined focus on normative work. This means first an increase in the committed non-earmarked funds from Member States. While their assessed contributions to the regular budget are based on an agreed formula, there is scope for Member States to make additional voluntary contributions to non-earmarked Foundation funds. This in turn means stimulating their enthusiasm for UN-Habitat’s mission and renewing their confidence in the organisation and the way money is managed and spent. Concerns around transparency are largely addressed in the governance section, and there is the hope that the revamped structure will encourage an increase in core funding. It is also hoped that the universal membership will result in a more general commitment to urban work, which will be reflected in more expansive support. Annual budgets and mission-related outcomes, aligned with UNDS priorities, tracked annually, and independently reviewed every four years should assist in matching stable financing arrangements with the expenditure framework and medium-term plan will help secure funding for UN-Habitat with the right accountability mechanisms in place. **To activate this support, the Panel proposes an urgent**
call for Member States to support UN-Habitat with multi-year committed funds. In addition, the Panel recommends that UN-Habitat develop a 4-5 year medium-term perspective plan and expenditure framework.

108. The Panel has noted some concern on the part of Member States about the proportion of their voluntary contribution that goes to normative work as opposed to staffing and other administrative costs, since this distinction is not easily extracted from available budget categories. To add to other measures to enhance transparency, the Panel also recommends that UN-Habitat specify the percentage of core funds spent on staffing and other administrative costs, and that a cap be put on this amount.

109. Another way to strengthen support to normative work is to increase the share of resources that can be spent on normative activities. In keeping with the drive for transparency, it can be made clear to donors and governments seeking technical cooperation and special purpose projects that UN-Habitat does not take on projects without this normative component, and that all projects have to meet certain criteria with regard, for instance, to their contribution to knowledge, innovation, scalability, and more generally to sustainability and inclusion. The Panel recommends that a proportion of all earmarked technical cooperation funding be dedicated to this linkage to the normative mission, and strongly proposes a limit to the earmarked funding from Member States that goes to operational work.

110. The Panel feels a further solution might be converting UN-Habitat’s regular budget allocation into a grant, giving the organisation more managerial flexibility and responsiveness, while allowing it to remain part of the UN-Secretariat. The grant modality currently allows UN Women and UNHCR to apply the same financial rules and regulations as other Funds and Programmes that are not funded by the UN Secretariat. While it would not change planning and reporting requirements, the grant modality could improve UN-Habitat’s efficiency and capacity to use resources flexibly. The Panel recommends that UN-Habitat explore the advantages of the grant modality.

111. Beyond the stimulation and effective use of existing resources, the Panel is clear that new innovative sources of financing need to be explored, not only for the activities of the organisation, but for the more general mission of promoting sustainable and inclusive urbanisation. A recurring theme in Panel consultations has been the view that the UN more generally should go beyond traditional and diminishing funding and convene different stakeholders to tap other resources—public and private— including global funds and specialised banks’ funds. The Panel recommends that UN-Habitat develop a strategy for cooperation with multilateral banks, financial institutions, and private sources of finance in order to increase the available resources for inclusive and sustainable urbanisation.

112. Another potential source of new funding is the local actors that are heavily involved and committed to the urban agenda. The inclusion of local and subnational government authorities and other stakeholders in the work of UN-Habitat through the Committee of Local Governments and Committee of Stakeholders is not only a chance to draw on their expertise, but more generally to represent and encourage their involvement as partners and as contributors to the larger enterprise. The Panel recommends that UN-Habitat explore the funding and fund-raising potential inherent in these local relationships.

113. A useful focal point for new sources of funding could be the kind of multi-stakeholder platform that would be represented by a dedicated fund. This Fund would be similar to UN Women’s Fund for Gender Equality, a multi-donor initiative dedicated to programmes that increase women’s
economic opportunities and/or political participation at local and national levels. This would 
provide a multi-stakeholder platform for UN Urban to mobilise partnerships and increase funding 
to support relevant urban work, with a percentage allocated to UN-Habitat’s normative and policy 
integration work. This financial platform could facilitate new equitable and inclusive urban 
governance strategies, with UN-Habitat assisting and supporting nation states to explore these 
opportunities. This potentially catalytic global fund could help mobilise partners and attract new 
donors to fund globally relevant projects. Examples of new partners and donors include the 
private sector (e.g. companies and infrastructure banks) and philanthropic organisations. The UN 
system already provides tax deductible benefits which should further compel philanthropic 
organisations to support this Fund. The Panel agrees that the expansion of modalities of funding 
needs to be based on total transparency and disclosure of accounts to both Member States and to 
donors, to ensure credibility and to attract future donors. The Panel proposes a dedicated 
Global Trust Fund to secure a platform for alternative funding for sustainable urbanisation 
efforts.

VI. Conclusions

114. The Panel, convened to assess the performance of UN-Habitat and its potential for responding to 
the new aspirations and commitments assumed by Member States under the 2030 Agenda for 
Sustainable Development and the NUA. The Panel reached consensus in many areas and agreed 
that while UN-Habitat faces significant constraints and has critical weaknesses, its role is more 
important now than ever.

115. Urban challenges are substantial and growing, along with urban populations, and sustainable 
development globally will be increasingly tied to what happens in urban areas. Given the need to 
reconcile this inevitable reality with the generally scant attention to urban concerns within the 
2030 Agenda and the larger vision of the UN system, an urban champion is vitally necessary. 
The work of this champion cannot substitute for the concerted efforts of the entire UN system and 
its Member States, with their multiple layers of government, but it can help to steer and inform 
these efforts, ensuring that the urban focus remains steady, that it is grounded in the SDG 
imperative to “leave no one behind” and that it fully acknowledges and supports the local actors 
who are on the front lines in realising the objectives.

116. This role for UN-Habitat has been further refined by the Panel through the identification of two 
closely linked priorities: to address exclusion in urban areas and especially the constraints 
imposed by informality; and to support and provide guidance on responsive national urban 
policies and on urban planning and legislation. “Urban” is clearly defined here as encompassing 
the full range of urban realities, including the entirety of metropolitan regions, expanding urban 
peripheries, rapidly growing small towns and the important links between human settlements at 
every scale.

117. For UN-Habitat to play this role, its systemic limitations must be addressed – its problematic 
governance structure with its lack of Member State oversight, its growing financial constraints, 
and its portfolio of resource-driven activities that have increasingly allowed it to stray from its 
normative mission. Clear steps have been recommended for addressing these very interwoven 
concerns – universal membership in its governance structure, with strong representation also from 
local actors; a renewed commitment to a work programme defined by its normative mission, and 
specifically by the priority given to inclusion; and the creative exploration of new funding 
modalities to accompany its efforts to secure more predictable, substantial contributions from 
Member States and other sources.
118. The Panel recognises, in addition to this role, the need for considerable coordination in the effort to encourage Member States and other partners and facilitate their efficient cooperation. It has also proposed the establishment of UN Urban as a coordinating mechanism that can supplement and facilitate the more normative role of UN-Habitat.

119. This Panel was urged to make bold recommendations for enhancing the effectiveness, efficiency, accountability and oversight of UN-Habitat, ensuring that it could be fit for the purpose of addressing the requirements of sustainable inclusive urban development. Being fit for this purpose implies transparency, responsiveness to a rapidly changing global and urban landscape, the flexibility to seize opportunities as they arise and to take action in the face of evolving challenges and the capacity to be inclusive in its own governance as well as promoting inclusion as a more general value. The Panel would like to register its concern about the potential for bold recommendations in the context of legal and administrative constraints that represent de facto curbs. Its most pressing recommendation is for the larger UN reform process to consider how it can remove the institutional road blocks that inhibit innovative solutions, in order more effectively to realise its far reaching and transformative objectives for the world.

