Humanitarian Situation Report No. 2

Reporting Period
1 July to 30 September

State of Palestine

HIGHLIGHTS

As of 30 September, 39 Palestinian children were killed, and 894 children were reported injured in conflict-related violence. Prior to the recent escalation in the Gaza Strip, 495,600 children were in need of MHPSS, while 700,000 children faced limited access to primary healthcare due to overstretched and disrupted health services. Insufficient water supply to households, poor sanitation, limited public WASH services, and risk of flooding further expose 1.36 million Palestinians to waterborne diseases' risks. A total of 12,280 children benefited from essential health and nutrition interventions. A total of 2,525 children were reached with PS services through family centres. More than 47,000 students in public schools in the Gaza Strip continued to utilize education stationary kits. UNICEF also provided humanitarian cash transfers that benefitted 4,420 children. In 2022, UNICEF required US$39,000,000, of which US$ 6,917,016 were received. A total of 71 per cent of the appeal remains a funding gap.

SITUATION IN NUMBERS

930,000
Children in need of humanitarian assistance

FUNDING OVERVIEW AND PARTNERSHIPS

In 2022, UNICEF requires US$ 39,000,000 million humanitarian funding to provide and sustain life-saving services for women and children in the State of Palestine (SoP). UNICEF has received funding from the European Commission / ECHO, UNOCHA, Norway, Australian Committee for UNICEF, Danish Committee for UNICEF, German Committee for UNICEF, Spanish Committee for UNICEF, United States Fund for UNICEF and the UNICEF Global Thematic Humanitarian Response fund. However, the 2022 appeal still has a funding gap of 71 per cent.

SITUATION OVERVIEW AND HUMANITARIAN NEEDS

More than 2.1 million people, including 934,000 children are increasingly vulnerable due to the protracted protection crisis in the State of Palestine. This crisis is a result of the ongoing occupation and recurrent escalation of hostilities, deepening financial and fiscal crisis within the Palestinian economy, and a surge in commodity prices due to the economic impact of the war in Ukraine. The key drivers of the humanitarian crisis, combined with the recent escalation in the Gaza Strip and COVID-19, have deepened the vulnerability of children in Palestine and in turn have increased the demand for humanitarian assistance, which is likely to continue in 2023.

Only 14 months after the May 2021 escalation, in August 2022 three days of intense hostilities took place in the Gaza Strip leaving thousands of children traumatized and in need of life-saving support. Prior to the hostilities in August 2022, 934,000 children in the Gaza Strip were already in need of Mental Health and Psychosocial Support Services (MHPSS) and this number is expected to increase following the escalation.

At the same time, in the Gaza Strip, the humanitarian needs in other sectors persist following almost sixteenth year of the closure. Around 1.3 million children have constrained access to essential services which is overwhelming the capacities of health and child protection service providers. Since the beginning of the year until the end of September 2022, 39 Palestinian children were killed (17 in the Gaza Strip and 22 in the West Bank) and 894 children were reported injured in conflict-related violence. During the same period, Israeli forces detained 404 children in East Jerusalem.

The World Bank estimates that the May 2021 conflict has increased poverty to 59.3 per cent in 2021, a 2.3 percentage points higher than the COVID-19 induced peak in 2020 in the Gaza Strip. This is expected to increase after the 2022 escalation. For instance, 50 per cent This is over and above other driving factors such as high unemployment and deteriorating living conditions. The high rate of unemployment and lack of economic opportunities is affecting many households and increasing their dependency, particularly in the Gaza Strip. During the second quarter of 2022, the unemployment rate reached 44 per cent in the Gaza Strip and 14 per cent in the West Bank (21 per cent men and 38 per cent women).

Furthermore, 5.7 per cent of school-age children in the Gaza Strip dropped out during the current academic year due to school-related expenses, children having to work or schools not being inclusive. Dropout rates in the West Bank are estimated at 19 per cent, primarily due to protection risks and school closures.

Health services continue to be overstretched and disrupted, including because of COVID-19, as of 30 September 2022 more than 702,000 confirmed cases of COVID-19, of which 50 per cent were women and 10 per cent were children under the age of 18. This is leaving an estimated 1.5 million people (66 per cent in the Gaza Strip and 33 per cent in the West Bank), including 700,000 children, with limited access to primary healthcare. Moreover, insufficient water supply to households, poor sanitation, limited public WASH services, and risk of flooding further expose 1.36 million Palestinians to waterborne diseases' risks.

SUMMARY ANALYSIS OF PROGRAMME RESPONSE

Health and nutrition

In partnership with WHO and UNFPA, UNICEF continues to support health system strengthening in the State of Palestine building the capacity of service providers to deliver quality health services particularly a Primary Health Care level. This includes maternal and neonatal emergency health care, postnatal care, and early childhood development, focusing on children with developmental delays and disabilities.

