

United Nations Climate Change
Global Innovation Hub

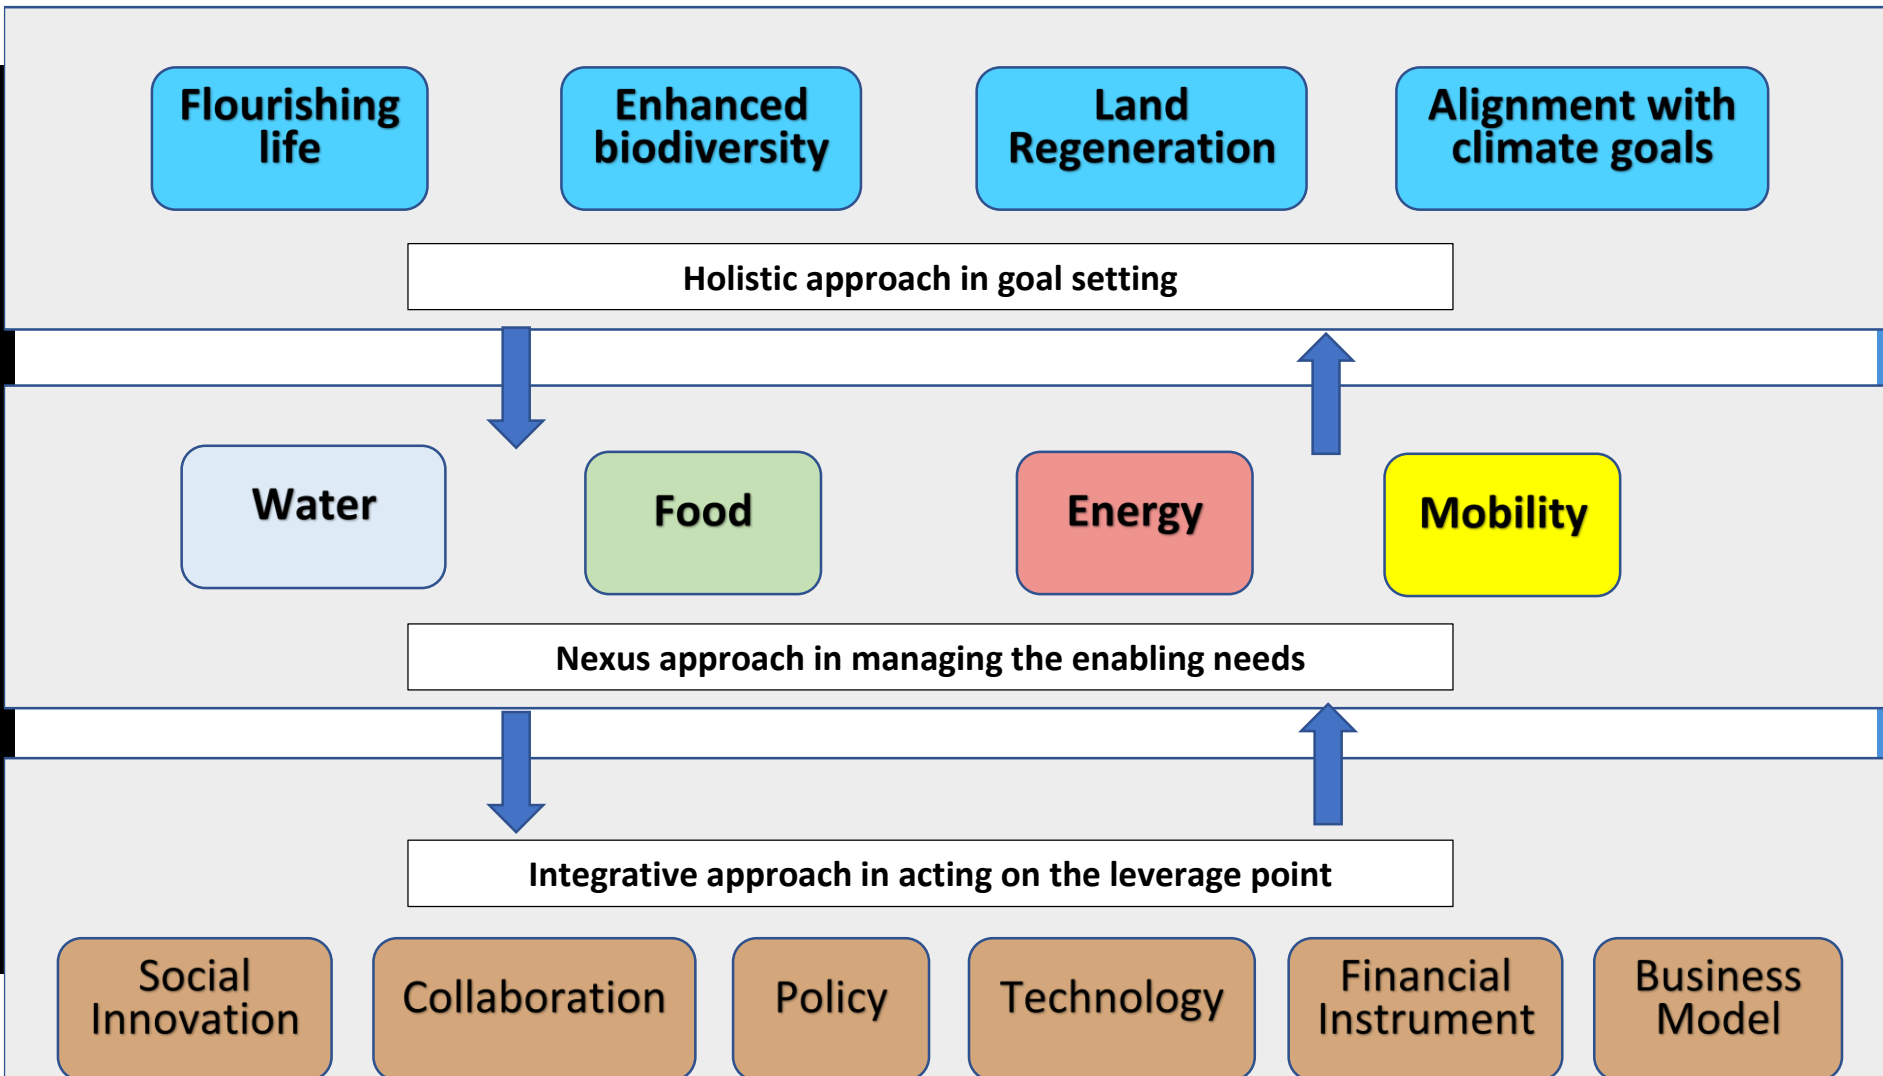

System innovation for sustainable water and energy solutions

Tuesday 14 June 2022