VII. Recommendations

The Panel’s charge:
1) The Panel responsible for this report was established to undertake an independent, objective, evidence-based review and assessment of UN-Habitat and to make recommendations to enhance the effectiveness, efficiency, accountability and oversight of the agency in four specific areas: its normative and operational mandates; governance structure; partnerships; and financial capacity (15, 17)

UN-Habitat’s role:
2) Recognising that UN-Habitat has a focal role in addressing sustainable urbanisation, but faces challenges that compromise its capacity to respond effectively, the Panel recommends that the first priority be to save, stabilise and then rapidly strengthen UN-Habitat to equip it for a renewed role based on the 2030 Agenda and the NUA (42)
3) It sees UN-Habitat as the appropriate UN entity to play an advocacy role around the importance of urban issues and the significance of the local agenda, within and outside the organisation, and to expand and refine its normative work in these regards. In this capacity, it would assist and support Member States, UN agencies and other stakeholders to integrate the NUA and urban aspects of the SDGs into their development operations as appropriate, providing guidance and tools for strengthening urban work at the country level (61)
4) To complement UN-Habitat’s role, the Panel proposes that UN Urban be established as a coordinating mechanism similar to UN-Water or UN-Energy, as part of the system-wide UN reform, with a small secretariat based in DESA in New York (64).

UN-Habitat’s mandate:
5) The Panel recommends that, with the SDGs and NUA as guiding frameworks, the core of UN-Habitat’s normative role be to keep in focus the directive to “leave no one behind”, a directive amply supported by the human rights frameworks endorsed by the UN system. This implies advocacy and oversight with Member States to ensure their urban work reflects this guiding imperative, as well as guidance on the best means for achieving this end (71).
6) It recommends further that all operational work have a clear linkage to normative priorities and a tighter connection to the overall strategic policy and governance oversight (68).
7) The Panel recommends two priority areas in this regard – attention to equity, vulnerability and exclusion in urban development; and a focus on the urban planning, legislation, norms and standards that will best support equitable development priorities, along with environmental sustainability and economic robustness (69).

8) In particular it is recommended that UN-Habitat provide guidance on informality as a driving force shaping exclusion. This entails both the practical approaches to dealing equitably with informality, and the values informing them (72).

9) Clear documentation on projects is recommended, demonstrating the complementarity of normative and operational work and the way the normative/operational distinction is being interpreted in every project (75).

10) In defining urban, the Panel calls for a conceptual shift to a more territorial approach, focusing on metropolitan regions, including the cities, towns, peripheral areas and villages that they contain, and avoiding the oversimplification of the rural-urban dichotomy (50).

11) The Panel recommends that UN-Habitat, in its data support role, pay special attention to the gaps in data collection and analysis that obscure the realities of excluded groups (77).

**Governance:**

12) The Panel agrees that the current governance model suffers from systemic problems that affect its accountability, transparency, efficiency and effectiveness and it recommends some fundamental changes, focused on the need for involvement by all Member States and by a capacity to reflect the complexity of the urban development landscape with its multiple actors (34, 79).

13) It recommends a new governance structure that includes universal membership of all 193 Member States in an overarching Urban Assembly, and the addition of a small, focused Policy Board to provide policy and strategic advice as well as oversight on projects. The Policy Board would integrate input from the CPR, the Secretariat and the Executive Director, but also from a committee of local authorities and subnational governments and a committee of urban stakeholders, both having the capacity to evaluate and review resolutions and to offer coordinated guidance to the Policy Board. UN Urban would also advise this Policy Board (82).

14) The Panel recommends that the Urban Assembly arrange its schedule and the location of its meetings to maximise the potential for overlap with both the UN Environment Assembly and the General Assembly (84).

15) UN-Habitat should also have a stronger staff presence in New York, especially of senior level staff for better coordination, and closer relationships to UN entities in New York (94).

16) UN-Habitat should be more generally re-staffed in Nairobi, New York and regional offices, with gender-parity to meet its mission and mandate to support Member States, sub-national governments and UN Country teams (96).

**Partnerships:**

17) With a view to active, effective, inclusive partnerships that can contribute to realising the mandate of inclusiveness, the Panel recommends that UN-Habitat explore and strengthen relationships with representative organisations of local government and civil society, as well as strengthening partnerships with UN country teams and Regional Economic Commissions (100).

18) It urges also that UN-Habitat explore ways to encourage private sector actors to look at the unintended negative impacts of their investments and to find ways to mitigate them (101).

19) Finally, it recommends institutionalising the World Urban Forum to help maintain the NUA firmly on the global agenda; and it proposes that WUF outcomes be integrated in the strategic plan and work programme and budget of UN-Habitat. This should be done through a report on outcomes to the Policy Board for integration into resolutions for the Urban Assembly (105).

**Financial capacity:**
20) The Panel recommends an urgent call for Member States to support UN-Habitat with multi-year committed funds. In addition, it recommends that UN-Habitat develop a 4-5 year medium-term perspective plan and expenditure framework (107).
21) To encourage voluntary contributions from Member States, the Panel recommends that UN-Habitat specify the percentage of core funds spent on staffing and other administrative costs, and that a cap be put on this amount (108).
22) To strengthen the priority given to normative work, the Panel recommends that a proportion of all earmarked technical cooperation funding be dedicated to the linkage to the normative mission, and strongly proposes a limit to the earmarked funding from Member States that goes to operational work (109).
23) The Panel recommends that UN-Habitat explore the advantages of the grant modality, giving the organisation more managerial flexibility and responsiveness, while allowing it to remain part of the UN-Secretariat (110).
24) In order to explore new and innovative sources of funding, and to increase the available resources for inclusive and sustainable urbanisation, the Panel recommends that UN-Habitat develop a strategy for cooperation with multilateral banks, financial institutions, and private sources of finance. The funding and fund-raising potential inherent in local urban relationships could also be explored (111, 112).
25) Finally, the Panel recommends the creation of a dedicated Global Trust Fund as a platform to secure alternative funding for sustainable urbanisation efforts (113).

xxi High Level Panel (2017). Consultations and questions on UN-Habitat assessment

xiii UN-HABITAT’s Global Urban Observatory monitors global progress in implementing the Habitat Agenda as well as global urban conditions and trends. The General Assembly of Partners (GAP) is an innovative, inclusive and independent multi-stakeholder partnership platform that convenes more than 1,100 unique organisations with over 58,000 networks working on sustainable urban development. The World Urban Forum (WUF) is the world’s premier conference on urban issues and has become one of the most open gatherings on the international arena for
exchanging views and experiences on urban challenges. The World Urban Campaign (WUC) is an advocacy and partnership platform to raise awareness about positive urban change to achieve green, productive, safe, healthy, inclusive, and well planned cities. Its goal is to place the Urban Agenda at the highest level in development policies.

BIOGRAPHY OF MEMBERS OF THE HIGH LEVEL INDEPENDENT PANEL TO ASSESS AND ENHANCE EFFECTIVENESS OF UN-HABITAT

Co-Chair: H.E. Rosario Robles, Secretary of Agrarian, Territorial and Urban Development, Mexico.

Rosario Robles is the Secretary of Agrarian, Territorial and Urban Development of Mexico. She served as Federal Representative for the fifty-sixth Congress, from 1994 to 1997, Secretary of Government of Mexico City between 1997 and 1999, and in 1999, was sworn in as Mayor of Mexico City, the first and only woman to run the city. Ms. Robles served as President of the Party of the Democratic Revolution in 2002. Under the current Federal Government, from 2012 to 2015, she served as Secretary of Social Development, during which time she coordinated Mexico’s new generation social policy and launched the “National Crusade against Hunger”.

She holds a bachelor’s degree in economics from the National Autonomous University of Mexico and master’s degree in rural development from the Autonomous Metropolitan University. Her political career has been characterised by her dedication to empowering women and guaranteeing gender equality in the public sphere, and combating poverty.

