1. PURPOSE AND OBJECTIVE

- 1.1 Food Producing Establishments and food suppliers provide food to the UN through the Rations contractor. The Contractor is responsible for qualifying and selecting suppliers that meet UN Rations Standards. This Certification Standard defines conditions for the Contractor's Quality Management System, and its quality control program pertaining to source selection, which is an essential requirement for the fulfillment of UN's Quality Assurance objectives.
- 1.2 This standard is designed to replace the burden of repetitive proof of compliance that the Contractor must provide for every shipment of food with a structured risk-based inspection/validation mechanism as described in SOW Part I, Exhibit B 3 "Inspection". The cornerstone of this risk-based approach is the creation and maintenance by the UN of the Contractor's supplier database for the purposes of identifying, registering and monitoring individual supplier performance to reduce routine and repetitive product inspection by a system of tracking inspection results. The Contractor's supplier database will also ensure a standardized and consistent approach of all UN Missions in the acceptance of qualified suppliers and their related products. When the system is implemented, it has the potential to avoid duplication of efforts in certifying the same supplier for different Missions and reduce costs associated with rejections of food, along with the impact in operational disruptions associated with such rejections.
- 1.3 This standard outlines the basic guidelines for the Contractor to: a) evaluate, qualify and select suppliers; b) provide substantiation to the UN regarding the appropriateness of the supplier's control programs to meet the UN Rations Standards as described in SOW Part I (Exhibit B) to obtain validation from the UN Quality Assurance Unit, for the purposes of streamlining the product inspections in the Mission.
- 1.4 For clarity, "food-producing establishment", "supplier" and "sources" are used interchangeably to mean "suppliers" from which the contractor proposes to procure food for the contract.

2. QUALITY MANAGEMENT REQUIREMENTS

- 2.1 The Contractor must be certified against a Food safety management system such as ISO 22000: 2018 or an equivalent system such as the Global Food Safety Initiative (GFSI) benchmarked system such as FSSC 22000, BRCGS, SQF, and IFS
- 2.2 The certification must include the contractor's operations needed to fulfil the requirements of the contract as outlined in Article 3.3, SOW Part I i.e. procurement, storage and distribution of food. The contractor shall maintain valid certification for the term of the contract.

	UN RATIONS STANDARD	DATE: 15/11/2024
	CERTIFICATION	ED N°: 05*
	CODE: UNSTD-GEN-04	Page: 3 of 32

- 2.3 Certificates must be issued by accredited certification bodies for Food safety systems. The accreditation body must be a member of International Accreditation Forum (IAF) or regional group members of IAF and signatory of Multilateral Recognition Arrangement (MLA) of Quality Management System.

3. SUPPLIER CLASSIFICATION GUIDELINES

- 3.1 The Contractor shall evaluate and select suppliers that are able to meet UN Rations Standards as outlined in Exhibit B, SOW Part I. The contractor shall validate such sources and classify the suppliers into the following categories, herein named as Levels 1-4 establishments. The Levels shall determine the compliance criteria the Contractor is required to fulfil during contract performance as described in SOW Part I, Exhibit B-3 "INSPECTION".
- 3.2 Establishments selected by the contractor as sources of supply to the UN shall be classified as:
- **Level 1 Establishment:** Food establishments under the rules and regulations of Australia/ New Zealand, U.S.A., UK, Canada, or European Union Countries.
 - **Level 2 Establishments:** Food establishments included in the list of approved establishments to export to U.S.A. or the European Union. Approved Establishments lists are available on the following websites:
EU Approved Lists:
<https://webgate.ec.europa.eu/tracesnt/directory/publication/establishment/index#!/search?sort=classificationSection.translation;> or
[Non-EU countries authorised establishments - European Commission \(europa.eu\)](https://ec.europa.eu/food/unsafe/establishments/)
USA Approved Lists:
<https://www.fsis.usda.gov/inspection/import-export/import-export-library/eligible-foreign-establishments>
 - **Level 3 Establishments:** Food establishments certified against a Food Safety Management system such as ISO 22000: 2005 or equivalent systems such as the GFSI benchmarked systems such as FSSC 22000, BRCGS, SQF, and IFS. These establishments must be certified for their core operations for the proposed product. The certificate must be issued by an accredited certification body for Food Safety Systems.
 - **Level 4 Establishments:** Food Establishments not included in Levels 1, 2 and 3, but are under the official surveillance of Competent Authorities at the country of Origin and are able to substantiate compliance to UN Rations Standards as outlined in Exhibit B of SOW Part I.

4. VALIDATION AND RECORDING PROCESS OF CONTRACTOR'S SUPPLIERS

- 4.1. The contractor must submit to the UN a request for validation of its food suppliers (food

	UN RATIONS STANDARD	DATE: 15/11/2024
	CERTIFICATION	ED N°: 05*
	CODE: UNSTD-GEN-04	Page: 4 of 32

producing/ processing establishments) that it has qualified and selected to supply based on the Contractor's verification of the ability of the supplier to meet the UN Rations Standards as defined in SOW Part I, Exhibit B. If the supply source is a wholesaler, the contractor must ensure that the wholesaler is also classified as 3.2 above;

4.2. For Compliance Validation purposes, the Primary Supplier¹ is intended to be:

- (i) the Producer of processed food², and
- (ii) the Primary Producer and Packer of unprocessed³ and minimally processed food⁴).