During the reporting period, a total of 1,445 neonates received quality healthcare services in Neonatal Intensive Care Units (NICUs) as well as 24,951 women in reproductive age, pregnant and lactating women benefited from maternal and nutrition services. A total of 12,280 children (6,264 boys and 6,016 girls) under the age of 5 benefited from essential health and nutrition interventions, while 3,281 caregivers participated to awareness sessions on Sexual Reproductive and Maternal Child Health and Nutrition (SRMCHN).

Moreover, in the Gaza Strip, UNICEF is supporting the provision of nutrition services for malnourished children. During the reporting period, 332 children with severe acute malnutrition and 1,271 children with moderate acute malnutrition (648 boys and 623 girls) benefited from treatment provided by local NGO partners.

UNICEF has also supported the provision of dignity kits to community groups through an NGO partner benefiting around 91 families. Dignity kits part of the postnatal home visit for women. These include personal hygiene material, sanitary items for women and new-borns as well as children under five. Dignity kits were distributed to 91 families. This benefitted 91 women and their new-borns, and children under five in these families (273 total beneficiaries).

Finally, UNICEF supported the provision of medical supplies to the MoH in the Gaza Strip. This includes the provision of 19 items of medical consumables benefitting 22,646 women, 1,697 children (50 per cent girls) and 100 Health providers.

Child protection, GBViE and PSEA

During the reporting period, a total of 2,525 children (52 per cent girls) were reached with psychosocial support services through family centres, including life skills education, expressive arts, child parent interaction, psychological first aid and group and individual counselling in the Gaza Strip. Additionally, 515 children (44 per cent girls) benefited from individual case management, including referral to Gender Based Violence (GBV) services.

Furthermore, 1,374 caregivers (76 per cent women) attended awareness-raising sessions on positive parenting and the protection of their children, strengthening families' capacity to prevent violence at home. Moreover, 2,196 children and their caregivers (44 per cent children, 45 per cent girls) were reached with educational sessions on managing Explosive Remnants of War (ERW).

In the West Bank, including East Jerusalem, in collaboration with three local partners, UNICEF reached 1,837 children and caregivers affected by conflict-related violence, including 97 children with structured mental health and psychosocial services while 43 mothers, participated in structured psychosocial activities. Furthermore, a total of 71 arrested children (69 boys and 2 girls) aged 12-17 years old, in the West Bank, including East Jerusalem, were supported with legal assistance including tracing, legal counselling and representation, through two local partners.

As lead of the Child Protection Area of Responsibility and Mental Health and Psychosocial Support Working Group, UNICEF provided strategic guidance and coordination to partners engaged in the child protection responses in line with priorities identified in the Humanitarian Needs Overview. In the Gaza Strip and the West Bank, partners reached 30,542 children (15,430 girls, 15,112 boys) including 1,831 with special needs and 21,866 adults (15,891 women and 5,975 men) with child protection and MHPSS services. Moreover, 2,365 children (1,000 girls and 1,365 boys) were reached with individual case management services.

In September 2022, CP AoR, with support from the CP AoR Global MHPSS Lead, trained 106 (77 women and 29 men) CP AoR/MHPSS managers, supervisors, and frontline practitioners on capacity development planning for service delivery of MHPSS for children, adolescents, caregivers, and families. The MHPSS Lead provided the training for eight days (4 days in the West Bank and 4 days in the Gaza Strip).

On Prevention of Sexual Exploitation and Abuse, the PSEA Network has strengthened its partnership with the PSEA Network's 121 Helpline to increase the number of counsellors in response to an increased number of calls. The helpline is operational 24 hours and provides first aid counselling and follow-up, referrals to in-person services for medical care, legal assistance, MHPSS, SGBV, and addressing the special needs of people with disabilities. The helpline work also informs the Interagency efforts on PSEA. Messaging to communities on the availability of confidential channels has been reinforced and stressed in interagency meetings.

Education

During the reporting period, UNICEF completed the rehabilitation of 26 schools damaged during the May 2021 escalation, benefitting 26,244 students (43 per cent girls). In total, UNICEF supported the rehabilitation of 46 damaged schools, reaching over 120,000 children (more than half are girls)

In support to the COVID-19 response, 1,086 vulnerable schools continued to implement the COVID-19 safe schools' protocols using the school hygiene kits (cleaning and disinfection materials) provided by UNICEF to prevent the spread of COVID-19. This ensured the safe continuity of education during the pandemic for 325,800 children and staff (51 per cent women and girls).