Co-Chair: Hon. Mpho Parks Tau, President of United Cities and Local Governments and President of the South African Local Government Association

Mpho Parks Tau is the President of United Cities and Local Governments and the President of the South African Local Government Association. As a member of the Johannesburg Mayoral Committee President, from 2000 to 2011, Mr. Tau drove the city’s socioeconomic transformation agenda. During this time, he headed the portfolios of Development Planning, Transport and Environment, and Finance and Economic Development. Mr. Tau served as the second democratically elected Executive Mayor of Johannesburg from 2011 to 2016. He is also the Chairperson of the South African Cities Network.

Mr. Tau holds a Post-Graduate Diploma in public management from Regenesys and a Master of Science in public policy and management from the University of London.

H.E. Pontso S.M. Sekatle, Member of Parliament for Qacha's Nek Constituency, Lesotho.

Pontso S.M Sekatle is a Member of Parliament for Qacha's Nek Constituency and was elected in 2002, 2007, 2012, 2015 and 2017 General Elections. In June 2001, Dr. Sekatle was appointed to the Senate, and in July 2001 she became Minister of Health and Social Welfare. Following the 2002 General Elections she was appointed Minister of Local Government and Chieftainship and mandated to deliver the first local government elections since 1968. The first Local Government Elections were held in April 2005 and Dr Sekatle handled the local government portfolio until 2012. Following the 2015 General Elections she was again appointed Minister of Local Government and Chieftainship.

Dr. Sekatle has headed various executive committees, such as the Lesotho Congress for Democracy Women’s League and Democratic Congress Women's League. She also served as Deputy President for the African Association for Public Administration and Management; Deputy President for the Commonwealth Local Government Forum, Director of the United Nations Educational, Scientific and Cultural Organisation (UNESCO) in Lesotho, and as board member of Lesotho National Development Corporation. She has published in the fields of public administration, governance and institution building.
Hon. Anne Hidalgo, Mayor of Paris, France
Anne Hidalgo is the Mayor of Paris, France, elected in 2014, the first woman in this position. She is a former labour inspector, having joined the Socialist Party in 1994. In 1997, she joined the cabinet of Martine Aubry, then-Minister for Employment and National Solidarity. As First Deputy to Bertrand Delanoë, Mayor of Paris, for 13 years, she headed the list of the Paris Left in its successes in the regional elections of 2004 and 2010. Mayor Hidalgo is currently President of the AIMF (Association internationale des Maires francophones), President of C40, Co-President of the UCLG and First Vice-President of the Greater Paris Metropolitan Area.

H.E. Dian Triansyah Djani, Permanent Representative of the Republic of Indonesia to the United Nations
Dian Triansyah Djani is the current Permanent Representative of Indonesia to the United Nations. Prior to his appointment, Ambassador Djani was the Director General for America and Europe, MoFA Indonesia. Between 2009 and 2012, he served as Permanent Representative to the United Nations, WTO and other International Organisations in Geneva.

From 2005 to 2008, Ambassador Djani was the Director General of the Association of Southeast Asian Nations (ASEAN) and member of the High Level Task Force on Drafting the ASEAN Charter. He was President of the UNCTAD Trade and Development Board (2009), Vice President of the UN Human Rights Council (2009), Chairman of the Second Committee of the 71st UNGA, as well as numerous positions in many international conferences/summits. He also served as the Commissioner of the Global Commission on Internet Governance. He pursued his graduate studies in Economic Development at the University of Indonesia and Vanderbilt University, USA.

H.E. František Ružička, Permanent Representative of the Slovak Republic to the UN
František Ružička is the Permanent Representative of the Slovak Republic to the United Nations. Prior to his appointment in 2012, Mr. Ružička was elected Chair of the Fifth Committee (Administrative and Budgetary) during the sixty-ninth United Nations General Assembly and was a member of the Intergovernmental Committee of Experts on Sustainable Development Financing from 2013 to 2014. He also co-chaired the Ad Hoc Working Group on the Revitalisation of the Work of the sixty-eighth General Assembly.

Mr. Ružička’s career has included numerous foreign posts. From October 2004 until his current appointment, he served as Director General of the European Affairs Section at the Ministry for Foreign Affairs in Bratislava. Between September 2003 and April 2005, he was Director of the Department for Internal Affairs and Institutions of the European Union. Previously, Mr. Ružička represented his country as a member of the delegation to the International Monetary Fund (IMF) and World Bank, Ambassador to Poland and in numerous posts at the Foreign Ministry.

Hon. Sheela Patel, Founder and Director of the Society for Promotion of Area Resource Centres (SPARC)
Sheela Patel is Founder and Director of the Society for Promotion of Area Resource Centres (SPARC) and a global expert on urban poverty alleviation and advocacy for slum dwellers. Ms. Patel founded SPARC in 1984, a Mumbai-based non-governmental organisation focused on housing and infrastructure rights for the urban poor. During this time, Ms. Patel has played a key role in the expansion of Mahila Milan, a federation of collectives of women living in slums across India.

Ms. Patel is also the Chair of Slum/Shack Dwellers International (SDI), an international network of organisations of the urban poor and supporting non-governmental organisations, active in Asia and Africa. She has represented SDI as a member or adviser in many national and international task forces and committees, including for multiple United Nations agencies.
Ms. Patel received the David Rockefeller Bridging Leadership Award from the Synergos Institute in recognition of her extensive efforts to ameliorate urban poverty, and Padmashree, a civilian award in India, for her work on urban poverty alleviation. She holds a Master of Social Work from the Tata Institute of Social Sciences.

Hon. Peter Calthorpe, Architect
Peter Calthorpe is an architect, urban designer, urban planner, and founding member of the Congress for New Urbanism. Mr. Calthorpe’s career in urban design, planning, and architecture began in 1976, combining his experience in each discipline to develop new approaches to urban revitalisation, suburban growth, and regional planning. In 1983, he founded the award-winning firm of Calthorpe Associates, devoted to sustainable urban design and planning globally. He is a founder and the first board president of the Congress of New Urbanism.

In 1986, along with Sim Van der Ryn, Mr. Calthorpe published Sustainable Communities, a book that inspired new thinking in environmental design and helped launch sustainability as a defining goal of many ecological efforts. In the early 1990s, he developed the concept of Transit Oriented Development, highlighted in The Next American Metropolis, an idea that is now the foundation of regional policies and city plans around the world. His latest book, Urbanism in the Age of Climate Change, documents his work relating patterns of development to energy and carbon emissions, along with other environmental, social and economic impacts. Recently he led a ground-breaking state-wide urban design effort, Vision California, to inform the implementation of the state’s Climate Change legislation. He studied at the Graduate School of Architecture at Yale University.
ANNEXES

ANNEX I - METHODOLOGY OF ASSESSMENT
This assessment process took place within a four month period - April to July 2017. The methods used for the assessment included a review of the literature, field trips, consultations, survey questions (online and word), and Panel discussions and analysis. Given the short period of time available to conduct this work, the Panel relied on evidence and support from previous evaluations and assessments, as well as qualitative in-person and written interview consultations. The Panel made two trips to Nairobi and two trips to New York for this assessment and has considered all consultations and evidence, taking into account different opinions, versions, ideas and alternative scenarios.

Consultations
Prior to organising consultations with Member States and other relevant stakeholders for the Assessment of UN-Habitat, it was agreed among Panel members that for any consultation meetings to take place, there had to be at least two Panel members present. A series of consultations, both virtual and in-person, were held throughout the process with Member States and key stakeholders of UN-Habitat including representatives of the Governing Council (GC); the Committee of Permanent Representatives (CPR) to UN-Habitat; the Executive Director and senior management staff of UN-Habitat; key partners in multilateral organisations; associations of local authorities and regional governments; urban economists; youth and women’s groups; and other relevant stakeholders. The Panel also consulted multiple UN agencies and specialised bodies such as the World Bank institutions throughout this process. (See list of consultations in ANNEX II). In Nairobi, the Panel had 17 group consultations and 10 bilateral meetings with Member States. In New York, the Panel held 6 group consultations and 4 individual consultations (with Secretary General & Deputy Secretary General, UN Environment head in New York, UN Women Deputy head in New York and Previous MOPAN head).