Global Symposium on Sustainable Water and Energy Solutions

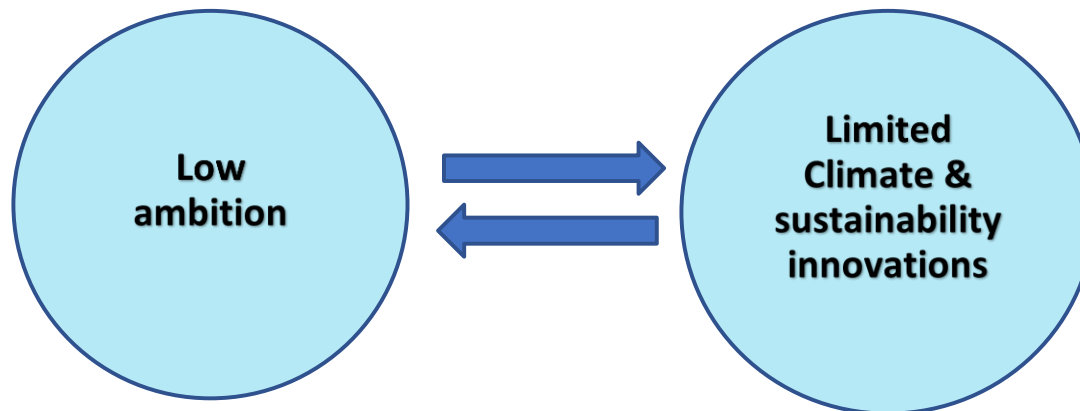

System approach to address global challenges

System approach to address global challenges

