ENERGY COMPACT PREVIEW

UltraTech Cement Limited (UTCL)

• To increase the share of renewable/green energy to 34% by 2024 below 2005 levels. This will be achieved through increasing the production and consumption of renewable/green energy in its energy mix, as well as investing in waste heat recovery systems (WHRS) and mix of onsite and offsite renewable energy projects.

• To double energy productivity from the base year of 2010 with the target year of 2035. This will be achieved through adoption of latest technological and digital tools to improve our energy productivity, as well as investing in WHRS and renewable energy projects through group captive, open access and captive investments.

• To reduce scope 1 GHG emissions 27% per ton of cementitious material by 2032 from 2017 base year.

• To reduce scope 2 GHG emissions 69% per ton of cementitious material by 2032 from 2017 base year.
