

SIGN UP FORM

EXPRESSION OF INTEREST

The Energy Compacts are voluntary commitments from Member States and non-state actors with the aim of uniting a global community in mobilizing transformative energy solutions. The Compacts emerged as a significant achievement following the High-Level Dialogue on Energy (HLDE) convened by the UN Secretary-General in September 2021.

Since then, the Energy Compact network has continued to drive collective action to achieve SDG7 while aligning with the Paris Agreement and net-zero goals.

Moving forward, as a UN High-Impact Initiative, the Energy Compacts intend to ensure that commitments become increasingly ambitious to actively respond to the urgent need for accelerated climate action.

Through signing the expression of interest, the proponent commits to submitting an Energy Compact in alignment with the following guiding principles:

- ✓ Strengthen and/or add targets or actions related to SDG7 that result in higher cumulative impact compared to existing pathways.
- ✓ Broaden the geographical and/or sectoral coverage to speed up ongoing action towards SDG7.
- ✓ Commit to periodic updates and accelerated action as supported by latest global analysis and agreements.
- ✓ Enable SDG7 actions towards achieving the other sustainable development goals by 2030.
- ✓ Aspire to consider socio-economic impact while aligning with net-zero pathways in line with the Intergovernmental Panel on Climate Change (IPCC), limiting warming to 1.5°C with no or limited overshoot.
