Global Policy
Dialogue Series

Wednesday, 26 May 2021
8:00-9:30 a.m. EDT

Session 3 of the UN DESA Global Policy Dialogues for Climate Action

Strengthening Sustainable Forest and Ocean Management to Mitigate Climate Change

- How do the restoration and protection of forests and the ocean help address the climate change and biodiversity crises?
- How should countries and the private sector best identify, finance and mentor sustainable forest and ocean management systems?
- How do we ensure that sustainable forest and ocean management is inclusive?

Leading voices in the fields of forest and ocean ecosystem restoration and management will discuss practical approaches for using these natural resources in ways that minimize the impacts of climate change, all in the context of recovering from the COVID-19 pandemic. Cross-cutting issues such as financing, governance, data and leaving no one behind will be part of the discussion.

This event is free and open to the public. Live captioning will be available in Arabic, Chinese, English, French, Russian and Spanish. All are welcome!

This event is made possible through the United Nations Peace and Development Trust Fund.