Literature review and previous evaluations
Several documents and reports were reviewed by the Panel for this assessment process, including background material that was generated specifically for the report, as well as previous evaluations and assessments.

Reports drawn on by the Panel include:

- MOPAN 2016 assessment report of UN-Habitat, which evaluated the organisation’s systems, practices and behaviours, and results from 2014 to mid-2016, using MOPAN 3.0 Methodology in its analysis.
- Office of Internal and Oversight Services (OIOS) 2014 assessment report, assessing the relevance, effectiveness and efficiency of UN-Habitat, as it embarked on its strategic plan for the period 2014-2019.
- 2015 UN-Habitat report detailing discussions on options for the strengthening of UN-Habitat and reforming its governance structure
- 2017 report of the UN-Habitat Governing Council, pointing to the continued strengthening of this council’s oversight role and that of the CPR over UN-Habitat work, and assuring implementation of the recommendations made so far.

---

- A recent mid-term evaluation of UN-Habitat\(^3\) indicating the need for the agency to take a leading role in the NUA and SDG 11
- DFID 2011 assessment report on how UN-Habitat’s work aligns with UK development objectives and assessed the quality of the agency’s performance, collecting evidence and scoring on two indices. (see ANNEX VIII on reviews of reports)

**Guiding questions**

The panel generated a set of guiding questions for Member States, the finance team of UN-Habitat and questions for relevant stakeholder and actors to generate evidence and information on the effectiveness of UN-Habitat. These questions were also developed into an online survey using Survey Planet online tool and the link was circulated to different networks including UN-agencies, urban experts, academic institutions, civil society organisations and Member States. Responses to the online questions were 44 in total. (See ANNEX V for questions’ analysis)

The guiding questions were also circulated to the Panel members’ respective constituencies including the following:
- Member States with permanent missions in New York and Nairobi
- UN agencies and all regional commissions
- ECLAC, the Economic Commission for Latin America and the Caribbean
- African Group of Ministers, a consortium of local leaders and the Local Government Constituency
- Urban experts and stakeholder groups including Slum/Shack Dwellers International among others.

The guiding questions were circulated to a list of 240 addresses for Member States and 42 agencies with 144 focal points of the UN Task Teams on Habitat III.

To publicise the assessment process, and to encourage stakeholders to share their perspectives with the Panel, the High-Level Panel Secretariat created a twitter hashtag \#HLPUNHabitat. The survey link was tweeted by the Global Task Force and Minister Robles to encourage their constituencies to provide feedback.

A total of 124 responses were received to the guiding questions that were circulated. 107 of these responses were from Member States (inclusive of 54 African countries represented by the Africa Regional group and 28 European Countries represented by the EU) and 17 from other stakeholders and actors. The responses have been summarised and incorporated in this report.

Following the first round of consultations, the panel developed additional questions to generate more evidence for this assessment and received 69 responses from Member States. (See ANNEX III)

**Field trips**

As part of the Panel’s assessment mandate, the Panel visited two UN-Habitat project sites to gather evidence for the report.
- The Kiambu County’s Semi-Aerobic landfill project, a benchmark waste management programme supported by UN-Habitat. It started as a pilot project and has now gained national

---

support. The Panel met with the Deputy Mayor of Kiambu county, Minister of Finance and Economic planning of Kiambu and other local government representatives (water, environment, planning, land and housing sectors).

- The Mashimoni project in Mathare Slums where the Panel met with the Mashimoni Settlement Executive Committee and Pamoja Trust. This community gave a brief history of the project including the support and tools (example Global Land Tool Network to map the community and draw legal documents of land ownership) they have received from UN-Habitat.

**Panel discussions and analysis of evidence**
The Panel has had several meetings to deliberate on findings and recommendations. The Panel met twice in New York and twice in Nairobi. The Panel members also held a series of teleconferences to discuss and align on recommendations.
ANNEX II: LIST OF CONSULTATIONS

New York
- Habitat III Secretariat
- Member States (Germany, China, Norway, Brazil, Japan, Russia, Canada, Finland, Czech Republic, Nigeria, Philippines, Kenya, Croatia, Dominican Republic, France, Switzerland, United Arab Emirates, Singapore, Maldives, Palestine, Iran, Portugal, United States of America, Mexico, South Africa, South Korea, Lesotho, Malaysia, Peru, Jamaica, Ecuador, Afghanistan)
- United Nations task force (FAO, UNESCO, UNIDO, UNHCR, UNOPS, UN Volunteers, IFAD, UN Environment, UN-OSAA, UNECA, UN Women, UNISDR, UNICEF, UN-ECLAC, UNDP, IOTT, UNCDF, UN ECSWA, ILO, UN-ESCAD, UNECE, World Bank Group)
- UN Environment Head in New York
- UN Women Deputy Head of programmes in New York
- Civil Society Working Group towards Habitat III
- Former Head of MOPAN Secretariat, Bjorn Gillsater
- Urban Experts and Economists
  - Aromar Revi, Director, Indian Institute for Human Settlements (IIHS)
  - Michael Cohen, Director of International Affairs Program, The New School
  - William Cobbett, Director, Cities Alliance
  - Junaid Ahmed, Country Director for India, World Bank
  - David Satterthwaite, Senior Fellow, International Institute for Environment and Development
  - Edgar Pieterse, South African Research Chair in Urban Policy, University of Cape Town

Nairobi
- UN-Habitat
  - The Executive Director
  - Senior management team
  - Budget and Finance team
  - Programme and Branch Heads
- Member States
  - Governing Council of UN-Habitat
  - Committee of Permanent Representatives (CPR)
  - Bureau of the Committee of Permanent Representatives and Governing Council (Tanzania, Rwanda, Ghana, Columbia, Israel, Iran, USA, Germany)
  - Working Group on Programme and Budget
  - Regional Group of Africa
  - Western European and Other States (WEOG)
  - Eastern European States
  - Asia-Pacific States
  - Latin America and Caribbean States (GRULAC)
  - Bilateral Member States meetings
    - President of the Governing Council to UN-Habitat
    - Japan
    - Brazil
    - United States
- Afghanistan
- Kenya
- Cameroon
- Germany

- United Nations Agencies
  - Regional Directors of UNICEF, UN Environment and UNHCR
  - United Nations Country Team (UN Residence Coordinator Nairobi, FAO, UNESCO, UNFPA, UNAIDS, UNSDR, UNHCR, UN Drugs & Crime)
  - UN Environment Governing body secretariat

- Civil Society Organisations
  - Federations of Urban Poor
  - General Assembly of Partners (GAP)
  - World Urban Campaign (WUC)
ANNEX III: QUESTIONS TO ASSESS AND ENHANCE EFFECTIVENESS OF UN-HABITAT

**Guiding questions – also circulated formally by email**

These questions were used during consultations with Member States and other stakeholders to UN-Habitat. They were also circulated formally by email to Member States and other stakeholders.

1. What is your assessment on the current state of UN-Habitat?
2. Is the mandate sufficient to address the New Urban Agenda?
   - Is the mandate still relevant or not?
   - Are the agency's strategic areas responsive enough to the New Urban Agenda?
   - How normative and/or operational should UN-Habitat's mandate be?
3. What is working well and what needs to be improved?
   - How should UN-Habitat governance and management be structured (to increase its effectiveness, accountability, transparent decision-making)? — for example, universal membership.
4. How does UN-Habitat work with other actors/stakeholders? (national, subnational and local governments; UN agencies; private sector and non-government organisations)
5. What is UN-Habitat's role within the UN system and what should it be?
6. Are the resources and financial capability of UN-Habitat sufficient enough to address the New Urban Agenda? What could be the way forward?

