

ENERGY COMPACT PREVIEW

THE NETHERLANDS

1. Representatives from the Dutch private sector, civil society, financial sector and youth are, together with the Government of The Netherlands, exploring their contribution to the goal of **ensuring access to affordable, reliable, sustainable and modern energy for all** by 2030, in line with the transition to a net-zero emissions global economy by 2050.
2. Stakeholders in The Netherlands will support low and middle-income countries in pursuing **just and inclusive energy transitions** to reach the SDG7 goals by 2030 and net-zero by 2050.
3. The Netherlands-based public, private, academic and civil society partners will collaborate on 1) clean cooking for all, 2) universal access to electricity, 3) finance and investment to reach SDG7, 4) adequate and reliable access to energy for people in displacement situations, and 5) youth & gender.
