By 2030, 700 million people could be displaced by intense water scarcity.

673 million people (9% of the global population) still practise open defecation (2017).

The majority of them are in Southern Asia.

2 billion people live in countries experiencing high water stress.

1 out of 4 health-care facilities worldwide lack basic drinking water services (2016).

2 out of 5 people worldwide do not have a basic handwashing facility with soap and water at home (2017).

785 million people remain without even basic drinking water services (2017).

Ensure availability and sustainable management of water and sanitation for all.