For Compliance Validation purposes the Secondary Supplier⁵ is intended to be:

- (i) the Wholesaler if the Contractor purchases food through a Wholesaler.

4.3. The Supplier Compliance Validation is associated with the proposed product that the Contractor intends to supply to the UN.

4.4. For the purpose of the Risk-based Inspection classification, the Food Establishment Level of Risk is associated with the Primary Supplier and not with the Secondary Supplier.

4.5. The contractor shall initiate the validation request upon contract signature and continuously update supplier validation during contract performance. The contractor may NOT supply food to the UN without obtaining validation approval from the UN.

4.6. Waiver of supplier validation: The contractor may request a waiver of validation from the Mission for the mobilization period and further up to three (3) cycles of food delivery from contract signature while in the process to obtain the validation for the proposed suppliers.

4.7. Supplier validations are not contract specific and shall be valid for all food rations contract(s)

¹ Primary Supplier includes a food operator who adds value to the food. Primarily, it includes Food Producers, Primary Food producers, and Food packers. Food Producer refers to a person or company that grows, raises, processes, prepares, manufactures, or otherwise adds value to the food product. Primary food producer is a person or company that only carries out production activities including agriculture, fishing, livestock, and other production methods, resulting in raw food products. Food packer is a person or company that transfers food from one container usually a larger container into a smaller one, including filling, packing, and labeling, to prepare it for sale.

² Processed Food means foodstuffs resulting from the processing of unprocessed products. These products may contain ingredients that are necessary for their manufacture or to give them specific characteristics. Examples include cheese, salami, biscuits, etc.

³ Unprocessed Food means foodstuffs that have not undergone processing, and includes products that have been divided, parted, severed, sliced, boned, minced, skinned, ground, cut, cleaned, trimmed, husked, milled, chilled, frozen, or deep-frozen. Examples include fresh fruits and vegetables, meat cuts, fish, etc.

⁴ Minimum Processed Food means unprocessed foods altered by minimum industrial processes before being sold and includes activities such as drying, roasting, blanching. Examples include dried spices and herbs, peanuts, frozen vegetables if blanched etc.

⁵ Secondary Supplier acts as the link between the Primary Supplier and the Contractor, typically functioning as a wholesaler that purchases products, storages, and resells them to food service businesses. Brokers must be considered a form of supplier for the purposes of Supplier Validation and Traceability, regardless of whether they take physical possession of the goods.

	UN RATIONS STANDARD	DATE: 15/11/2024
	CERTIFICATION	ED N°: 05*
	CODE: UNSTD-GEN-04	Page: 5 of 32

that the Contractor may have with the UN. This centralized approval system helps streamlining and standardizing the validation process to ensure consistency across different missions.

4.8. Contractor's Request for Supplier Validation Procedures:

- Submission of Request by the Contractor: After completion of contractor's internal supplier selection processes, the Contractor submits to the Mission's Rations Unit the request for validation of selected supplier(s) and associated product(s) through Annex A: Supplier Validation Request
 - Annex A1: Supplier Validation Request for Primary Supplier
 - Annex A2: Supplier Validation Request for Secondary Supplier

The submission must be accompanied by the required supporting documents as specified in Article 4.8 and Annex C, Guidance for Submission of Validation Documents. Additionally, the supplier shall populate the Annex B Mission's Supplier Matrix for each mission individually

- Review and Verification by the UN: The United Nations Mission designated personnel reviews and verifies the documents submitted by the contractor in accordance with Annex A, B and C. The Mission may deny the validation request of the supplier and related products. In cases of denial due to incomplete or insufficient documentation, the Contractor may be requested to provide further documentation to substantiate the supplier's qualification.
- Approval and Issuance of UN Validation Number: In case of approval of the validation request of the Supplier and related products, the Mission shall request the Rations Unit, Logistics Division (RU/LD) to issue a Unique Supplier Identification Number. This identification number identifies the approved Supplier and related products. This number is crucial for tracking and managing approved suppliers and associated products.

Ration Unit/ LD roles:

- Periodic Review: The RU/ LD periodically reviews the Supplier Validation Matrix to monitor the accuracy of the validation process. This review ensures that all approved suppliers and products continue to meet the required standards over time.
- Handling Nonconformity: In cases where a mission encounters nonconformity issues with a supplier or product, they consult with the RU/LD. The RU/LD provides guidance and takes necessary actions to address the nonconformity, ensuring compliance with the standards.

