Ensure access to affordable, reliable, sustainable and modern energy for all

9 out of 10 people worldwide have access to electricity.

87% of the 840 million people without electricity live in rural areas.

17.5% of total final energy consumption comes from renewable energy.

3 billion people lack clean cooking fuels and technology.

On average, 2.3% less energy was needed to create $1840 million of economic output each year (2010–2016).