**NB:** A total of 124 responses came to these guiding questions came via email of which 107 were from Member States (inclusive of 54 African countries represented by the Africa Regional group and 28 European Countries represented by the EU) and 17 from other stakeholders/actors

**Additional questions for Member States.**

To get better clarity on some issues, the Panel developed additional questions for Member States and these were used for Member State discussion in New York and circulated after the follow-up meeting in Nairobi.

1. How important is the urban agenda at the national level?
   - Is UN-Habitat the only UN agency that can implement the New Urban Agenda?
   - Does UN-Habitat have the capacity and funding to support urban ministries in national governments? And/or do other UN agencies have such capacity?
2. Please submit the key elements of normative work (e.g. policy guidance, standards and norms) that need to be expanded, to support the NUA?
3. What funding mechanisms can you suggest for this enhanced normative programme? If we are to stay with earmarked funding, what does that mean for transparency and accountability?
4. What are the limits of the current governance structure for a UN-Habitat fit to deliver the New Urban Agenda? And, what potential changes in governance would be appropriate? (e.g. universal membership, UN Women model)
5. What specific forms and engagements for coordination and collaboration should be prioritised?
   - What agencies/entities should be prioritised for coordination and collaboration?
   - Which elements of the New Urban Agenda should be the responsibility of UN-Habitat?

**NB:** A total of 69 Member States (this includes the African Group representing all 54 countries) provided responses.

**Online questions through Survey Planet**

1. Please list your government affiliation and/or institutional affiliation
2. Please give us your name and title/position within your institutional affiliation
3. What is the government or institution assessment on the current state of UN-Habitat?
4. Is the mandate sufficient to address the New Urban Agenda?
5. Is the mandate still relevant or not?
6. Are the agency’s strategic areas responsive enough to the New Urban Agenda?
7. How normative and / or operational should UN-Habitat’s mandate be?
8. What is working well and what needs to be improved?
9. How should UN-Habitat governance and management be structured (to increase its effectiveness, accountability, transparent decision-making)?
10. How does UN-Habitat work with other actors / stakeholders? (national, subnational and local governments; UN agencies; and non-government organisations)
11. What is UN-Habitat’s role within the UN system, and what should it be?
12. Are the resources and financial capability of UN-Habitat sufficient enough to address the New Urban Agenda? What could be the way forward?

NB: A total of 50 responses generated of which 42 were complete responses, 6 left blank and 1 filled in half way.
ANNEX IV: SUMMARY OF RESPONSES FROM MEMBER STATES, UN AGENCIES AND STAKEHOLDERS

General assessment of UN-Habitat
For most Member States consulted, the general appraisal is mostly negative and indications that there is a need for reform were abundant. Problems highlighted had to do with the relationship of UN-Habitat with Member States and UN entities, with management and leadership, capacity to implement the NUA and the insufficiency of UN-Habitat’s resources. On the positive side, Member States indicated the important and valuable work and the quality and importance of the dialogue among diverse stakeholders that UN-Habitat stimulated and the positive indications provided by the ongoing reform. The responses received online indicated very clearly the perception that UN-Habitat’s status is not good. Inputs received from other stakeholders indicate some positive aspects: being an important expert body with valuable normative work and good networks with city administrations. However, UN-Habitat is generally considered weak, under-resourced, peripheral, poorly-led, with a dispersed focus. Some consider that little progress has been made to improve over the years. In relation to the implementation of the SDGs and the NUA, the perceptions are that its role is still undefined, that it is underprepared and underresourced, not fit-for-purpose. Relationships with Member States, other UN agencies and global urban networks are perceived to have deteriorated, UN-Habitat is seen as poorly connected with other agencies, with a lot of overlap and an ambiguous/awkward fit with the UN’s wider institutional architecture.

Importance of the New Urban Agenda
Generally, the New Urban Agenda is considered very important and in some cases more important than ever. It will contribute to facilitate connectivity between big cities and surrounding areas, including rural areas and in some contexts, for instance for the African countries, the process of urbanisation, and the potential embedded within it, presents an invaluable opportunity to realise the economic, social and spatial structural transformations needed. While the New Urban Agenda is an international agreement, it is intended mainly to guide national and sub-national activities. In some countries, the development of a national programme for sustainable urban development has been inspired by the New Urban Agenda. There should be further incentive by both UN-Habitat and the local governments to define action plans for the implementation of the New Urban Agenda.

What is working well and not working well for UN-Habitat
For Member States, the quality and competency of UN-Habitat and its staff are valuable and its role in the recognition of the urban challenges and the technical and normative tools developed make it an important organisation for Member States. However, management problems, problems of coordination within the UN, excessive operational work, the quality of relations with Member States, the insufficient relation with national governments, funding problems and its location in Nairobi constitute the main difficulties and bottlenecks currently. The responses received online highlight that on the positive side UN-Habitat has competence in its work and has established varied and ample partnerships. What needs to be improved is communication, it needs increased resources to perform, activities should be narrowed and focus improved. In addition, respondents consider that UN-Habitat needs to have a clearer role, fine-tune partnerships, more efficiency, and work to be responsive to the NUA and support other entities in this sense.

UN-Habitat mandate
The majority of Member States consider that UN-Habitat’s mandate is sufficient to address the NUA and that it is relevant. Opinions are divided, however, with regard to the responsiveness of UN-Habitat’s strategic areas to the NUA. The majority of the responses received online indicate that the mandate is sufficient to address the NUA and that it is still relevant. Opinions are also divided regarding UN-Habitat’s strategic areas and the NUA. Other stakeholders consider that the unique expertise and
knowledge of UN-Habitat in sustainable urbanisation must be underlined, fortified and adapted and that it does not cover all areas of the NUA. The traditional housing and land mandate of UN-Habitat could and should be refreshed. The mandate is considered still relevant but needs to be broadened.

The core work of UN-Habitat
Member States expressed that as a programme, UN-Habitat’s mandate was expanded to cover operational activities and now needs to strengthen its normative capacity. It needs to work on planning, policy and project management to assist countries in defining an action plan to support the NUA. UN-Habitat’s core work is to provide and disseminate policy recommendations on national land and urban policies and globally share lessons learned from project implementation. The organisation needs to continue to be the knowledge repository, a trusted reference on urban development and human settlements and ‘go-to’ place for information in its field. It also should guide urbanisation, assist and design innovative approaches, to disseminate best practices, provide technical assistance and empower countries to translate policies into practice.

UN-Habitat normative and operational work
Most Member States consider UN-Habitat should have a mandate that is both normative and operational but a large number of the respondents think that it should be more normative, in particular European countries. The responses received online also point to a mandate that should be both normative and operational. For other stakeholders consulted, UN-Habitat also needs to aim for a more balanced and recalibrated combination of normative and operational, with stronger links between normative and operational activities. Project implementation should be targeted and feed into the normative work.

Key elements of normative work that need to be expanded to support the New Urban Agenda
For Member States, the key elements of normative work are capacity building, knowledge incubation, generation and development, developing implementation frameworks, devising implementation and evaluation tools, promoting and championing best practices, producing data and trend analysis, research, publications, producing country, regional and global reports, guidelines, toolkits, and documenting project lessons and findings, providing policy guidance, advocacy, standards, norms and codes of best practice. UN-Habitat needs to be transparent and to involve technical experts from governments to ensure sufficient country ownership.

