“Domestic Financing for Health: Invest to Save”

Monday, September 22nd 2014, 6.30 - 8 pm

Conference Room 1, United Nations Conference Building, New York

His Excellency, President Uhuru Kenyatta, the President of the Republic of Kenya, in collaboration with the African Union, the United Nations Foundation, and the Global Fund to Fight AIDS, Tuberculosis and Malaria, cordially invites you to join a discussion on the future of health financing.

Join us for a side event on domestic financing for health on the margins of the 69th session of the United Nations General Assembly in New York. This discussion will provide an opportunity to discover and debate the new trends in domestic financing for health with the most influential leaders in the field.

Speakers include:

His Excellency, President Uhuru Kenyatta, the President of the Republic of Kenya

Dr Larry Summers, Professor and President Emeritus, Harvard University (TBC)

Dr Mark Dybul, Executive Director, The Global Fund

Dr Nkosazana Dlamini-Zuma, Chairperson, African Union Commission

The world has a historic opportunity to end AIDS, tuberculosis and malaria as epidemics. Investing in health is a shared responsibility. Increased domestic financing, combined with international resources, is key to delivering a breakthrough and moving towards universal healthcare. Rapid economic growth in Africa and new epidemiological intelligence call for a new paradigm in health financing, one in which external funders and implementing countries pool their resources in the spirit of global solidarity and invest them wisely.
