## Chapeau

### Chapter I. Sustainable development and financing for development

*We aim to end the war and the development of weapons, which is the greatest destruction of environment and human beings. The purpose is to ensure that sustainable development is achieved without leaving anyone behind and without compromising the ability of future generations to meet their own needs, as promised in the 2030 Agenda. We will ensure that the nations will use the funds to realize the 2030 Agenda, rather than the developments leading to war.*

### Chapter II. International peace and security

*We must ensure that the whole world decide to end the war, weapons development and weapons testing. This is the only way for international peace and security. Countries with nuclear weapons must immediately denuclearize and sign and ratify the Treaty on the Prohibition of Nuclear Weapons. They must cease all further development and testing of weapons, including nuclear tests. All humanity pledges itself to non-violence in the settlement of all disputes of national and international standing and ideological differences.*

### Chapter III. Science, technology and innovation and digital cooperation

*We will place value of science, technology and innovation on the regeneration of the global environment rather than its destruction. It has an infinite potential for growth and will offer hope for the future.*

### Chapter IV. Youth and future generations

*We must improve the education of youth and future generations by changing the evaluation criteria. Students will learn; how to help each other and live with all living things on earth, how to get food, water and oxygen, how humans interact with other living things, and how to communicate with people with different values and respect each other. We are responsible for eliminating the anxiety of future generations*

*by caring and acting for the environment. We must stop war, restore global environment and provide as many options as possible for future generations. We are committed to working together with young people to discuss inter-generational and inter-community justice.*

## **Chapter V. Transforming global governance**

*We will strengthen international arbitration and life-saving mechanisms. We will promote further dialogue to bridge inter-generational and North-South gaps.*
