

**STATEMENT BY H.E.MR.TAVINBEKH NANSAL,
MINISTER OF ENERGY OF MONGOLIA**

At High level dialogue on energy
under the auspices of UN General Assembly 74/225
24 September 2021

Dear Madam Under-Secretary General of the United Nations
Distinguished Guests, Ladies and Gentlemen

I am pleased participate in this important event and greet all participating countries and stakeholders and organizers of the High-Level Dialogue on Energy under the auspices of the United Nations General Assembly.

This Dialogue is important as it gives us a chance to explore cooperation opportunities and discuss action plans, challenges and solutions for implementing SDG7 and beyond.

As a landlocked developing country, it is our priority to take an active stance in regional multilateral economic cooperation.

The State Great Khural of Mongolia ratified “Vision-2050” in relation to the principles of the Agenda for Sustainable Development Goals 2030. In the “Vision 2050”, Mongolia set the goals to form competitive, multi-pillar, and accessible economy, improve living condition of the population by creating employment opportunities, conserve sustainable environment, decelerate climate change and other adaptations, all adjusted to development features of our country.

Within the framework of this policy, we are developing a mutually beneficial cooperation with countries in the region to ensure a reliable energy supply, increase renewable energy, enhance energy efficiency, and develop infrastructure projects, such as cross-border power transmission lines, gas pipelines, and coal trade.

I would like to emphasize the importance of close cooperation between countries in order to supply not only environmentally friendly energy, but also make its source reliable and affordable.

I hope that in today’s dialogue, all participants would share their ideas, knowledge and experience. Finally, I would like to wish you all a fruitful and successful discussion.

Thank you very much.