UN-Habitat Governance structure and management
To Member States, the governance models suggested include the Hybrid Governance Model, and the smaller and operational Executive Board type as employed by UNDP, UNFPA, UN-Women and UNICEF, converting UN-Habitat into a specialised UN-agency. As for participation, opinions are oriented towards enhancing participation of stakeholders in the work of the governing body, having a Governing Council with all Member States of the UN, and the Working Group on Programme and Budget that could be elevated to an additional inter-sessional body. In general, visibility at UN-Headquarters in New York should be improved and at the same time there is a need to consolidate headquarters functions in Nairobi, all this done through a clear definition of Headquarters functions. Converting the regular budget allocation for UN-Habitat into a grant should be explored. The responses received online indicate that UN-Habitat needs to have more visibility, accountability, political support, and financial autonomy. For the respondents, it needs to define clear core functions, a strategy (and an inter-agency strategy), review partnerships to include more varied partners in its work. For other stakeholders consulted, there is a clear need to change the governance structures. Most indications are that an Executive/Management Board should be established, removed from the UN Secretariat and established as an autonomous body. The majority also sees this as the way forward with a multi-level governance structure (or tripartite), with a broader inclusion of key stakeholders, sub-national governments, regional UN bodies, with a possible constitution of other mechanisms such as an external advisory group or a coordination mechanism of
different agencies, or even a coordinating structure to be established that is not located in UN-Habitat. The NY office of UN-Habitat should also be significantly strengthened.

**Universal membership**
Opinions are divided among Member States regarding universal membership. While the African countries indicate the need to call for universal membership, developed world countries indicate either no universal membership or another modality that does not necessarily require funding from UN member states. Only a very small number of the responses received online indicated the need for universal membership. Among the other stakeholders consulted, there are references to the need for a more strategic universal membership but most of the indications were towards multiple sources of income through varied partnerships.

**UN-Habitat’s work with other actors (Partnership)**
Opinions of Member States are also divided about the relations of UN-Habitat with other actors, namely with national governments. In general, relations with sub-national and local governments are considered good, while with UN agencies and NGOs they may not be good in the opinion of some Member States. Responses received online are divided on this front. Other stakeholders indicated that UN-Habitat has excellent cooperation, very good relationships and connections at the local level with government counterparts, networks to raise awareness among mayors and local government officials about the urban issues and has been working imaginatively with partners. However, it needs to improve and coordinate efforts of other UN agencies, work more with Member States, cooperate with existing intergovernmental bodies and establish strategic cooperation with UN regional commissions. More specifically, it needs to strengthen the role of the World Urban Forum, making it an appropriate stakeholder platform.

**Forums and engagement within and outside the UN system for the delivery of the NUA**
Most Member States from inputs received think UN-Habitat should make efforts to bring in new donors by actively informing them of the importance of its normative programmes. The organisation must retain its role as a focal point in the New Urban Agenda and should engage municipalities better and host ministries in national frameworks. UNDAF is one such platform. Country level interventions should be coordinated by UN-Habitat.

**UN-Habitat’s role in the United Nations**
For Member States, UN-Habitat has a specific role in the area of urbanisation and in the achievement of SDGs and the NUA. However, this should be stronger, more involved with other commissions, regional and national agendas. Its role should be focused on guidance, support and knowledge and information within the UN system for the implementation of the NUA, establishing stronger partnerships and assuring coordination. The responses received online indicate that UN-Habitat’s role should be more normative, its urban advocate role should be enhanced and it should be the convener of UN urban policy, a leader with a key role in urban issues. Other stakeholders referred to the leading role of UN-Habitat in the coordination of partners on urban issues, its role as the placeholder UN agency for urban issues, and in advocacy, policy and knowledge for the delivery of the NUA. In general, they consider that UN-Habitat should be a convener, assuring coordination and cooperation with other UN agencies but not necessarily be the overarching voice for urban, as it is the role of the UN system to implement the NUA.

**Is UN-Habitat the only entity that can implement the New Urban Agenda?**
The perception of some Member States is that UN-Habitat is not the only UN agency to implement the NUA. For some, it has the mandate and expertise to implement a great majority of areas in the New Urban Agenda and so should play and continue to play the role of focal point for issues related to sustainable cities and human settlements. Some think the organisation is equipped to provide strong leadership and should provide support for and coordinate of the implementation of NUA. However,
tertiary institutions and research centres, local organisations and governments should be encouraged to participate in the implementation process.

UN-Habitat resources and financing in relation to NUA

Member States consider that for the implementation of the NUA, UN-Habitat will need more resources, that the current finances are insufficient. The African Member States generally agree on increased Regular Budget contributions. Other indications are for increased innovative programmes, strategies, and partnerships to diversify the sources of funding. However, there has to be a change prior to devising a strategy to increase funding: resolving structural and trust problems, assessing the funding needs for the NUA. The majority of the responses received online also indicate that resources and financial capacity are not enough. The way forward could be planning for long-term budgets, increase member-state contributions and a commitment of the countries that signed the NUA. Diversification and leveraging of resources would imply alliances with other agencies and UNDAF budget, and include the private sector and non-government, the BRIC countries, cities and municipalities. To other stakeholders, UN-Habitat does not have sufficient resources and will need to leverage the ones already available – including its staff – by establishing synergies with other UN organisations, working together with them, namely with shared staff, time and financial resources. On the other hand, it should enlarge its core budget and normative work. Most of the indications were, however, that it should expand the possibilities by, on one hand, calling for all Member States’ full contributions, combined with voluntary contributions and, on the other, engaging private sector partners and possibilities like multi-lateral platforms (e.g. Cities Alliance, Global Fund for Basic Services, Global Observatory on Local Finance, Climate Financing), Development Banks.

Funding mechanisms to enhance the normative work of UN-Habitat

For some Member States, UN-Habitat should manage and operate within the scope of its present resources and financial capacity but also aim at increasing core funding and country earmarked funding. It needs increased and predictable core funding from the UN regular budget but should also make efforts to bring in new donors by actively informing them of the importance and value of its normative programmes. Core resources from the UN need to be combined with technical cooperation funds. The organisation should also be funded from the non-earmarked general-purpose contributions, which should increase with more trust, and funding could also increase through cross agency collaboration.

UN-Habitat’s capacity and funding to support urban ministries

UN-Habitat is facing several challenges and does not have the capacity to address them. However, it still possesses the capacity to support the relevant governmental bodies of developing countries in charge of urbanisation. It is difficult to see other agencies fulfilling UN-Habitat’s role. Should the funding return to normal, it will have the expected capacity. Habitat Programme Managers (HPM) at country level should be revitalised and at the same time, there should be a focus on emerging countries and under-developed regions. Other agencies do not have the capacity to support urban ministries.
ANNEX V: RESULT OF ONLINE QUESTIONS AND ANALYSIS

Number of online responses considered: 44 (42 complete and 2 incomplete)

Institutional affiliation

- UN Habitat partner
- UN agencies
- Private sector companies
- Other (individuals, consultants, retirees)
- National and Local Governments
- Member states
- Civil Society Organisations
- Academic institutions

Assessment on the current state of UNHabitat

- Don't know
- Good
- Not good
- Poor
What is working well and what needs to be improved?
What is working well is that UN-Habitat has competence in its work, has established varied and ample partnerships, participates in numerous relevant forums and works with local and national governments. It addresses the global south. Communication and networking are working well.
What needs to be improved is communication; increased resources to perform; activities are too expanded, there is a need to focus; need to have a clearer role; need to fine-tune partnerships; more efficiency; needs to develop areas needed for the NUA; needs engagement and advance knowledge passed; monitoring of NUA; link up with population health and health equity; more national urban policies and governance frameworks that make cities respond to NUA.

How should UN-Habitat governance and management be structured (to increase its effectiveness, accountability, transparent decision-making)? Should there be Universal membership?
The consensus is it needs more visibility; more accountability; political support; and, financial autonomy. It needs to define clear core functions; to define a strategy (and an inter-agency strategy); to review partnerships; to include representatives of organised groups, such as churches, mosques leaders, social movements; more participation of SCO in UN-Habitat management; to establish a Centre for Cities to do research and test aspects of NUA. 2% indicated Yes to universal membership.
What is UN-Habitat’s role within the UN system and what should it be?
UN-Habitat is a specialised organisation with high expertise; it is the advocate of urban development; it is small for this role. Its role should be more normative; its urban advocate role should be enhanced; it should be the convener of UN urban policy; should be a leader in urban issues; should have a key role on urban issues; should collaborate with UNEA; should have a more important role in the UN system; should support government services and cities.

