

FUME FIGHTER

“Defender of clean air and protecting the atmosphere from bad fumes”

WHAT THEY DO:

Bikes, walks, or takes public transportation when possible

Scavenger hunts for things in their house that are bad for the air

Adopts air cleansing plants

Why do we need the Fume Fighter?

Nine out of 10 people around the world breathe highly polluted air - due to pollution from factories, households and cars. The World Health Organization found that 90% of the world's population lives in areas where the level of pollutants exceeds recommended limits, especially in cities. And although cities occupy just 3 percent of the Earth's land, they account for 60-80 percent of energy consumption and 75 percent of carbon emissions. People and governments are working every day to come up with innovative and sustainable solutions to improve our cities. Develop a vision for your building, street, and neighbourhood that would make it cleaner, greener and more sustainable, and act on that vision. The better the conditions you create in your community, the greater the effect on everyone's quality of life!
