

Open Working Groups on Sustainable Development Goals, Tenth Session
31st March - 4th April 2014
New-York, USA

Side event

The 10 Year Framework of Programmes on Sustainable Consumption and Production

Launching the Sustainable Public Procurement Programme

1st April 2014, 13:15-14h30, Conference Room 1

What is the 10YFP?

The 10 Year Framework of Programmes on Sustainable Consumption and Production (10YFP), adopted by world leaders at the Rio+20 Conference, is a global framework of action to enhance international cooperation for and accelerate the shift towards sustainable consumption and production patterns in both developed and developing countries. The main objectives of the 10YFP are to contribute to resource efficiency and decoupling economic growth from environmental degradation and resource use, while creating decent job and economic opportunities, contributing to poverty eradication and shared prosperity. To this end, the 10YFP supports implementation of regional and national policies and initiatives; capacity-building and the mainstreaming of SCP into sustainable development policies, programmes and strategies; facilitates access to financial and technical assistance for developing countries; and serves as an information and knowledge platform on SCP to enable all stakeholders to expand their networks, share tools, initiatives and best practices. [Want to know more about the 10YFP?](#) Visit www.unep.org/10YFP

What is the SPP Programme of the 10YFP?

The 10YFP Programme on Sustainable Public Procurement (SPP) is a collaborative global framework that aims at building the case for SPP. The programme has two objectives:

1. **Build the case for SPP:** improve the knowledge on SPP and its effectiveness as a tool to promote sustainable consumption and production, support greener economies and sustainable development.

2. **Support the implementation of SPP** on the ground through increased collaboration, and better access to capacity building tools and support through SPP experts.

This side event is convened by the **Korea Environmental Industry and Technology Institute (KEITI)**, **ICLEI-Local Governments for Sustainability** and the **United Nations Environment Programme (UNEP)** that have formally committed to co-lead the Sustainable Public Procurement programme of the 10YFP.

The 10YFP Programme on SPP: Building on a 10-year journey

The 10YFP Programme on SPP further amplifies and extends the impact of the Sustainable Public Procurement Initiative (SPPI), which was launched in June 2012 at the Rio+20 Conference (www.sppinitiative.org). The SPPI was itself a continuation of the Marrakech Task Force on Sustainable Public Procurement, led by the government of Switzerland from 2005 until 2011. To view the main achievements of the Marrakech Task Force, please visit esa.un.org/marrakechprocess

Objective of the event

The side event will formally mark the inception of the 10YFP SPP Programme. It will also provide the opportunity for the co-leads to present and discuss with participants the Programme's objectives and work plan.