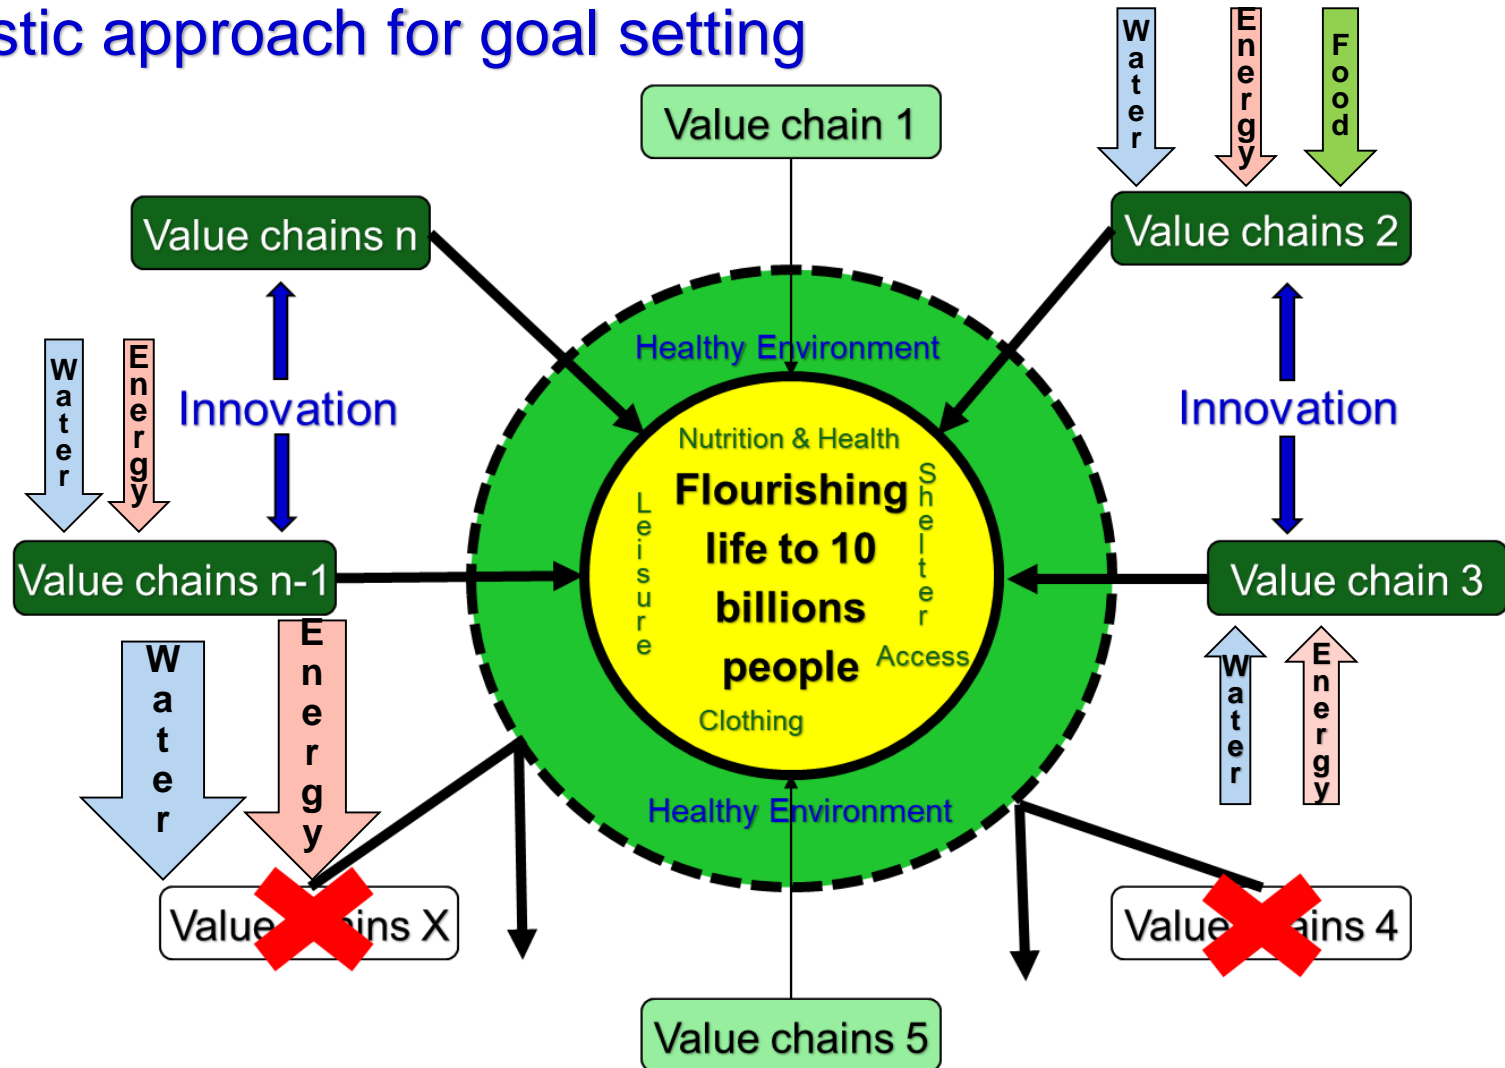

Vicious circle between:

- **low ambition based on what is perceived as possible and**
- **limited climate and sustainability innovations**