To mitigate the risk of school drop-out amongst vulnerable children from poor families, 47,140 students in public schools in the Gaza Strip continue to benefit from the education stationary kits supporting their continuous leaning, in response to the increased vulnerability of families in the Gaza Strip meeting educational expenses.

UNICEF worked closely with the Ministry of Education and supported age-specific summer interventions in the Gaza Schools and the West Bank during the school summer holidays. Nearly 10,000 children enrolled in grades 1-6 were reached through Fun days' activities implemented in 100 schools (50 per cent in the Gaza Strip). With UNICEF support, the national level training materials were developed and trained 451 teachers (59 per cent women) to support learning and recreational activities for the Fun days' activities. Children enrolled in grades 7-11 were reached through Science, Technology, Engineering and Mathematics (STEM) clubs implemented in 198 schools (148 in the West Bank and 50 in the Gaza Strip) a total of 5,987 students (56 per cent girls) were reached. Furthermore, 450 teachers (50 per cent women) were trained to support STEM clubs and the schools were provided with STEM kits to support the implementation of STEM clubs.

As Education Cluster lead, UNICEF continued to strengthen partners' capacity to manage and coordinate the humanitarian response. 62 (29 from Gaza) participants from 48 education cluster partners (27 from Gaza) benefited from the Joint Partners Capacity Building Program conducted by the Education and WASH Clusters and CP AoR to train the partners on Planning and Writing a Grant Proposal, Protection Mainstreaming, Communication, and Advocacy. The training aimed to enhance the partners' capacity and the quality of the response projects for the Humanitarian Response Plan (HRP). Also, 41 school principals in the most affected schools in WB participated in training on the reporting and documentation of education-related incidents. The training aimed to enhance the school principals reporting and documentation skills to strengthen the education-related incidents documentation process. Moreover, the Education Cluster published the Semi-Annual Report (January – June 2022) for education-related incidents. The report documented 115 education-related incidents that occurred in the first half of 2022 affecting 7,609 students (2,767 girls), and 418 teachers and education staff (101 female), and 46 schools. This represents a significant increase in the incidents targeting schools and students compared to the first halves of 2021 and 2020.

Water, sanitation and hygiene

In collaboration with the World Food Programme (WFP), UNICEF provided e-vouchers for life-saving hygiene kits to the most vulnerable families directly impacted by the August 2022 escalation of hostilities. This intervention covered the basic household personal hygiene needs of 250 families (including 355 women, 360 men, 384 girls and 401 boys) across the Gaza Strip. Furthermore, UNICEF urgently provided essential spare parts to the Costal Municipality Water Utility (CMWU) to carry out urgently repairs and maintenance of water supply and wastewater networks that were damaged as the result of the escalation, thereby restoring WASH services to 2,002 affected people in Rafah (including 474 women, 480 men, 512 girls and 534 boys). Additionally, UNICEF procured and delivered to the Palestinian Water Authority (PWA) and CMWU

essential water production and treatment chemicals, including 60 cubic meters of Anti Scalant, 350 cubic meter of Sodium Hypochlorite (Chlorine) and 25 cubic meter of Caustic Soda). In anticipation to possible shortages, UNICEF provided three key seawater desalination plants and water production wells with chemicals in the Gaza Strip for 90 days.

UNICEF is also working with CMWU by carrying out electromechanical repairs for water wells and pumping stations and upgrading wastewater pumping stations to improve access to sustainable services and safely managed sanitation for 90,000 people including 21,319 women, 21,582 men, 23,040 girls and 24,059 boys).

As the WASH Cluster lead agency, UNICEF is facilitating the WASH humanitarian programme cycle 2023 process for the WASH humanitarian needs overview 2023. In cooperation with WASH partners and relevant authorities, the WASH Cluster defined the WASH vulnerability indicators. Therefore, and based on the 2022 MSNA and WASH assessments, 1.35 million Palestinians were identified as a population in need of WASH assistance in 2023. The WASH Cluster has organized the annual cluster partners' capacity building program. More than 30 WASH Cluster partner organizations participated in two-day training sessions focusing on project formulation, protection mainstreaming, data visualization, communication and advocacy.

Social protection

During September 2022, UNICEF started a second phase of the Humanitarian Cash Transfers payments to 1,157 conflict affected households through the Gaza Child Cash Grants Programme, which include five monthly payments. All households were verified by UNICEF third party monitoring partner to be with children, conflict affected and extremely poor. The first payment of the second phase of the Gaza Child Cash Grants Programme reached 4,420 children (2,247 boys and 2,173 girls). These programmes are built in support of the MoSD Social Assistance programmes and are planned to contribute to the strengthening of the Shock Responsiveness of the Palestinian National Cash Transfer Programme promoting Nexus programming within Social Assistance.