Way forward
There is a need for long-term budgets, increased member-state contributions, leveraged resources, alliances with other agencies and UNDAF budget; partnerships including private and non-government; from BRIC countries; need for financial commitments between the countries that signed the NUA; more ‘buy-in’ from cities and municipalities; demonstrated results to stimulate more resources.
ANNEX VI: URBAN WORK IN THE UN

Urban data
- UNFPA (urban demographics, urban youth work)
- UNICEF (MICS)
- WHO (world database on cities air pollution)

Projects with UN-Habitat
- UNFPA (sexual and reproductive health in urban slums; young people capacities and urbanisation; urban gender equality)
- UNICEF (many urban work programmes, especially in WASH; and support for the Child Friendly Cities Initiative)
- WB (Global Platform for Sustainable Cities, City Creditworthiness Initiative)
- ICAO (airports and urban development)
- UN-Women (Safe Cities and Safe Public Spaces)
- UNOPS Cities Alliance, Cities without slums – Secretariat (UN Environment, UN-Habitat, UNCDF, UNDP, UNISDR, UNHCR)

Work about urban
- United Nations Institute for Training and Research (UNITAR) (Habitat III Discussions on Urban Legislation and Municipal Finance)
- UNU (several courses and training)
- UNICEF (work towards an urban strategy 2017)
- UNDP (new Sustainable Urbanisation Strategy, Articulation of Territorial Networks)
- UNITAR, UN-Women (World Alliance of Cities Against Poverty)
- UNAIDS (Alliance of Mayors and Municipal Leaders on HIV-Aids)
- UNDESA (publications on inclusive cities, urban youth, local authority engagement)
- UNESCO (sociocultural urban frameworks, urban culture and heritage, Creative Cities Network, Growing Up in Cities, Global Network of Learning Cities)
- WHO (Healthy Cities Programme, Global Network for Age-Friendly Cities and Communities)
- UNFCCC (light touch interaction with cities/subnational coalitions of actors)
- UN Environment (Partnership for Clean Fuels and Vehicles (PCFV), Climate and Clean Air Coalition, Initiative on Road Design and Finance for Safety, Sustainability, and Accessibility, Sustainable Buildings and Climate Initiative (SBCI), Sustainable Social Housing Initiative (SUSHI), Sustainable Buildings Policies in Developing Countries (SPoD), UN Environment's Division of Early Warning and Assessment (DEWA), UN Environment International Environmental Technology Centre (IETC) – solid waste management systems, Awareness and Preparedness for Emergencies on a Local Level Programme (APELL), CBD: urban ecosystem management, Cities and Biodiversity Outlook project (CBO)
- FAO (D groups Global Network: “Food for Cities, Programme for Urban and Peri-urban Horticulture, Urban Agriculture Programme, Urban and peri-urban forestry Programme, City region food systems (CRFS) network)

UN-Habitat projects and programmes:
- Urban Youth Fund
- Urban low emission development strategies (Urban-LEDS)
- Urban Planning and Design Lab, Safer Cities Programme (UNCJIN, UNODC, UNICRI, UNODCCP)
- Global Network on Safer Cities (GNSC)
- Participatory Slum Upgrading Programme (PSUP)
• Greener Cities Partnership (UN Environment)
• City Resilience Profiling Programme (CRPP)
• Cities and Climate Change Initiative (UN Environment, World Bank, Cities Alliance)
• Africa Urban Agenda Programme
• Global Urban Observatory (GUO)
• Global Network for Sustainable Housing (GNSH) (ILO, UNECE)
• Global Land Tool Network (GLTN)
• Habitat UNI
• Cities and Climate Change Academy
• Urban Legal Network (ULN)
• Global Network of Urban Planning and Design Labs
• World Urban Campaign

Urban efforts without specific projects:
• IOM (management of migration and refugees in urban settings)
• OHCHR (promotion of inclusive cities and protection of human rights in informal settlements)
• OSRSGVAC (strengthening the role of mayors for child protection)
• UNHCR (management of refugee camps in urban areas)
• UNICRI (safer cities and urban resilience)
• UNISDR (urban ecology, urban resilience, Making Cities Resilient campaign)
• UNODA (safer cities and arms control)
• UNODC (safer cities and drugs control)
• ILO (urban economies, urban youth and housing policies)
• ITU (smart cities and engagement with tech sector, ITU-T, Smart Sustainable Cities Programme, ITU-T Study Group 20 (SG20) – Internet of Things and Smart Cities, United for Smart Sustainable Cities (U4SSC), ITU-T, Environment, Climate Change and Circular Economy)
• World Tourism Organisation (UN WTO) (sustainable tourism knowledge management)
• IFAD (City Region Food System (CRFS) network)
• WFP (urban food security knowledge dissemination and urban safety nets)

Urban financing:
• UNCDF (municipal finance knowledge)
• UNIDO (industrial revitalisation, Inclusive and Sustainable Industrial Development for urban sustainability)
• WB (municipal finance, Urban Development Programme)

ANNEX VIII: RECOMMENDATIONS FROM PREVIOUS UN-HABITAT ASSESSMENTS

Methodology & what was being assessed
Assessing UN-Habitat’s organisational systems, practices and behaviours, and results in the period from 2014 to mid-2016 applying the MOPAN 3.0 methodology.

Findings
UN-Habitat largely meets the requirements of an effective multilateral organisation, is fit for purpose, but performance can be strengthened and improved in some areas. The main conclusions related to the HLP assessment are:

- UN-Habitat has made considerable investments to reform the organisation: the new decentralised matrix management
- Approach is working effectively to achieve integrated results across programmes and normative work
- Its technical work adds value and its participatory project design ensures relevance; its partners value its support and have high levels of confidence in it
- Its powerful new partnerships with city, regional and national governments, as well as traditional and new development partners, have the potential to be transformative
- Has embraced results-based management at all levels, improving accountability for results
- Positive results achieved across all areas of operation.

Recommendations
- Stabilise core funding, and increase the proportion and volume of flexible core funding
- A new partnership strategy, linked to the inter-agency framework and the current resource mobilisation strategy
- Expedite institutional reforms, specifically the roll out of the Umoja management system
- Deepen mainstreaming of cross-cutting issues: strengthen processes for embedding climate change and human rights approaches and knowledge into programme and project design, implementation and oversight
- Engage in more comprehensive consultation with beneficiaries
- Strengthen reporting at the outcome level; apply a more systematic approach to establishing targets and data collection
- Develop comprehensive results analysis tools, more systematic approaches to knowledge management, and better processes to track partnerships and accountability across the organisation
- Incorporate learning from evaluations through a stronger feedback mechanism to improve organisational performance
- Focus more on sustainability in interventions and on identifying and managing risks throughout the programme delivery process.

Methodology & what was being assessed
Assessment of the relevance, effectiveness and efficiency of the United Nations Human Settlements Programme (UN-Habitat), and the extent to which UN-Habitat has in place the elements to plan for, manage towards and demonstrate results as it embarks on its strategic plan for the period 2014-2019.

Findings
- UN-Habitat positioned itself as the lead United Nations agency responsible for an area of growing global priority: sustainable urbanisation.
This priority has not yet cascaded throughout the agency, however. In some countries, its work lacks a sustainable urbanisation focus altogether.

UN-Habitat has been effective in delivering its targeted outputs, although credible evidence of accomplishment is more readily available for its global initiatives than for its country operations.

UN-Habitat does not yet have adequate systems in place to credibly demonstrate whether its targeted results will have been achieved in 2014-2019, even for its largest, highest-priority, and highest-risk areas of work.

Despite well-documented external constraints, UN-Habitat made measurable improvements in its approach to defining and managing towards its targeted results during the period evaluated. These include greater structural alignment to its corporate results targets, mechanisms for improving the quality of its project proposals, the roll-out of an integrated online project management tool, key policies to help steer itself towards the results targeted in 2014-2019 and improved gender mainstreaming.