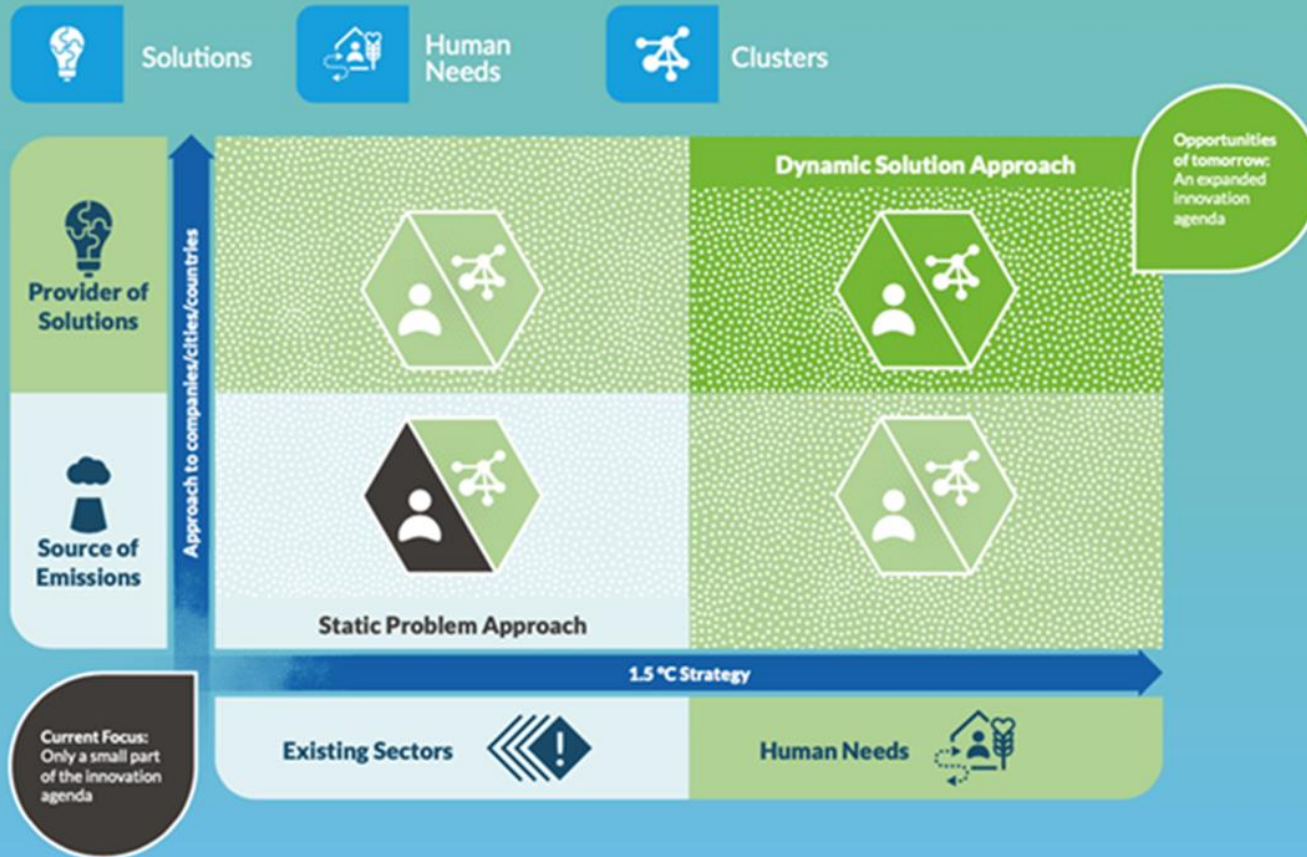

System approach to address global challenges

Holistic approach for goal setting

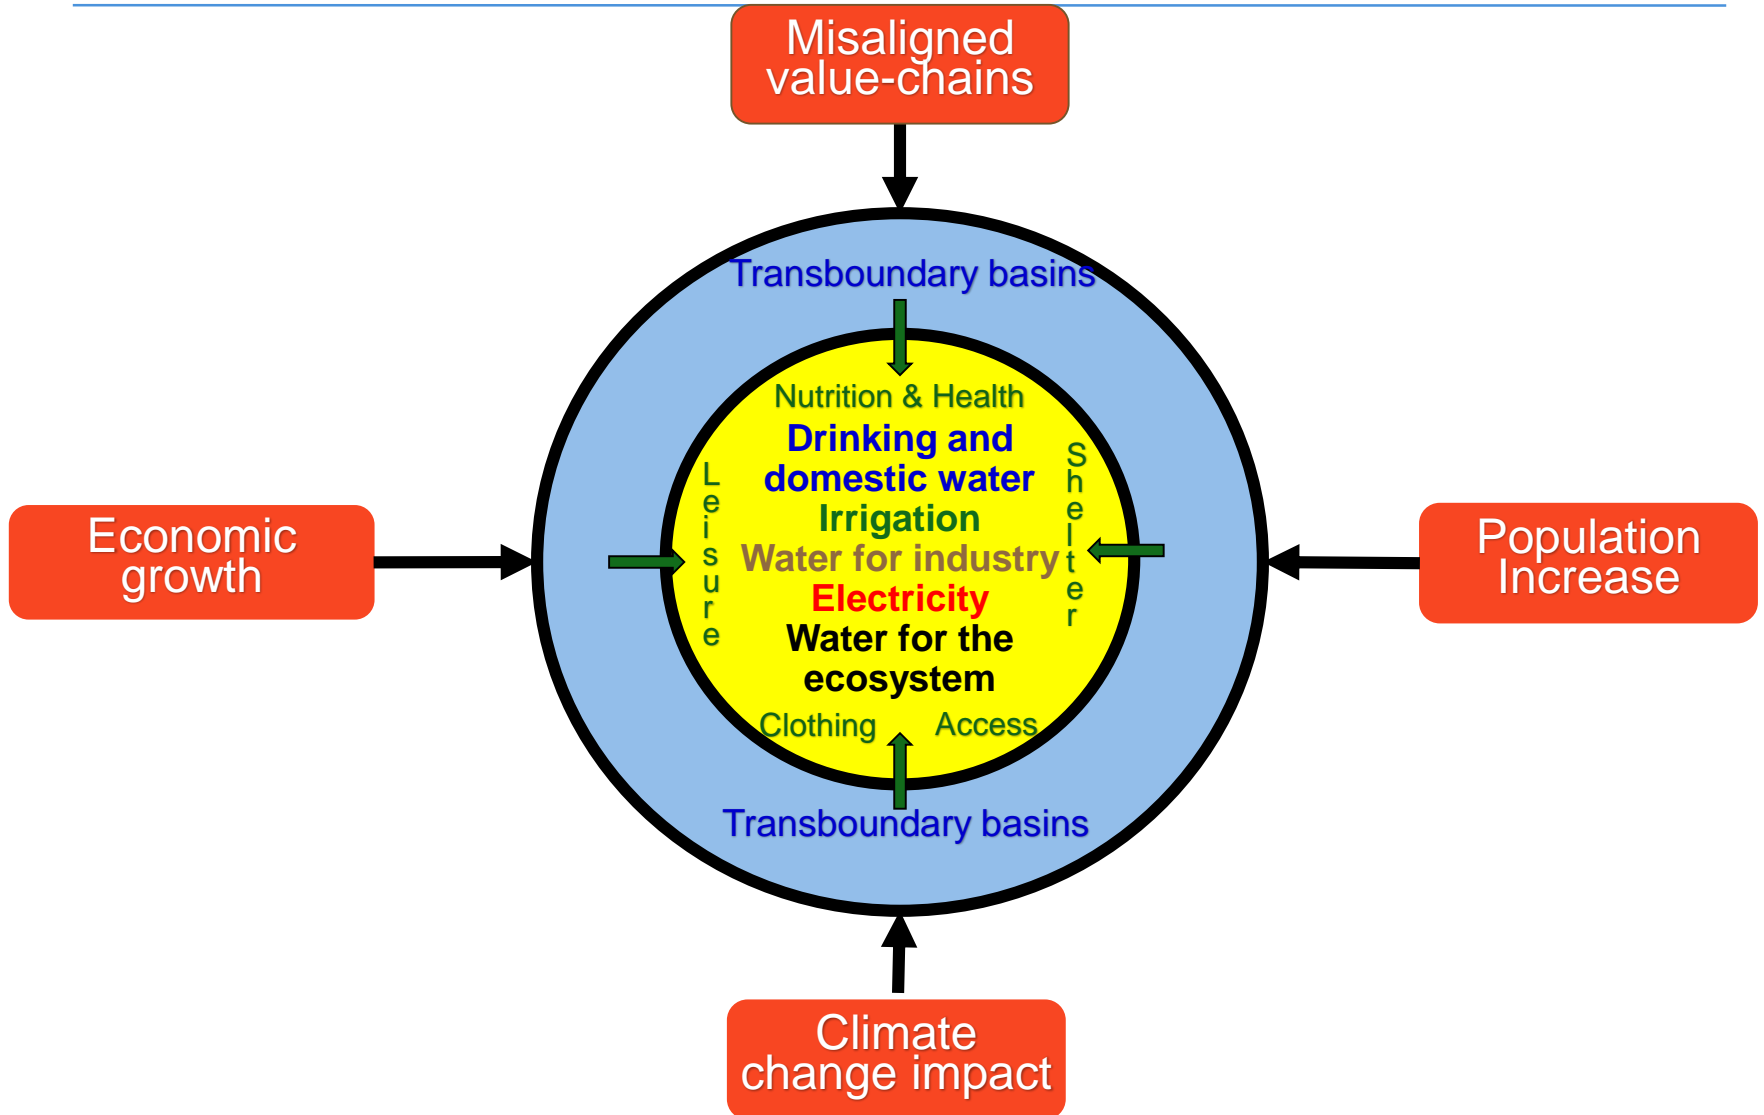

System approach to address global challenges

An expanded innovation agenda

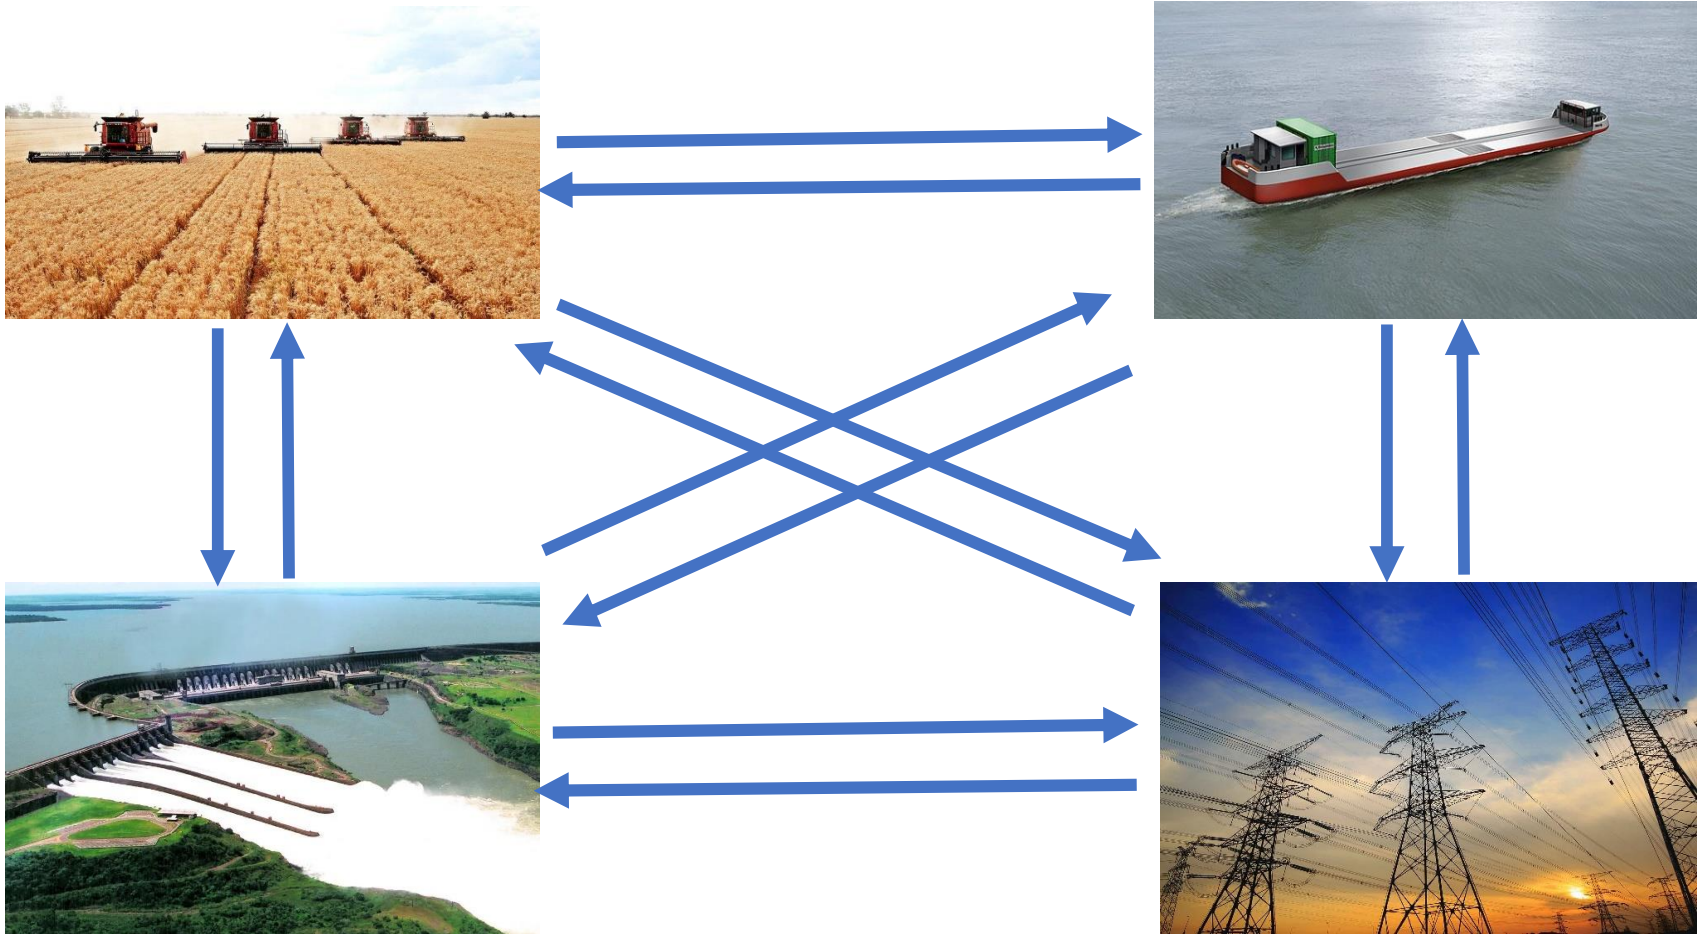

Mobilizing all synergies using a system approach

System approach to address global challenges

Nexus approach for the management of the enabling needs

System approach to address global challenges

Integrated approach when acting on the leverage points

Innovative collaborations

Financial solutions

Technology solutions

Leadership solutions

Policy solutions

Demand

Capacity building solutions

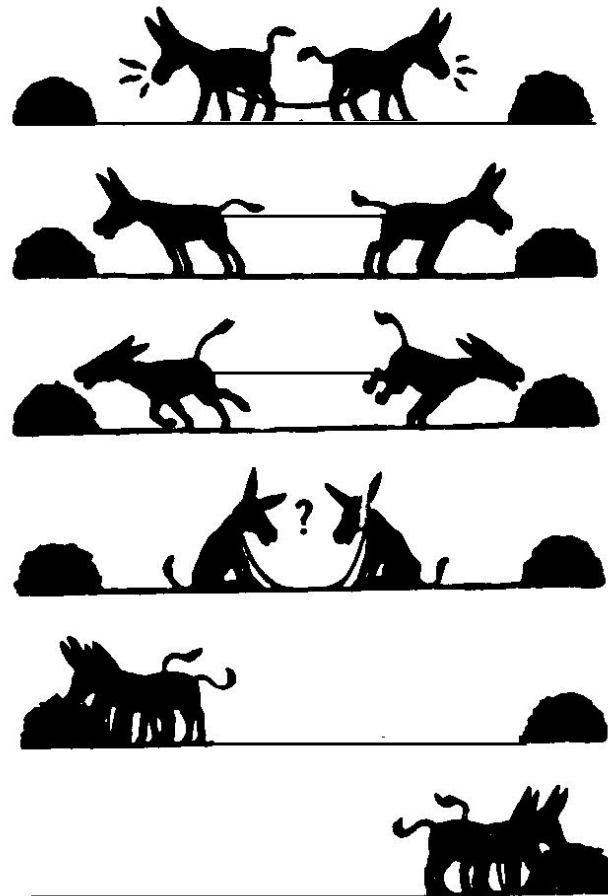

Business Model solutions

