The World Water Day is held annually on March 22 to emphasize the relevance of fresh water and to promote the sustainable management of freshwater resources.

Each year, World Water Day highlights a specific aspect of fresh water.

„Water and Sustainable Development“ is 2015's focus.

The Water Lecture series is a joint series organized by the Center for Development Research (ZEF), the UN-Water Decade Programme on Capacity Development (UNW-DPC), the Institute for Environment and Human Security at the United Nations University (UNU-EHS) in Bonn, the Global Water Systems Project (GWSP), the German Development Institute (DIE) and the Water Unit of the Geography Department (University of Bonn).
