

STIFTUNG SOLARENERGIE

SOLAR ENERGY FOUNDATION

Our approach

1. We promote the spread of solar energy.

It is reliable, affordable and environmentally friendly. And it easily meets the energy needs of households, schools, health stations or businesses.

2. We promote local solar crafts.

Small and medium-sized enterprises are important factors in the fight against poverty, environmental destruction and for job creation.

That's why we always use donor-funded projects to support local solar companies.

A dual approach that has been proven since 2003.

Where we are

Founded 2004, based in Germany

Country	Period
Ethiopia	since 2004
Kenya	since 2009
Philippines	since 2010
Uganda	since 2015

What we do

Diesel generators and kerosene lamps are standards in Africa

We replace them with solar energy.

What we do

Solar Villages

= Basic sun-connection for each household, SME and institution

What we do

Health centers: Light (indoor and outdoor) + cooling for vaccines

What we do

Water pumping

a) for communities (water supply)

What we do

Water pumping

b) for smallholder farmers (irrigation)

What we do

10 Million solar systems are installed in Africa

"Clean energy" needs to include "clean waste"

Pilot project: Repurposing of lithium batteries

Thank you!