Social innovation

System innovation requires cooperation

“Co-operation”

Visit the UGIH Website

The screenshot shows the UNFCCC website with the 'UN Climate Change Global Innovation Hub' page highlighted. The navigation menu includes 'UNFCCC Topics', 'COP 26', 'Process and meetings', 'Topics', 'Calendar', 'Climate action', 'Documents and decisions', and 'About'. The 'UNFCCC Topics' sidebar lists various areas, with 'Innovation' circled in red. The main content area features a large graphic of a sustainable city with solar panels, wind turbines, and green buildings. Below the graphic, the text reads: 'The Global Innovation Hub, launched in November 2021, aims to promote transformative innovations for a low-emission and climate-resilient future. The Hub expands the global innovation space by facilitating solutions that support the climate-related Sustainable Development Goals (SDGs) and that address core human needs for food, shelter, mobility, and access via alternative value chains aligned with those SDGs. The Innovation Hub complements the current approach to innovation for climate solutions — an approach that has to be incremental, sector-based and problem-oriented — with a transformative, need-based and -oriented one. The United Nations Framework Convention on Climate Change, the Innovation Hub leverages the climate leadership of the United Nations with the dynamism of the private sector. The UN Climate Hub is the first-ever cross-disciplinary community of practice with a space — physical and virtual — to develop solutions in a spirit of radical collaboration.'

UNFCCC Topics

- Action on Climate and SDGs
- Adaptation and resilience
- Capacity-building
- Climate Action
- Climate Finance
- Climate Technology
- Education & Youth
- Gender
- Global Stocktake
- Innovation**
- Land Use
- Local Communities and Indigenous Peoples Platform
- Market and Non-Market Mechanisms
- Mitigation
- The Ocean
- Pre-2020 Ambition and Implementation
- Science

UN Climate Change Global Innovation Hub

The Global Innovation Hub, launched in November 2021, aims to promote transformative innovations for a low-emission and climate-resilient future. The Hub expands the global innovation space by facilitating solutions that support the climate-related Sustainable Development Goals (SDGs) and that address core human needs for food, shelter, mobility, and access via alternative value chains aligned with those SDGs. The Innovation Hub complements the current approach to innovation for climate solutions — an approach that has to be incremental, sector-based and problem-oriented — with a transformative, need-based and -oriented one. The United Nations Framework Convention on Climate Change, the Innovation Hub leverages the climate leadership of the United Nations with the dynamism of the private sector. The UN Climate Hub is the first-ever cross-disciplinary community of practice with a space — physical and virtual — to develop solutions in a spirit of radical collaboration.
