

HIGH-LEVEL DIALOGUE ON
ENERGY
UNITED NATIONS, NEW YORK, SEPTEMBER 2021

ENERGY COMPACT PREVIEW

SUSTAINABLE ENERGY FOR ALL

- **By 2023, directly provide over 2 million new energy connections through our results-based financing facility, the Universal Energy Facility, displacing at least 1 million fossil-fuel based generators and 4 MT CO₂e emissions, and creating about 2 million jobs.**
- **By 2023, leverage US\$640 million towards energy access and/or clean energy transitions directly and indirectly through SEforALL's work.**
- **SEforALL's Energy Compact is also aligned with the UN-Energy Pledge to help Member States and their partners achieve key milestones by 2025 towards SDG7 and net-zero emissions.**