One of the major spending items was on food related to children's needs and was mainly towards nutritious food purchases such as meat, vegetables, and milk. This therefore points to the significance of multipurpose cash transfers in addressing children's nutritional requirements hence mitigating malnutrition and the risk of disabilities associated with dietary deficiencies. The selling of household assets reduced, households' debts reduced and 96 per cent of households reported reduction in stress level.

Cross-sectoral (HCT, C4D, RCCE and AAP)

The Social and Behaviour Change (SBC) is embedded across all UNICEF programmes through leading evidence generation and community engagement. During the reporting period, UNICEF SBC produced a Situation Comedy (SitCom) series for children aged 10-14 years old to create positive content for Children on YouTube. It tackled topics related to health and nutrition, hygiene promotion, COVID-19 vaccination, learning to earning, bullying and other issues. Over 107 children and parents were engaged in the production of the series through a series of workshops. The series was published in August 2022 and reached over 1,160,665 views on social media and YouTube.

UNICEF leads the Risk Communication and Community Engagement (RCCE) task force in SoP, and currently supporting the implementation of community engagement interventions, with a focus on at-risk populations to persuade them to get vaccinated for COVID-19, while also generating demand on booster vaccines. Together with the RCCE partners, UNICEF built the capacity of 65 young social media micro influencers who produced and published more than 20 social media posts, including 5 videos tackling life after COVID-19. Through their platforms, messages on COVID-19 vaccination reached over 800,000 people. Other community engagement activities have reached and engaged 18,135 adolescents in targeted communities.

UNICEF SoP has strategically invested in advancing Accountability for Affected Population

(AAP) and Protection of Sexual Exploitation and Abuse (PSEA) portfolios and addressing potential risks related to UNICEF's operations and misconduct of personnel involved in the delivery of UNICEF's programme.

On AAP, UNICEF is implementing programme titled "Voices of Change" which has built an internal feedback mechanism that is ready to receive feedback from programmes and specialized channels and respond to all complaints in a timely and efficient manner. This mechanism collects and classifies complaints, requests for information and assistance, positive feedback and sensitive information such as Child Protection, SEAH and SGBV reports which are then channelled through a confidential and data secured platform.

On PSEA, UNICEF SoP has been the leader of the establishment the interagency PSEAH Network which mirrors the internal efforts exerted to prevent risk of SEAH. UNICEF SoP has been mainstreaming PSEA in all operations, training personnel standardized good practices, and develop protocols to handle SEA cases. UNICEF SoP has also led the establishment of a Community-Based Complaint Mechanism (CBCM) that fosters a survivor's centered approach and connects to AAP system(s). UNICEF SoP has worked with local implementing partners on capacity development and trained them on the core humanitarian standards and AAP and PSEA principles. UNICEF SoP also engaged the private sector (by outsourcing hotline agents for an Interagency Hotline with WFP), as well as the national system hotline used as the interagency hotline for the PSEA network. UNICEF SoP has also worked closely with partners on their internal PSEA assessments and capacity building.

HUMANITARIAN LEADERSHIP, COORDINATION AND STRATEGY

UNICEF is part of the UN and Humanitarian Country Teams and regularly coordinates its action with other organizations and local stakeholders. Within this partnership, UNICEF leads the WASH Cluster and with Save the Children co-leads the Education cluster. Within the Protection Cluster, UNICEF leads the Child Protection Area of Responsibility and the Mental Health and Psychosocial Support Working Group. UNICEF co-leads the Nutrition Working Group under the Health Cluster, in the Gaza Strip and at the national level in close collaboration with the World Health Organization. UNICEF and partners continued to foster synergies between humanitarian and development assistance in the State of Palestine, while emphasizing on emergency preparedness. For health and nutrition, UNICEF supports neonatal emergency health

care, postnatal care, and early childhood development, focusing on children with developmental delays and disabilities. With the deterioration of the water and sanitation situation and the ongoing energy crisis, UNICEF provides safe drinking water through solar power, water tank rehabilitation and network upgrades. Vulnerable households are supported with drinking water taps, latrines, sewage connections and hygiene promotion activities. UNICEF also supports flood preparedness and mitigation activities in high-risk areas. UNICEF regularly delivers critical health and other supplies to the Gaza Strip in response to humanitarian needs.

HUMAN INTEREST STORIES AND EXTERNAL MEDIA

During this reporting period, external communication and advocacy continued efforts to keep children's issues at the forefront and acknowledge partners and donors support for children's rights and wellbeing in the State of Palestine.