4.9. Document Requirements for Validation:

The Contractor shall submit the request for validation through Annex A: Supplier Validation Request and Annex B: Mission's Supplier Matrix, including the following documentation:

- Copy of registration in the country of origin for food production/processing

Documents related to specific Food Establishment Levels as per the below list:

	UN RATIONS STANDARD	DATE: 15/11/2024
	CERTIFICATION	ED N°: 05*
	CODE: UNSTD-GEN-04	Page: 6 of 32

- **Level 1 Establishments:**

1. Certification requirements:
 - (i) For Low-Risk products: HACCP certification (Sanitary/Food Safety Registration of Country of Origin) or Food Safety Management System Certification
 - (ii) For Medium and High-risk products: Food Safety Management System Certification

- **Level 2 Food Establishments:**

1. Certification requirements:
 - (i) For Low-Risk products: HACCP Certification (Sanitary/Food Safety Registration of Country of Origin) or Food Safety Management System Certification
 - (ii) For Medium and High-risk products: Food Safety Management System Certification
2. Copy of the certification of the approval (by EU or USA) to export food to EU member countries and USA.

- **Level 3 Food Establishments:**

1. Food Safety Management System Certification
2. Copy of Control plan (including Critical Control Points and Control Points) applicable to UN products, Pre-requisite program (PRP), and control of contaminants as outlined in SOW Part I, Exhibit B1 - GEN-01 Contaminants.
3. Copy of most recent Internal Food Safety Audit
4. Copy of most recent external Food Safety Audit

- **Level 4 Food Establishments:**

1. HACCP certification (Sanitary/Food Safety Registration of Country of Origin)
2. Copy of HACCP plan
3. Copy of Control plan (including Critical Control Points and Control Points) applicable to UN products, Pre-requisite program (PRP), and control of contaminants as outlined in SOW Part I, Exhibit B1 - GEN-01 Contaminants.
4. Copy of Internal Food Safety Audits for 2 years
5. Copy of Competent Authority's Inspection Reports/Third Party Audit Reports
6. Copy of Contractor's food safety audit assessment report

It must be noted that in case Contractors consider Food Establishments at Level 4 for sourcing High-Risk Products, they have to submit to the Mission comprehensive laboratory analyses for each shipment. Missions shall immediately reject each consignment lacking laboratory tests.

Additional documentation for unprocessed and minimum-processed food is specified in Annex C: Guidance for Submission of Validation Documents.

- 4.10 The United Nations Ration Scale includes both non-HALAL and HALAL products. In addition to the required documents for each Establishment Level, a HALAL Certificate is mandatory for

	UN RATIIONS STANDARD	DATE: 15/11/2024
	CERTIFICATION	ED N°: 05*
	CODE: UNSTD-GEN-04	Page: 7 of 32

HALAL products. The UN accepts the HALAL certificates issued by the HALAL Certification Bodies that are recognized and approved by the following authorities:

- JAKIM Malaysia
- Emirates International Accreditation Center (EIAC), Emirate of Dubai
- GCC Accreditation Center-KSA
- Emirates National Accreditation System (ENAS)-UAE
- Majelis Ulama Indonesia (LPPOM MUI)
- National Council for Accreditation Egypt (EGAC):
- Halal Accreditation Agency (HAK)-Turkey

In addition, the UN also accepts the following HALAL Accreditation Bodies (HABs) that are affiliated with The International Halal Accreditation Forum (IHAF):

- United Kingdom Accreditation Service (UKAS)
- Saudi Accreditation Committee (SAC)
- Joint Accreditation System of Australia and New Zealand (JAS-ANZ)
- Entidad Nacional de Accreditation -Spain (ENAC)

Table 1. The table below shows the required documents for the primary supplier validation.

FOOD ESTABLISHMENT CLASSIFICATION AND REQUIRED DOCUMENTS FOR PRIMARY SUPPLIER VALIDATION				
Food Establishment Level of Risk (Associated to Country of Origin)	Level 1 EU, USA, NZ and Australia, UK, Canada within the home country regulations	Level 2 Outside of L1, but included in the list of approved establishments to export to U.S.A. or EU.	Level 3 FSMS such as ISO 22 K or equivalent to GFSI benchmarked system (FSSC 22000, BRCGS, SQF and IFS)	Level 4 Outside of Level 1,2,3 but under the official surveillance of Competent Authorities
Supplier Copy of Registration	1. Copy of registration in the country of origin for food processing operations and evidence of the supplier's business activities related to the food processing operations			
Required Certification for Validation and Approval	Certification requirements: (i) Low-Risk products HACCP (Sanitary/Food Safety Registration of Country of Origin) or FSMS (ii) Medium and High-risk products FSMS	Certification requirements: (i) Low-Risk products HACCP (Sanitary/Food Safety Registration from Country of Origin) or FSMS (ii) Medium and High-risk products FSMS	Food Safety Management System Certification (FSMS)	HACCP certification: Sanitary/Food Safety Registration of Country of Origin
				HACCP plan
		EU /USA Approval to export food to EU/USA (apply only for Animal origin products)	PRP & Control Plan applied to UN products to be supplied (including contaminants)	PRP & Control Plan applied to UN products to be supplied (including contaminants)
			Internal Food Safety Audit	Internal Food Safety Audits for 2 years
			External Food Safety Audit	Competent Authority's Inspection Reports/Third Party Audit Reports
				Contractor's food safety audit and assessment of the establishment