Absence of several key elements could thwart the future success of UN-Habitat. These include the lack of a risk management mechanism and accountability framework, weaknesses in information and knowledge management and a lack of clear final strategies in a number of key areas, such as resource mobilisation and partnerships.

Recommendations

- Needs to further strengthen the management, particularly in project approval, monitoring, reporting and accountability.

The Office has made 11 recommendations in these areas, namely on procedures and mechanisms, and UN-Habitat has accepted these recommendations and initiated action to implement them:

- Develop a risk management policy and plan of action
- Finalise an accountability framework
- Require the completion of regional strategic plans in all four regional offices and Habitat Country Programme Documents in priority country programmes
- Revise the quality assurance responsibilities entrusted to the Project Advisory Group
- Ensure that the agency’s highest-risk initiatives are identified for evaluation, and locate sufficient funds for these evaluations
- Establish a system to organise, store and share information and knowledge
- Conclude the resource mobilisation strategy action plan and the partnership strategy.

Methodology & what was being assessed

The Working Group on Programme of Work and Budget (2017), established by the Committee of Permanent Representatives (CPR) has formulated since its constitution in 2015 several actionable sets of recommendations to the Executive Director.

Findings

Recommendations have been focused on:

- The need to strengthen communications and external relations
- Improve the gender balance
- Revising its business model
- Written updates on all the subprograms of UN-Habitat

Recommendations

The mandate of this Working Group has been extended due to the need to continue strengthening the oversight role of the Governing Council and the Committee over UN-Habitat work and assure implementation of the recommendations made so far.

Methodology & what was being assessed
The evaluation assessed its objective of leading to a real improvement in performance on the ground, to stimulate agencies to improve their value for money, transparency and put in place robust management systems. They have conducted a detailed assessment of how the multilateral system performs by examining every agency which receives more than £1 million of annual core funding from DFID, asked how their work aligns with UK development and humanitarian objectives, and assessed the quality of their organisational performance. They conducted detailed agency assessments, collecting evidence and scoring each multilateral partner on two indices.

Findings
Among the many findings and results of the assessment, the most relevant to the HLP are:
- Many of the issues it works on are covered by other agencies (e.g. UNDP, UNICEF)
- While addressing important issues it is relatively small scale and overlaps with other MOs
- UN-HABITAT operational role has a strong focus on the environment and tackling climate change. But no evidence could be found on its safeguards policy or that it is making a significant impact on the ground
- It spends significant resources in middle income countries (including upper middle income countries)
- Reports have highlighted the challenges UN-HABITAT has in scaling-up pilot projects
- UN-HABITAT’s strategic plan is relatively weak. It remains resistant to embedding results-based management and evaluation
- Institutional performance has been a major concern of donors and is judged to be weak overall
- No evidence was found that savings are recycled into better performing parts of the organisation, that UN-HABITAT is able to make predictable long term financial commitments or that it releases aid flows according to schedule
- UN-HABITAT’s financial oversight system is adequate but other aspects of financial management are weaker
- No evidence was found that UN-HABITAT is controlling administrative costs or focusing on its comparative advantage. On the contrary, some new priorities have been adopted
- No evidence was found that senior management has established objectives for cost effectiveness or VFM
- UN-HABITAT has developed good partnerships and networks
- UN-HABITAT does not operate under a presumption of disclosure
- It provides some information on projects to the governing body but does not publish full details on project performance
- UN-HABITAT is weak on transparency but stronger on accountability to partner governments
- Large parts of the senior management team have been resistant to change in the past. It will require ambitious reform for UN-HABITAT to become a highly performing organisation making a critical contribution to the MDGs
- While some reform efforts are underway the organisation’s track record on improvement is not strong.

Recommendations
In March 2011 the Department for International Development’s (DFID), the UK governments ceased all funding for UN-Habitat.

Methodology & what was being assessed
The Executive Director of UN-Habitat submitted a report on the review of the governance structure to the Governing Council at its twenty-fourth session in 2015. Under the auspices of the President of the Governing Council and facilitated by the Chair of the Open-ended Consultative Group in consultation with the secretariat, members of the Council were subsequently engaged in informal discussions, through a contact group, on options for the strengthening of UN-Habitat and the reform of the governance structure.

Findings
Despite the discussions on options for the strengthening of UN-Habitat and the reform of the governance structure, opposing views held by members of the Governing Council on the matter led to no consensus and, as a result, the governance structure has remained unchanged. Some donors signalled that they would link their level of engagement with UN-Habitat with the governance issue, and cuts in financial contribution to UN-habitat by some donors is linked to the issue.

Recommendations
The Chair of the Committee of Permanent Representatives, in consultation with the Executive Director, resumed informal discussions on governance reform in 2014.

Methodology & what was being assessed
This evaluation assessed progress achieved in implementing the Strategic Plan, determine whether UN-Habitat is achieving transformational results, and make recommendations about improvements that will strengthen performance. The evaluation included a broad document review, interviews with staff and stakeholders, and two surveys – one among CPR members, another among Implementing Partners.

Findings
• Generally, points to positive progress in the achievement of results
• A continued relevance, effectiveness and impact of the strategic plan
• And good evidence of transformational changes resulting from UN-Habitat’s work, namely with national and local stakeholders
• Concerns with information and results reporting – with implications for affirmation of its leading role
• Concerns with progress towards Delivering as One;
• Slow and unwieldy governance structure;
• Internal inefficiencies.

Recommendations
• Gear up to take a strategic, leading role in the NUA and SDG 11
• Enable programmatic integration towards transformative results
• Advocate for ‘fit-for-purpose’ UN structure and systems
• Improve internal effectiveness and efficiency

• Pillar 1: Internal control system – the entity has set up and ensued the functioning in all material respects of an effective and efficient internal control system and in accordance to the criteria set by the European Commission.
• Pillar 2: Accounting system – the entity uses an accounting system that provides in all material respects accurate, complete and reliable information in a timely manner and in accordance to the criteria set by the European Commission.
• Pillar 3: Independent external audit – the entity is subject to an independent external audit
• Pillar 4: Grants – the entity applies appropriate rules and procedures.
• Pillar 5: Procurement – the entity applies appropriate rules and procedures.
• Pillar 6: Financial instruments – not applicable.
• Pillar 7: Sub-delegation – the entity applies appropriate rules and procedures.

Secretary-General’s recommendation, contained in his report on the quadrennial comprehensive policy review of operational activities for development of the United Nations system: recommendations (A/71/292/Rev.1) was to attribute an incremental cost to all strictly earmarked contributions. Recent reports of the Secretary-General on the implementation of the quadrennial comprehensive policy review and on the funding of operational activities for development, however, have included a detailed review and analysis of non-core funding and cost recovery (see A/71/63–E/2016/8, A/68/97–E/2013/87 and A/67/94–E/2012/80) and concluded that core resources are being used to subsidise non-core activities, thereby reducing the share of core funds available for actual programme activities.

Although the 2012 QCPR resolution encourages Member States making non-core contributions to give priority to pooled, thematic and joint funding mechanisms, the implementation of this point in the resolution remains weak. The percentage of pooled funds in the non-core development portfolio was significantly lower and ranged between a low of 3.6% in 2010 to a high of 9.6% in 2009 at the height of the MDG Achievement Fund period. Both percentages fall well short of the QCPR indicator agreed in 2012 of 20% of non-core going through pooled funds as a means of strengthening UN coherence. [The resolution does not mention a percentage. However, the QCPR Monitoring and Reporting Framework refers the “% of top ten donors of funds and programmes with core contributions changing by 20 per cent or more from the previous year” as an indicator for the goal Enhancing the overall funding, in particular core resources]

No mention to percentages to be allocated to core or earmarked, although indicating that there is an urgent need to explore ways that could enhance core funding to the UNDS including in broadening the contributor (donor) base.
