Fourth informal interactive multi-stakeholder hearing
Preparatory process for the global compact for safe, orderly and regular migration and
the intergovernmental conference on international migration

21 February 2018
Trusteeship Council Chamber, UN Headquarters, New York

Facts instead of perceptions:
Promoting an evidence-based discussion on migration

Theme:

The fourth multi-stakeholder hearing will focus on the importance of a fact-based narrative around migration. In recent years, migration has often dominated news headlines and public discourse around the world, in particular in the context of large movements of migrants and refugees. In many instances, the issue has been framed through misperceptions, ideology or fear. In his latest report, the Secretary-General noted with concern the spread of xenophobic narratives about migration.

A public debate that is based on facts rather than perceptions will promote evidence-based policies on migration. In the New York Declaration, Member States condemned acts of racism, discrimination, xenophobia and “related intolerance against refugees and migrants, and the stereotypes often applied to them, including on the basis of religion or belief.” During the consultation phase of the Global Compact, Member States and other stakeholders have repeatedly called for more disaggregated data on migration to support policy development.

Political leadership is imperative to promoting a fact-based public debate on migration but is not enough in itself. Governments, parliamentarians, the private sector, civil society, migrants and other relevant actors must all work together to achieve this common objective.

The hearing will explore the role of governments and other stakeholders, including civil society, parliamentarians, the private sector and media in promoting an evidence-based discussion around migration. It will provide an opportunity to discuss ways to cooperate and identify concrete recommendations, to ensure a fact-based discussion around migration.
